BRECK'S 1913 HIGH GRADE SEEDS

ESTABLISHED
1822

BRECK'S' Real Estate AGENCY

51 and 52 NORTH MARKET ST., BOSTON

CONNECTED WITH THEIR SEED STORE AND AGRICULTURAL WAREHOUSE
ESTABLISHED 1822

Do You Wish to BUY OR SELL ?

Our catalogue of farms and country places contains over 500 descriptions and 50 illustrations, sent free on application.

LIST YOUR PROPERTIES
NOW FOR QUICK SALES.

Breck's Horticultural and Agricultural Registry

Employers and Employees in these lines will be served at 51 and 52 North Market Street, as formerly, where competent assistants will use every endeavor to give satisfaction to all who favor us. Approved GARDENERS, FLORISTS, FARM MANAGERS, COACHMEN, SUPERINTENDENTS OF COUNTRY ESTATES, PUBLIC AND OTHER INSTITUTIONS, MEN FOR GENERAL WORK ON COUNTRY PLACES, etc., will here find prompt, efficient and courteous service, while employers of such help can rest assured that *only persons who have been deemed worthy of entry in our register will be recommended to them.*

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it cannot be better expressed than through a liberal use of the facilities we offer.

Breck's Bureau of Registry and Information

LOCATED AT 55 FRANKLIN ST., BOSTON

Supplies through its MERCANTILE DEPARTMENT approved Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Janitors, Watchmen, Hotel Help, Engineers, Firemen, etc., Help for Institutions and Hospitals, and through its WOMEN'S MERCANTILE DEPARTMENT approved Women Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Women for Office Work, Matrons, Nurses, etc. Hotel Employees for all positions.

When this bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining. Rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than can any house not having our resources. *The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.*

On application we will mail circulars descriptive of our Bureau, and blank forms whereon employers and employees can state particulars necessary to guide us in supplying their wants.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we recently secured commodious quarters at 55 Franklin Street, which we fitted up in an appropriate and attractive manner. Here our manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

Bear in mind that no person is sent out from our Bureau whose previous record for character and habits has not been carefully investigated and approved.

Yours respectfully,

Telephone, Richmond 2360

HIGH GRADE SEEDS

Bulbs, Plants, Nursery Stock

AND

Horticultural Sundries

WE take this opportunity to thank our friends and customers for their generous patronage during the past year, and to solicit their future business; assuring them that all seeds and other merchandise offered herein are of the same high standard of excellence maintained by the House of Breck during an existence of nearly a hundred years.

Free Delivery Anywhere in the United States where Orders are Accompanied by Cash. We deliver free to any Post-office, Railroad, Express Office or Freight Station at our expense where orders are accompanied by cash, except where otherwise noted: Vegetable and flower seeds at the pkg., oz., $\frac{1}{4}$ lb., $\frac{1}{2}$ lb., and 1 lb. prices; bulbs at the single and dozen rates; books and other publications. If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to price, at the rate of 8c. per pt. and 15c. per qt.

Orders. We would impress on our friends the importance of sending us their orders early. Please do not wait until Spring, when we are so busy that there is sometimes unavoidable delay in filling orders.

Register Your Name for Next Year's Catalogue. We request all interested persons who visit our store to register their name and address on the books provided for that purpose. This kindness will be appreciated and will be an advantage to our patrons as well as to ourselves.

Notice. We give no warranty expressed or implied as to description, quality, productiveness or any other matter of any Nursery Stock, Seeds, Bulbs or Plants we sell, and will not be in any way responsible for the crop. If the purchaser does not accept these goods on these terms, he must return them at once, and all payments therefor will be refunded.

JOSEPH BRECK & SONS (Corporation).

We Issue the Following Publications and will gladly mail any of them free on application: Annual Catalogue and Gardener's Guide, published in January; Holland Bulbs and Plants, published in September; The Lawn, The Garden, (sixth edition); Success with House Plants, Points for Poultry Raisers, Catalogue of Agricultural Hardware, Implements, Machines and Woodenware, Illustrated Catalogue of Farms and Country Places, Nursery Catalogue.

Our Nursery and Seed Trial Grounds are Conducted by
BRECK-ROBINSON NURSERIES, Inc. - Munroe Station, Lexington, Mass.
Especial Attention Paid to Landscape Designing, Planting, Forestry, Horticulture, Etc.

Our customers who grew BRECK'S KING SEED OATS last year were well pleased with the results. Give them a trial, and we believe you will be satisfied.

See page 50 for description and price.

GOLDEN ROLL OF HONOR

"A continuous business relationship of 40 years or more is certainly a fair test of integrity and honorable dealing."

THE continued growth of our Golden Roll of Honor is very gratifying to us. It is one of the sources of strength which enables us to maintain the standard that satisfies so many thousands of customers. It indicates the mutual confidence that exists between our patrons and ourselves. It shows that our methods are right, and that we supply our trade with "the best goods at fair prices."

Our business, established over eighty-nine years ago by the grandfather of the Brecks now in control, is still conducted under the same roof, but with its growth it has spread on all sides, so that we now occupy the entire block bounded by North Market Street, Merchant's Row, North Street, and Bendall's Lane. Five floors of 10,000 square feet each constitute our salesrooms, offices and accommodations for a working stock for our retail business.

Our great storehouse of seven floors, 93 to 103 Cross Street, affords facilities for carrying and handling goods for our wholesale trade.

For this growth we are in a great measure indebted to the friends who constitute our Golden Roll of Honor, and to the many new customers they have made for us through their recommendations. We take this opportunity to thank all our friends for their many favors, and we beg to assure them that no effort will be spared to maintain the high standard of goods and service.

This year we are privileged to add to our list the names of six more valued customers whose photographs we reproduce on the opposite page.

We print below recent additions to our already large list of Golden Roll of Honor friends who have traded with us for forty years or more.

PLEASE NOTICE. We will esteem it a special favor if parties who have traded with us for forty years and upwards will advise us of the fact, with particulars as to length of time of their dealing with us, and of any features of interest that may be connected with the same during these long periods of years. One cannot but agree that when a silvery haired customer remarks to us, as is not infrequently the case, "I have traded with this house, father, son and grandsons," 40, 50 or even 60 years, as the case may be, the relation between us is a little more than that of mere buyer and seller, and that it is not surprising we feel it to be so.

Nursery and Landscape Department

SO SUPPLY an active and steadily increasing demand for high quality Nursery stock, and expert advice in all phases of landscape work, Joseph Breck & Sons and Mr. A. E. Robinson last spring formed a new corporation. It was expected that a favorable reception would be accorded by both old and new friends, and that this optimism was justified has been proved by the volume of business that was placed with the new concern during its first season, as well as by the many expressions of commendation on the well-chosen location of the Nursery and on the results accomplished in the development of the new property.

The approaching season finds the Breck-Robinson Nursery Co. equipped to handle more business with much greater facility. Fields and storage houses are filled with exceptional values in native and foreign-grown nursery-stock, from which orders can be filled with despatch. Packing and shipping arrangements have been greatly improved. Recent enactments requiring rigid State and Federal inspection of nursery stock insure the existence of no injurious insect pest or disease, while our own careful grading keeps the general quality up to a high standard.

This is the nearest complete nursery establishment to Boston, being only ten miles out of the city, with frequent train service to and from North Station. It can also be easily reached by electric cars by way of the Cambridge subway and Arlington Heights. Monroe Station, where both trains and cars stop, is at the entrance to the nursery grounds. The Boston office will be found convenient for consultation and general business; here facilities are maintained for the execution of landscape work in all its phases, complete plans and estimates for the development of private estates being furnished. Matters of this nature may be taken up by correspondence, or a representative will be sent to look over the ground and offer advice.

An attractive general catalog of nursery stock is furnished on application, also a special fruit catalog. It has been sought to make these complete in every particular, accurate as to descriptions, and sufficiently comprehensive to afford real service in making selections. Prices will be found as low as consistent with the quality of stock offered. Opportunity to quote on special lists of stock is solicited.

BRECK-ROBINSON NURSERY COMPANY

FLOWER SEED NOVELTIES

AND SPECIALTIES

Breck's Crego Aster.

Giant Branching Aster. (Peach Blossom.)

Breck's Crego Aster.

This is a giant strain of the Comet type of Aster, with large and feathery flowers; recognized as the finest Aster grown, producing an abundance of bloom on fine, long, graceful stems borne well above the foliage.

295.	Deep pink	.	.	Pkt. 10 cts.
296.	Snow white	.	.	" 10 cts.
297.	Shell pink	.	.	" 10 cts.
298.	Lavender	.	.	" 10 cts.

268 Aster, Queen of Italy

This is an Italian introduction and has been called the Queen, as it will doubtless range foremost among all Asters. It grows about 28 inches high and bears giant flowers 5 inches in diameter on long and graceful stems. The flowers are very double and of a distinct chamois color, keeping a remarkably long time. Pkt. 25 cts.

261. Aster, Hercules Rosy Lilac.

A colored variety of the White Hercules Aster introduced in 1905. It is a splendid delicate rosy lilac, similar to that already existing in the Hohenzollern class. The plant is of compact semi-dwarf habit, not more than 15 to 20 inches in height. It produces flowers $5\frac{1}{2}$ to $6\frac{1}{4}$ inches across, of the most perfect form. Hercules is one of the most refined of all Asters. Pkt. 15 cts.

262. Aster, Eclipse.

The flowers of this beautiful and distinct Aster are of immense size, measuring 6 to 7 inches across, pure white with fine thread-like florets; quite double without the objectionable yellow centre seen in many Asters. Pkt. 15 cts.

418 Aster, Giant Branching. "Peach Blossom."

This is a type of Aster which needs no introduction. It is recognized as a very vigorous form, which grows into large, handsome plants covered with large, long stemmed flowers that are graceful and feathery, and give a very beautiful effect at all times. Pkt. 15 cts.

267. Aster, Mammoth Mauve Queen.

This Aster is of the Comet class. The flowers are very large and very double, on long stems. The color, pearl gray, approaching lavender, makes it a valuable acquisition to the Aster family. Oz. \$4.00; pkt. 10 cts.

See Special Offers on third page of cover.

650. ***Celosia Pyramidalis,*
*Crimson Plume.***

This *Celosia* is the result of many years of careful selection, and as the name implies is of perfect form. Is a beautiful crimson with a little tinge of orange, is very pleasing and easily grown and is very effective either in the garden or in pots for Winter blooming. Its height is about 2 feet. If sown in April will bloom all season until frost. Pkt. 25 cts.

649. ***Celosia Pyramidalis,*
*Golden Yellow.***

After long and careful selection we are now able to offer to our customers this new variety. It has a dwarf and compact habit, breaking naturally to its pyramidal form, which makes it very effective for either bedding purposes or pot culture, and is a mass of beautiful golden yellow from midsummer until frost. Pkt. 25 cts.

178. ***Antirrhinum Maximum,*
*Purple King.***

An attractive novelty, the first of a Giant class. It has immense deep purple flowers, characteristically strong and rugged in growth, of great decorative value and should be grown extensively. A wonderful improvement on the Grandiflora type. Pkt. 25 cts.

190. ***Antirrhinum Intermediate, Salmon Queen.***

This new variety is a beautiful salmon-rose color of the semi-dwarf strain and one of the best offered this season. We are fully satisfied that it will give satisfaction to any of our customers who may grow it. Pkt. 25 cts.

1581. ***Cardinal Climber (Ipomea Hybrida).***

Considered the most beautiful and distinct type of annual climber introduced in many years. It is the result of a cross between *Ipomea Quamoclit* and *Ipomea Coccinea*. Strong and rapid grower, attaining the height of 30 feet or more with attractive foliage covered with a blaze of bright cardinal red flowers from July till frost, which are 1½ inches in diameter, borne in clusters of 7 or 8. It delights in a warm sunny location and good soil. Sow seed indoors in April and transplant outdoors when danger of frost is past, or sow seed outdoors about May 15th where plants are wanted to bloom. Pkt. 25 cts.

Dimorphotheca Aurantiaca.

Breck's Celosia, Crimson Plume.

1103. ***Dimorphotheca*
*Aurantiaca.***

A rare and exceedingly rich flowering annual of very easy culture. The plants of neat, branching habit, grow from about 12 to 15 inches high and produce Marguerite-like blossoms 3 inches in diameter, of a wonderful dark gold orange color which is rendered more conspicuous by the dark-colored disc in the centre. Pkt. 25 cts.

486. ***Begonia Gracilis*
*Bonfire.***

A vigorous growing new bedding *Begonia* about 12 to 15 inches high with flowers of brilliant carmine scarlet showing prominent yellow stamens. Foliage, satiny brownish red, making a very attractive plant. Pkt. 50 cts.

See Special Offers on third page of cover.

Chrysanthemum Leucanthemum Secundum.

967. ***Cyclamen Persicum*
*Giganteum Lemania.***

The Lemania Cyclamen will certainly rank as the most remarkable novelty of 1913, and cannot be compared with any other variety now in existence. It produces erect growing flat flowers on good sturdy stems, the petals, which are mostly waved and fringed, lending the flowers an elegant appearance; color is mostly white with dark eye, but clear red and many other colors may also be found, and apart from the variation in flowers, grows quite normal and forms a luxurious growth to set off the flowers. Pkt. 50 cts.

783. ***Cineraria Hybrida Matador.***

Into the rich display of colors which Cineraria possesses, this variety Matador has brought quite a new coloration by its unrivalled splendour of brilliant scarlet shades, hitherto unknown in Cineraria. Its brilliant color enriches the display of colors by a shade so valuable at the time of the year when these plants flower. Pkt. 50 cts.

1253. ***Gaillardia Lorenziana,*
"The Bride."**

The annual Gaillardias have always been very popular. "The Bride" will be a valuable acquisition. The flower is white, very double, and is borne on a very long stalk, making it an ideal plant either for bedding or for cut flowers. Pkt. 25 cts.

1104. ***Dimorphotheca*
*Aurantiaca Hybrids.***

These new and selected Hybrids are like the parent *Dimorphotheca Aurantiaca* in habit and growth, only they vary in color from pure white to reddish and bluish-white tints, sulphur and golden-yellow shades, salmon and rose shades, and many other pleasing and remarkable shadings are frequent, and enhance the beauty of these new Hybrids. We strongly recommend this novelty, for we cannot have too many flowers that are easily raised from seed. Pkt. 25 cts.

1108. ***Dimorphotheca Sinuata.***

Equally useful and of the same easy culture as the *Dimorphotheca Aurantiaca*. This new variety distinguishes itself by the pretty color of its flowers, which are a clear satiny buff set with a bluish disk; when fully opened, the reverse of the petal is a purplish red. This rare coloring is distinct and new, the foliage is light green, obtuse, sinuaty, a novelty of great merit. Pkt. 25 cts.

782. ***Chrysanthemum*
Leucanthemum Secundum.
*June Marguerite.***

This large flowering hardy Marguerite succeeds in bloom the Marguerite which blossoms in May and June; it is therefore second in time of flowering. It grows to a height of three feet and produces large, long-stemmed flowers, with loose ray florets, it is highly recommended for cutting, and is of easy culture. Sow seed in March indoors and transplant when danger of frost is over. Pkt. 25 cts.

Cyclamen Persicum Giganteum Lemania.

See Special Offers on third page of cover.

Begonia "Alice Manning."

A magnificent variety of these well known plants. The flower is pale yellow, and measures three inches in diameter. On the same plant are both single and semi-double blooms. It is very free flowering.

Its lovely foliage is not its least attraction; it is velvety, and of a delicate pea-green color edged with crimson.

The flowers are drooping in habit, excellent for hanging baskets, window boxes and conservatories.

Start the bulbs in shallow boxes or pans, from the middle of April until the end of May in a temperature not less than fifty-five to sixty-five degrees. Keep the soil moderately moist. \$1.00 each; \$10.00 per doz.

BEGONIA DOUBLE FRILLED. In separate colors white, rose, orange, salmon, pink, yellow and dark red. 10 cts. each, \$1.00 per doz.

BEGONIA COUNT ZEPPELIN. Intense scarlet, 8 to 10 inches in height, with full double flowers 1½ inches across. Blossoms from July until frost. 20 cts. each, \$2.00 per doz.

BEGONIA LAFAYETTE. Brilliant scarlet, with size and habit same as Count Zeppelin. 20 cts. each, \$2.00 per doz.

BEGONIA MARMORATA (*striped and flaked*). Good form and free flowering. Single Flowered, 10c. each, \$1.00 per doz.; Double Flowered, 15c. each, \$1.50 per doz.

BEGONIA CRISPA FIMBRIATA. Beautifully formed and fimbriated flowers in many different shades. Single, 10c. each, \$1.00 per doz.; Double, 15c. each, \$1.50 per doz.

Begonia, "Alice Manning"

Breck's Choice Gladiolus.

Gladioli, in all their many magnificent varieties, deserve to be grown in every garden. They are of easy culture, will grow in any garden soil, and are valuable for cut flowers. The following list embraces the newest and hand-somest shades of color.

Varieties marked with an asterisk (*) are particularly fine for forcing.

***AMERICA.** A most charming soft delicate pink, tinted lavender. Large flowers on a strong spike. \$1.00 per doz., \$6.50 per 100.

ATTRACTION. Deep rich crimson with beautiful white throat. \$1.00 per doz., \$6.00 per 100.

BARON HULOT (Blue Jay). The best blue variety. Very dark, violet-blue, with well opened flowers. \$2.00 per doz., \$15.00 per hundred.

***DAWN.** A most beautiful shell-pink, slightly penciled in throat. A very fine variety and a great favorite as a cut flower. \$2.00 per doz., \$15.00 per hundred.

EUGENE SCRIBE. Soft tender rose, blazed with carmine red. \$1.00 per doz., \$6.00 per 100.

***JEAN DIEULAFOY.** One of the most pleasing of the light varieties. Soft cream color, with carmine blotch. \$2.00 per doz., \$15.00 per hundred.

MRS. FRANCIS KING (The Original). A most beautiful flame pink. Immense flowers on a spike growing 4 feet high, with from 18 to 20 flowers, 6 to 8 open at one time. A magnificent variety. \$1.00 per doz., \$6.00 per 100.

PEACE. This is the best white variety ever offered, most striking and attractive; has an erect vigorous habit which is rare in light colors. Peace is rather a late bloomer and if planted at the same time as most sorts will be in best condition when other kinds are done flowering. \$2.00 per doz., \$15.00 per 100.

PRINCESS SANDERSONI. The finest white variety, slightly penciled crimson. Beautiful for the home garden and for commercial use. \$2.00 per doz., \$15.00 per 100.

PRINCEPS. Immense wide open flowers of a bright scarlet, marked with white on the lower portion which intensifies the brilliant coloring. \$2.00 per doz., \$15.00 per hundred.

SUNRISE. A beautiful clear canary yellow, with no markings. Long spike of dainty flowers all open at one time. Fine for table or house decoration. \$2.00 per doz., \$15.00 per hundred.

WM. FALCONER. Has a spike of great length and large clear pink flowers. \$1.50 per doz., \$10.00 per 100.

Postpaid—One each of the foregoing twelve varieties for \$1.50; two each, \$2.75; six each, \$7.00; twelve each, \$13.00.

LEMOINE HYBRIDS. Mixed. 40 cts. doz., \$2.00 per 100.

BRECK'S HIGH GRADE MIXTURE. A superb collection, giving a wide range of color of wide opened flowers, beautifully marked and including many of the named varieties. Especially selected as to combination and blending of colors, so that they may be used for cut flowers as well as for massing. \$1.00 per doz., \$5.00 per 100.

See Special Offers on third page of cover.

Primula Fimbriata Giant (Queen Alexandra).

2496. ***Primula Fimbriata Giant.***
Queen Alexandra.

This is the largest Giant White Primula ever raised. It produces blooms $2\frac{1}{4}$ inches across. Petals are very solid and erect; robust foliage with red stems. Very strongly recommended. Pkt. 50 cts.

2493. ***Primula Fimbriata Giant.***
Queen Mary.

This is a variety which will be a decided acquisition to the already fine list of Primula now on the market. Its color is a lovely shade of rose-pink of the finest Giant form. Petals large and of great substance; erect and free flowering. Pkt. 50 cts.

2485. ***Primula Malacoides.***

This variety originated in China and resembles *P. Forbesii*, but is a great deal larger, the flowers measuring three-fourths of an inch across are borne on stems which are graceful and strong. They are a beautiful light lilac in color, and if grown under glass can be flowered in five months from sowing. Pkt. 50 cts.

2484. ***Primula Malacoides Alba.***

This new variety, like *Malacoides*, is of free growth, produces white flowers equally as handsome as the lilac type, and will doubtless achieve a similar share of popular favor. If sown in January or February they will flower in June and July; for Winter blooming sow in July and August. Pkt. 50 cts.

2524. ***Primula Obconica***
Multiflora Compacta.

It is not necessary to say a great deal for *Obconica* primroses, as their richness of color and form is increasing from year to year. This variety, *Multiflora Compacta*, grows compact, and excels with an abundance of flowers, which surpasses any other variety of this type. Its large delicate pink flowers show up to advantage against beautiful foliage, which adds to its charm. Pkt. 50 cts.

2525. ***Primula Obconica***
Fimbriata Oculata.

The large, regular and profusely fringed flowers of this new Primula are decidedly beautiful and will prove a favorite with all lovers of Primulas. The flowers are quite distinct from other varieties of the Primula family, bearing bright yellowish-brown eye on a lilac-pink ground; the plants grow regularly and bring forth a profusion of well developed blossoms; a splendid market variety, and especially recommended for decoration. Pkt. 50 cts.

Primula Obconica Fimbriata Oculata

See Special Offers on third page of Cover.

Poppy, Shirley "Picotee"

**African Marigold, Sunburst.
(Breck's Perfection Strain.)**

Our strain represents many years of careful selection, and is the finest in cultivation. It produces large, globular, double flowers, measuring 4 to 5 inches in diameter, and for habit of growth and purity of color are unsurpassed. When planted in the garden they will make a grand display of glittering yellow, blooming far into the autumn.

2950. Lemon Yellow, pkt. 10 cts., $\frac{1}{4}$ oz. 50 cts.

2852. Deep Orange, pkt. 10 cts., $\frac{1}{4}$ oz. 50 cts.

2339.

**Petunia Hybrida Superbissima
"Nana."**

A variety of Petunia growing about 15 inches high, and in a compact form. Flowers large and substantial with wonderful rich and varied colorings and markings. Highly desirable. Pkt. 25 cts.

2999.

**Tithonia Speciosa Vermillion.
(Heliantha Speciosa.)**

A fine plant for the border or massed effects, flowering continuously for a long period. Flowers Vermillion, about 5 inches in diameter, under petals bright yellow. Pkt. 25 cts.

3411.

Viscaria Oculata Azurea.

A very attractive variety of the popular hardy Viscaria plants, grow about 18 inches high and flower continuously during the whole season. Flowers are a clear azure blue $1\frac{1}{2}$ inches in diameter and very suitable for cutting. Pkt. 25 cts.

2171. **Poppy, Shirley
"Picotee."**

A charming variety of the popular Shirley Poppies. The "Picotee" is a magnificent flower, being very large and particularly showy. It is a beautiful white with well-defined carmine edge. A great favorite for cutting. Pkt. 25 cts.

1990.

**Breck's Colossal
Sweet Mignonette.**

The finest of all the Giant varieties. The flower spikes are of immense size, very fragrant and rich reddish green in color. Excellent for forcing or outdoor culture. Pkt. 25 cts.; $\frac{1}{4}$ oz. \$1.50.

2081.

**Nemesia Hybrida
"Blue Gem."**

This fine variety of the dwarf and compact form of Nemesia is a real "Gem," both in color and habit of plant. Flowers are a beautiful forget-me-not blue. Very effective for beds and borders. Pkt. 25 cts.

2173.

Virginian Poppy.

This new, large flowering, single poppy of the annual class produces beautiful large white flowers, with soft, pink fringe on the edges, especially fine for cut flowers, as they last well before shedding. Planted in beds, they make a lovely display. Pkt. 15 cts.

Petunia Hybrida Superbissima "Nana"

Schizanthus Wisetonensis.

2733.

Excelsior.

This new variety is described as a mammoth-flowered strain of Wisetonensis and with markings and colorings found in fancy Pelargoniums. The flowers have white, buff, or rose ground. A grand acquisition, and unsurpassed for pot culture. Pkt. 50 cts.

Stock Large Flowering Winter.

2866.

White Lady.

White Lady is the first of an entirely new strain of Stocks for winter flowering. Its parent is Empress Elizabeth and this variety is in every respect superior to its parent and produces strikingly large and very double snowy white flowers about 20 inches high. It will produce 60 to 65 per cent double flowers and certainly surpasses all other white stocks. Pkt. 25 cts.

Breck's Imperial Stocks.

This new and very excellent class of ten week Stocks will prove a great favorite, being extremely early, showing unusually large pyramidal flower heads and very double.

1913

Novelties and Vegetable Seeds of Special Merit

BRECK'S ROUND POD BOUNTIFUL WAX BUSH BEANS.

The most prolific Wax Bean yet introduced. It is exceptionally early, tender, and stringless in all stages of development.

The pods are round and often grow to seven inches in length; in color it is a light golden yellow. This fine flavored bean was introduced by Mr. W. H. E. Smith, of Beverly, after years of expert selection and cultivation.

Our stock this year is very limited, therefore we can offer the seed in 5-ounce packages only. Price 25 cts. each.

COPENHAGEN MARKET CABBAGE.

The earliest of all ball-shaped cabbage. Introduced in 1910 by a well-known cabbage grower in Denmark; the heads are remarkably solid, small cones, average weight about 10 lbs., although heads of 16 lbs. are quite frequent. Pkt., 10 cts.; ounce, 75 cts.

All seeds we offer are carefully tested for purity and germination before being shipped. Our seed trial grounds, conducted by the Breck-Robinson Nursery Co., Munroe Station, Lexington, Mass., make careful field tests, and our customers are cordially invited to carefully examine same during the growing season.

See Special Offers on third page of cover.

Breck's "Tewksbury Dwarf Horticultural Bean."

Bright crimson-podded bean, enormously productive, will not rust nor spot. The pods are long and inclined to curve.

One of the characteristics of this bean is the growth of shooting tendrils on the vine, which gives it the appearance of a pole bean. Another is the presence, in its dry state, of an occasional yellow-tinted bean in the same pod with the striped beans.

This bean is a great favorite with market gardeners, because it is more prolific than most beans, and commands a higher price in the market.

Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.

Crackerjack Wax Bush Beans.

This bean is considered an improvement over Wardwell's Kidney Wax, fully as early as Wardwell's. Beans somewhat larger, rounder and thicker fleshed, and holding shape and color (which is a rich golden yellow, after picking), better than other wax beans. The vines are strong and stocky, holding the beans in large clusters well up off the ground.

For several years Crackerjack Wax has been grown for the market in Connecticut and further west and we recommend that the market gardeners around Boston give it a most thorough trial. Pkt. 15 cts., pt. 25 cts., qt. 40 cts., pk. \$2.50.

Brussels Sprouts, Amager Market.

A strain specially recommended for Market Garden use, as it grows about 3 feet high. Stocks large, thick and close pointed; sprouts set very thickly on the stock and develop uniformly. Excellent keeper. Pkt. 10 cts., oz. 30 cts.

Breck's Special Strain of Danish Ball-Head Cabbage.

This famous Denmark variety is absolutely unequalled for its great solidity and fine keeping qualities. The heads are nearly round in shape, very hard and firm, and keep in finest condition when buried through the winter. The seed we offer is imported by us from a leading grower in Denmark. Pkt. 10 cts., oz. 35 cts., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00.

Breck's Market Garden Danvers Half-Long Carrot.

The seed we offer of this popular variety is of superior quality and carefully selected from the choicest stock. The carrot is of a rich dark orange color, very smooth and handsome, and from its length is easier to dig than the longer varieties. Pkt. 10 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.50, 1 lb. \$5.00.

Breck's "Tewksbury Dwarf Horticultural Bean."

***Arlington Grown Crosby's
Egyptian Beet.***

A very special strain of this well known variety, selected with great care as to shape and color; very desirable for market gardeners owing to its extreme earliness. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.50.

***Barker's Strain Edmands
Blood Beet.***

A superior strain of Edmands Blood Beet, of splendid shape, uniform in size and of a dark red color. Its flesh is of exquisite tenderness and is free from any stringy or woody characteristics. The color is very deep crimson and is ringed or marked in a beautiful manner, making it very attractive when sliced for the table. Can be sown as late as July 20th with good results.

Customers wishing an early and finely flavored beet should include some of this seed in their order. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

Arlington Grown Crosby's Egyptian Beet.

Melon, Breck's Forcing Wonder.

We believe this to be one of the best greenhouse melons yet introduced. Fruit is large, with elegant netted yellow skin; flesh pure white, very deep and with excellent flavor. Pkg. 50 cts.

See Special Offers on third page of cover.

Mondamin Corn

Breck's Mondamin Corn.

A Yellow Flint Sort. Our stock grown in the immediate vicinity of Boston under expert supervision. Although we have been offering this variety for some seven years, have never been able to get enough seed to supply all our customers during any one season. Mondamin Corn is exceptionally well adapted to New England conditions, from the fact that it will ripen in an average season within 100 days from planting.

This is an eight-rowed variety; kernels large, and the ears (many of them 15 inches long) are filled out to the very tips, as the illustration will show. Corn stalks firm and solid; much larger than the common run of Flint sorts that we find growing upon New England farms. Under average conditions and without a great amount of fertilizer we have seen stalks of Mondamin Corn averaging nine feet in height, standing in the field, the stalks alone fully as valuable to the farmer for fodder or ensilage as a crop of ripened corn. Under good tillage, from 18 to 20 tons per acre of fodder positively has more food value (shown by actual test), than some of the mammoth varieties, producing from 25 to 28 tons of fodder per acre.

It has been demonstrated by able Agriculturalists that the silo is not at its highest state of efficiency unless filled with a highly concentrated food; this we have in Mondamin Corn.

We have secured this year a large stock of exceptionally fine seed, grown under the personal direction of Mr. C. R. Goodhue, Superintendent of Worlds End Farm, Hingham, Mass.

Qt. 25 cts.; pk. \$1.25; bu. \$4.00; selected ears 10 cts. each.

I planted a two-acre field of "Mondamin Corn" last year, and it was the finest variety that I ever grew; excellent for ensilage. The seed was planted June 2, and matured for ensilage September 20 to 25, the corn maturing in 108 days.

E. WENTWORTH, East Hiram, Maine.

Brewer's Yellow Dent.

An early dent variety bred in Connecticut, and can be successfully grown for grain in Southern New England. Recommended for Connecticut and Rhode Island; also valuable for fodder and ensilage; ears and stalk larger than either Leaming or Mastadon; seed we offer is Connecticut grown. **Qt. 15 cts.; pk. 75 cts.; bu. \$2.75.**

Use Mape's Corn Manure, 400 to 600 lbs. per acre, and get results from your corn field.

Breck's Mayflower Pea.

Breck's Mayflower Pea.

An extra early wrinkled variety which we have for the first time been able to get in sufficient quantity from originator to enable us to offer our customers a very limited stock. Vines nearly 20 inches in height bearing great quantities of large well filled pods, usually nine peas to a pod. Color of both vines and peas deep rich green. A splendid variety for canning and bound to displace in popular favor both American Wonder and Premium Green sorts. Pkt. 15 cts.; pt. 30 cts.; qt. 50 cts.; pk. \$3.00.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:

Vegetable and Flower Seeds at the package, ounce, $\frac{1}{4}$ pound, $\frac{1}{2}$ pound and 1 pound prices.

Bulbs at the single and dozen rates.

Books and other publications.

Breck's Old Glory Pea.

(Awarded first prize Mass. Horticultural Society.)

An extra early smooth sort, which can be planted in the Spring as soon as ground can be worked; earlier and more prolific than the Alaska, with large, well filled pods, on stout vines growing about 30 inches high, very popular sort with the market gardener, as no other sort will bring such returns for a small investment. It has been growing in popular favor year by year, since we first put it on the market 10 years ago; per pkt., 15 cts.; pt. 30 cts.; qt. 50 cts.; pk. \$3.00.

Breck's Old Colony Pea.

A large wrinkled variety ten days to two weeks later than Breck's Mayflower. Vines 20 to 25 inches in height. Pods large, holding seven and sometimes eight big peas to a pod. Pkt. 15 cts.; pt. 30 cts.; qt. 50 cts.; pk. \$3.00.

Little Marvel Pea.

A variety of recent introduction, quite similar to Nott's Excelsior. Vines about 15 inches high, very heavy cropper; pods in pairs, about three inches in length, six or seven peas to a pod, of fine quality, and color deep green. 30 cts. pt.; 50 cts. qt.; \$3.50 pk.

Breck's Old Colony Pea.

See Special Offers on third page of cover.

Breck's Pride Potato.

An early white oblong variety, earlier than the Irish Cobbler and yielding more per acre; uniform size and a profitable early market variety. The stock we offer this year has been grown for us under contract near Presque Isle, Aroostook County, Maine. Great care has been taken to have our seed stock grown on high dry land, to insure its being perfectly free from rot, rust or any other potato disease. Last year we could get but little of this stock (just enough to put out a few trial lots), which have proved highly satisfactory.

Pk. 75 cts.; Bu. \$2.50; Sack of 165 lbs. \$5.00.

Breck's Perfection Radish.

A very superior variety, almost globe shaped, the white tip extending nearly half way up the root; the top a brilliant red shows up in strong contrast with the white; crisp, tender and not at all strong.

Pkt. 5 cts.; Oz. 10 cts.; 1/4 lb. 25 cts.

Breck's Yellow Globe Danvers Onion.

The strain we here offer is home grown and has been brought to the highest state of excellence by continued selection and care in growing. There is more of it sown by the leading onion growers of New England, who know what the market wants and what brings the highest prices, than all other special strains combined. We will take pleasure in furnishing to interested persons the names of a sufficient number of these leading growers, who plant Breck's Yellow Globe, to convince them of the fact.

Pkt. 10 cts.; Oz. 30 cts.; 1/4 lb. \$1.00; Lb. \$3.00.

***New Rust-Proof Giant
Asparagus Roots***

Have been thoroughly tested and proved to be perfectly *immune from rust*. It produces a large yield, and in quality it is second to none. It was this past season in big demand in the Boston market, where it sold for \$7.00 per bushel, when other varieties sold for \$3.50 to \$5.00 per bushel. We offer this season strong 2-year old roots.

Doz. 50 cts; 100, \$2.00; 1000, \$15.00.

Zucca da Pergola.

When young, this furnishes quite an excellent dish, a great favorite with the Italians. Cut into pieces of about 3 inches long, take out the seeds, stuff with chopped meat and boil. It grows quickly and produces fruits which are narrow and grow to a length of 3 to 4 feet. Give vines a good trellis, pergola or lattice work to climb on.

Pkt. 10 cts.

Rust-Proof Giant Asparagus.

Harrison's Forcing Prolific Tomato.

This choice variety has been developed under the expert care and selection of David Harrison of Staatsburg, New York, from a seedling picked up from the greenhouse bench, where three other varieties were growing, and is especially good for growing under glass. The fruit is larger than the common run of greenhouse Tomatoes. Plants grow rapidly after getting well established, and the fruit matures early without splitting; smooth, good sized, and of a most beautiful color; a heavier cropper than any other greenhouse Tomato yet offered.

Pkt. 25 cts; Oz. \$2.50.

BRECK'S

--HIGH GRADE--

VEGETABLE

SEEDS

HIS IS OUR NINETIETH ANNUAL CATALOGUE. We believe our knowledge and reputation acquired through all these years is of value. We have built up through experience and integrity a business that in this country stands second to none in reliability and only one or two in volume. Our Golden Roll of Honor shows that we are both able and willing to satisfactorily serve the gardening and farming public, else we would not be privileged to retain these gentlemen as customers for such periods of years. We always consider our goods our best recommendation; and they continually bring us new patrons. If you have not had experience with our goods, or methods of doing business, surely some of your neighbors can tell you of them. If you desire "*the best*," inquire, and if results warrant it, send us a trial order and you will be satisfied.

Prices may vary as the season advances. Ours will always be as low as the lowest for goods of equal quality.

Where orders are accompanied by cash we Deliver Free to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:

Vegetable and Flower Seeds at the pkt., oz., $\frac{1}{4}$ lb., $\frac{1}{2}$ lb. and 1 lb. prices. Bulbs at the single and dozen rates. Books and other publications. If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

Artichoke.

German, *Artischoke*.—French, *Artichaut*.—Spanish, *Alcachofa*.

Culture.—A rich sandy loam is desirable, but any soil made fine by deep culture, and enriched with plenty of well-rotted manure, will answer. Sow seed in hot-bed early in spring, in rows six inches apart; transplant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, two feet between the plants and three feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection until the cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second summer. One ounce of seed will sow 30 feet of drill.

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Large Green Globe. The best and most popular sort	\$0.10	\$0.35	\$1.00
Early Purple, or Violet10	.35	1.10

Jerusalem Artichoke.

A species of sunflower (*Helianthus tuberosus*). A tuber that thrives well upon light dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an acre. Qt. 25 cts.; pk. \$1.00 net.

Asparagus.

German, *Spargel*.—French, *Asperge*.—Spanish, *Esparragos*.
(For price on Asparagus Roots, see Vegetable Plants.)

An asparagus bed may be made from one or two year old roots, planted in April and May, or in October. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly two feet. Plant the roots in rows four feet apart, leaving about 12 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow. Every fall a liberal dressing of coarse manure should be spread after the tops have been cut, and in spring forked in. The second season after planting the bed may be cut two or three times. Do not cut too closely, as the roots require the benefit of some foliage. Seed may be sown in April in drills one inch deep and one foot apart. One ounce of seed will sow 60 feet of drill.

Hub Asparagus

Beans—English.German, *Grosse Bohnen*.—French, *Fève de Marais*.—Spanish, *Haba*.

Plant as early in spring as the ground can be worked. The rows should be three feet apart; set the seed in the rows six inches deep, four inches apart. As the pods get formed, top the plants, thereby preventing too much running to vine.

Broad Windsor. The best variety for general use. Pkt. 10 cts.; qt. 35 cts.; pk. \$2.00.

Beans—Dwarf or Bush.German, *Bohne*.—French, *Haricot*.—Spanish, *Frijoleno*.

To afford a regular succession of crops throughout the season, plant every two weeks, from about the beginning of May to the end of summer; but not until the soil becomes warm, as they are very sensitive to cold. Plant in rows 18 inches apart, two inches deep; cultivate frequently, but only when dry, as the scattering of earth on the foliage or pods, when moist, will cause them to become damaged with rust. One quart will plant 100 feet of drill.

Green Podded Varieties.

We supply packets of Beans at 10 cents each.

Golden Wax Beans.**

BEANS—Pole or Running.

German, *Stangen Bohne*.—French, *Haricots à Rames*.—Spanish, *Jidas*.

It is desirable to make the planting of Pole Beans at least a week later than the first planting of the bush sorts, as they are more tender. Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the centre for the pole. A liberal quantity of well composted manure in each hill is of value.

One quart of *Limas* will plant 100 hills. One quart of the smaller seeded sorts about 200 hills.

Beans—Green Podded Varieties.

We supply packets of Beans at 10 cents each.

Breck's Beats All Beet.

Swiss Chard, or Sea Kale Beet. This variety is cultivated solely for its leaves. The midrib is stewed and served as asparagus, the other portion of the leaves being used as spinach

Beet. For greens

BEET.

German, *Runkel Rubc*.—French, *Betterave*.—Spanish, *Beteraga*.

Sow from April to beginning of July, in deep rich sandy loam, one inch deep, in drills about a foot apart. Thin the young plants to a distance of six or eight inches, and fill up vacant places with those taken out. The turnip rooted are the earliest, and are of fine quality. When young, the leaves make excellent greens. One ounce will sow 50 feet of drill, 5 to 6 lbs. per acre.

	Pkt.	Oz.	¼ lb.	Lb.

Yellow French Sugar. Fine sort for stock05	.10	.20	.60

Long Yellow Mangel.

Breck's Imperial Sugar Beet.

See Special Offers on third page of cover.

Borage.

The young leaves of this annual are used as a salad or boiled like spinach. Sow in the spring, in light soil, and thin out to eight inches apart. The flowers are a pretty blue and afford excellent food for bees throughout a long season. Borage, pkt. 5 cts.; oz. 20 cts.

Borecole or Kale.

German, *Blatterkohl*.—French, *Chou Vert*.—Spanish, *Breton*.

Sow early in the spring in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. The Siberian variety is also sown in September for early greens. *One ounce will sow 150 feet drill.*

Dwarf Green Curled Scotch. Leaves of a bright green and very tender and closely curled. The quality is improved if the plants are touched by frost before being used. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Dwarf Brown. Similar to the preceding but of darker color, very hardy. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Siberian or German Greens. Sown in fall for spring use. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts.

Tall Green Curled Scotch. Similar to the dwarf, but of more vigorous growth. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

**Green Curled Scotch Kale.****Broccoli.**

German, *Spargelkohl*.—French, *Chou Brocoli*.—Spanish, *Broculi*.

This vegetable closely resembles the cauliflower, but is hardier. Like cabbage and cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. The seed should be sown at the same time and the plants receive the same general culture as cabbage. Broccoli completes its growth from seed in from 120 to 140 days. Five to ten degrees of frost will not injure the plants when they are approaching maturity. *One ounce of seed will produce about 1500 plants.*

Early Purple Cape. Hardy, heads of medium size and compact formation

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Veitch's. Self-protecting, large, compact head	.10	.35	1.25
White Cape. Like Purple Cape, but of a creamy white color	.10	.35	1.25

**Paris Market Brussels Sprouts.**

in the same way as cauliflower. Seed should be sown about the middle of May in a seed bed, and the plants afterwards set out in rows two feet apart and cultivated like cabbage. Being small and hard, the sprouts are not in the least affected by frost. *One ounce of seed produces about 1,200 plants.*

Improved Paris Market. A most desirable strain. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. \$1.00.

Dalkeith. The finest variety. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. \$1.00.

Amager Market. Largest sort, grows 3 ft. high, sprouts close set and develop uniformly. Pkt. 10 cts.; oz. 30 cts.

Chervil.

German, *Gartenkerbel*.—French, *Corfeuil*.—Spanish, *Cerafolio de Cafe*.

Chervil, Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly, in May, in drills half inch deep, one foot apart. 5 cts. per pkt.; 10 cts. per oz.; \$1.00 per lb.

Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. 5 cts. per pkt.; 20 cts. per oz.; \$1.50 per lb.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—
Vegetable and Flower Seeds at the package, ounce, $\frac{1}{4}$ pound, $\frac{1}{2}$ pound and 1 pound prices.
Bulbs at the single and dozen rates.
Books and other publications.

If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

BRECK'S WHITE BOUQUET CAULIFLOWER.

Cauliflower.

German, *Blumenkohl*.—French, *Chou-fleur*.—Spanish, *Coliflor*. (Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious of the Cabbage family. For the production of the cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the very early variety should be sown in a hot-bed in February or March and set out by the end of April. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about 2½ feet apart, and 18 inches between the plants. Transplanting should be done in damp weather. To destroy the cauliflower-maggot, try one ounce of sulphuret of potassium dissolved in one gallon of water. Heat the liquid to about 100 degrees, and apply a tablespoonful to the stalk of the plant just above the ground. *One ounce of seed produces about 2,500 plants.*

	Pkt.	Oz.	¼ lb.
Breck's White Bouquet. This we believe is the earliest and most reliable cauliflower for New England. Since its introduction it has become an especial favorite with market gardeners	\$0.25	\$4.00	\$12.50
Early Dwarf Danish. A variety of the Erfurt from Denmark. It matures evenly and is a reliable header	.20	3.00	10.00
Earliest Dwarf Erfurt. A very choice strain of the well-known Erfurt cauliflower	.20	3.00	10.00
Extra Early Paris. An old but still popular sort	.10	.75	2.00
Early Snowball. A reliable early variety, grown largely for market	.20	3.00	10.00
Early London. Large and hardy	.10	.60	2.00
Half Early Paris. A general favorite, quite large	.10	.75	2.00
Veitch's Autumn Giant. A desirable large, late variety	.10	.35	1.00

See Special Offers on third page of cover.

Carrots.German, *Mohre*.—French, *Carotte*.—Spanish, *Zanahoria*.**Danvers Half Long Carrot.**

Carrots are grown largely both for feeding to stock and culinary purposes; the long varieties used for the former, the "Horn" and medium sorts for the latter. The "Horn" sorts can be grown on thin soil and are mostly for early use. The others prefer deep, sandy loam that was well manured the previous year for some other crop, such as potatoes or onions. Sow in April or May or for late crops for table use, up to the end of June, about one inch deep in drills 15 inches apart for garden sorts. The rows in field cultivation should be two feet apart. Thin out the plants from three to eight inches apart, according to variety. One ounce of seed is sufficient for 100 feet of drill, four pounds to an acre.

	Pkt.	Oz.	¼ lb.	Lb.
Chantenay. A type of Danvers Half-Long, but earlier and smaller	\$0.10	\$0.25	\$0.80	\$2.75
Danvers Half-Long. The most desirable main crop variety; an excellent keeper10	.30	.80	2.75

Early Scarlet Horn. A medium-sized half-long variety of fine color10	.30	.80	2.75
Guerande, or Oxheart. Intermediate between half-long and Horn sorts10	.25	.80	2.75
Half-Long Scarlet Carentan. Stump rooted, coreless, red flesh10	.25	.80	2.75
Nantes Stump Root. A medium-size, medium-early table variety10	.25	.75	2.75
Long Orange Improved. A large long-rooted variety, suitable for table or stock10	.20	.60	2.00
Large Yellow. A desirable variety for feeding to stock05	.20	.50	1.00
Large White. The largest and most profitable for feeding to stock05	.20	.50	1.00

Cardoon.German, *Kardon*.—French, *Cardon*.—Spanish, *Cardo Hortense*.

Cardoon is grown for the midrib of the leaf, which requires to be blanched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart, and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

	Pkt.	Oz.	Lb.
Large Smooth Spanish. Grows about four feet high	\$0.05	\$0.20	\$2.00

Chicory.German, *Cichorie*.—French, *Chicorée*.—Spanish, *Achivoria de Cafe*.

	Pkt.	Oz.	¼ lb.
Large Rooted. Sow and treat in the same manner as carrots. This is the chicory of commerce used to mix with coffee. The roots are taken up, washed, cut in small pieces and carefully dried before being used05	.10	.30
Witloof. Sow in May or June in drills, thin out to six inches apart, treat as <i>Endive</i> until end of summer, when it should be banked up like celery. The blanched stalks are used as a salad. It is also used as a boiled vegetable dressed in the same way as cauliflower05	.10	.35

Collards, or Golewortz.German, *Blatterkohl*.—French, *Chou Cabu*.—Spanish, *Cabu*.

Sow seed as for cabbage, in June, July and August in succession. Transplant when one month old into rows three feet apart and two feet apart in the rows. Is closely allied to the Cabbage family, used as greens; grown largely in sandy sections, particularly in the South. One ounce of seed will produce about 3,000 plants.

Georgia. Per pkt. 5 cents; oz. 10 cents; lb. \$1.00.

Corn Salad, or Fetticus.German, *Lammersalat*.—French, *Mache*.—Spanish, *Macka Valerianilla*.

Used as a salad. It is sown very early in spring, rows one foot apart, and is fit for use in six or eight weeks. For spring use sow in Sept. and winter in cold-frames, or cover with litter. One ounce will sow 100 feet of drill.

Large-Leaved. Per pkt. 5 cts.; oz. 10 cts., lb. 80 cts.

See Special Offers on third page of cover.

Corn—Sweet.

German, *Mais*.—French, *Mais*.—Spanish, *Mais*.

A rich, warm soil is best, especially for the earlier varieties, which ordinarily should not be planted before the middle of May. Successive plantings may be made until July. Plant in hills three or four feet apart each way, according to the height of the variety. *One quart will plant about 200 hills. We supply packets of corn at 10 cts. each.*

Golden Self-Blanching Celery.

Celery.German, *Sellerie*.— French, *Celeri*.— Spanish, *Apio*.

(For price on Celery Plants, see Vegetable Plants.)

Sow seeds the first or second week in April in hot-bed or cold-frame. As soon as the plants have attained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before again transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in pits or cold cellars. Some of the varieties such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. The turnip-rooted variety does not require blanching, and may be planted in rows one foot apart. *One ounce of seed produces about 3000 plants.*

	Pkt.	Oz.	¼ Lb.	Lb.
Breck's Boston Market. The best and most popular sort in cultivation	\$0.10	\$0.60	\$2.00	\$6.00

Celery Seed for Flavoring05	.10	.20	

Cress.German, *Gartex und Brunnen Kresse*.— French, *Cresson*.— Spanish, *Masiuerzo*.

Curled, or Peppergrass. The popular sort. Sow thickly in drills in the spring season, when the ground is in good working order. As the plants rapidly run to seed, repeat sowings at intervals of about two weeks. <i>One ounce will sow about 100 feet of drill</i>05	.10	.25	.80
Upland Cress. A perennial variety, flavor pungent, resembling Water Cress. Sow in drills one foot apart, in April05	.10	.25	.75
Water Cress. This succeeds only in damp soils on the borders of ponds or streams, or where its roots are partially submerged in water. Seed should be sown about a quarter of an inch deep. The plants are rapidly propagated by root extension and self-seeding10	.40	1.25	4.50

See Special Offers on third page of cover.

Cucumber.German, *Gurken*.—French, *Concombre*.—Spanish, *Pepino*.**White Spine Cucumber.**

The first planting should be made early in May on partly spent hot-beds; inverted sods form an excellent medium for both planting on and carrying the young plants to their permanent location, or small paper pots can be used. Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting should be done in the evening, into hills four feet apart each way. Thin out to about four plants to a hill. The seed may be planted in hills late in May, thus giving a succession. For pickles, plant during the last two weeks of June. *One ounce will plant about 50 hills.*

English Frame Varieties.

These are mostly grown by private gardeners. They attain a length of from 12 to 30 inches, and are of fine quality. **Tender and True.** **Blue Gown.** **The Rochford.** Each, per pkt., 25 cts.

Dandelion.German, *Pardeblum*.—French, *Pisse-en-lit*.—Spanish, *Amargon*.

Sow seed in May or June, in drills half an inch deep and 12 inches apart. Cultivate, to keep down the weeds during summer, and the following spring the leaves will be fit to cut. Upon the approach of severe weather cover with litter, which should be removed early the following spring. Dandelion that has been blanched is much more tender and entirely lacks the bitter flavor of the plant matured in the open. The blanching is accomplished by placing two boards inverted V-shape over the rows. *One ounce will sow 200 feet of drill. One pound will sow an acre.*

Lettuce.

German, *Lattich-Salat*.—French, *Laitue*.—Spanish, *Lechuga*. (For price on Lettuce Plants see Vegetable Plants.)

Breck's Black Seeded Tennis Ball Lettuce

The most easily grown of all open-air plants used for salads. It requires a warm soil that has had a liberal dressing of well-rotted manure and abundant moisture. To be of satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants nine inches apart in the rows, and 18 inches between the rows. For successive crops sowing may be made every two weeks up to the end of August. To grow Cos successfully the seed must be sown early in a hot-bed, and when large enough transplanted to a cold-frame in order to have good plants ready to set out when the ground becomes workable. They require tying for a few days when grown, to blanch them. *Breck's Boston Market, Big Boston and Hittinger's Belmont* are varieties especially suitable for growing under glass. *One ounce of seed will produce about 4000 plants.*

All the Year Round. Medium size, firm heads that do not readily run to seed . . .

Mushroom.

German, *Champignon*.—French, *Champignon*.—Spanish, *Hongo*.

(Our special offers do not apply to Mushroom Spawn.)

**Mushrooms.**

until the heat runs up to 100 degrees or over and then declines to 90 degrees; when this point is reached it is ready for spawning, which is done by making holes three or four inches deep and 12 inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of 10 or 12 days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near 60 degrees as possible. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry sprinkle it freely with water at a temperature of about 100 degrees. After the crop has been taken off the bed, it should receive a dressing of fresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. *A brick of English spawn is sufficient for nine square feet of bed.*

Mushroom Spawn. Original English Milltrack, superior to all others. Lb. 15c.; 50 lbs. \$5.00; 100 lbs. \$9.00.

Mushroom Spawn. Genuine French Virgin. Lb. 50 cts.; 100 lbs. \$45.00.

See Special Offers on third page of cover.

Melon (Musk).German, *Melone*. — French, *Melon*. — Spanish, *Melon*.

Melons prefer a warm, light, sandy loam; being tender, plantings should not be made before the middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier crop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed. Slug shot, tobacco dust, coal ashes or dry lime are excellent to sprinkle over the young plants to prevent the attack of insects. *One ounce will plant about 60 hills. Two pounds will plant an acre.*

JOSEPH BRECK & SONS, Boston, Mass.

Dear Sirs:—As one more season has passed I will say in regard to your most excellent and far famed garden and farm seeds that they can't be excelled in this, or in any other country in the world, and as far as germination and productiveness, it seems as though every seed comes and makes a strong plant.

I had a fine garden all from your seeds; my seed trade increases every season and I have several orders now for next Spring.

Wishing you prosperity in the future, I remain, yours,

A. B. Reed, Richmond, Maine.

Okra, or Gumbo.German, *Essbarer*.—French, *Gumbo*.—Spanish, *Quibombo*.

This vegetable is of the easiest culture, and grows freely, bearing abundantly in any ordinary garden soil. Sow early in May, in drills two inches deep, thin out the plants to about three feet apart. *One ounce will sow 40 feet of drill.*

**Breck's Yellow Globe Danvers Onion.****Onion.**German, *Zweibel*.—French, *Oignon*.—Spanish, *Cebolla*.

The onion thrives best in rather strong, deep, loamy soil, which should be well enriched with old well-rotted manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridges during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high, thin to three inches apart. Hoe frequently. Where the hoe cannot be used, the soil should be stirred with the fingers, otherwise weeds will quickly grow up and choke the crop. *One ounce of seed will sow 100 feet drill; four pounds per acre.*

JOSEPH BRECK & SONS, Boston, Mass.

Gentlemen:—Would say regarding the 10 lbs. I ordered last year it grew the best onions which I had on the farm this year without a doubt. Now I wish to order 15 lbs. for next season provided you can give me the same strain of seed as I had this year.

Yours truly,

H. W. MARSH, Bradstreet, Mass.

Parsley.German, *Petersilie*.—French, *Persil*.—Spanish, *Perejil*.

Soak the seeds a few hours in tepid water, and sow early in the spring in drills one foot apart; thin out the plants to three or four inches apart; a single row forms a very good edging for bed or walks. The seed germinates very slowly, and sometimes two or three weeks will elapse before the plants make their appearance. To preserve in winter, transplant to a light cellar or cold-frame. The Turnip-Rooted variety should be thinned out while the plants are quite young, and afterwards treated the same as carrots. One ounce to 150 feet of drill.

	Pkt.	Oz.	¼ lb.	Lb.

Fern-Leaved. Most exquisite in form and coloring	.05	.20	.60	
Hamburg, or Turnip-Rooted. Roots used for flavoring soups	.05	.20	.60	

Parsnip.German, *Pastinake*.—French, *Panais*.—Spanish, *Pastinaca*.

Sow thick in April, in rows 18 inches apart, and one inch deep, in a rich, deep soil, well manured the previous fall, or with fine manure early in March. When the plants are two or three inches high, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a sufficient quantity for winter use, leaving the rest in the ground until spring to be dug up as required. One ounce for 100 feet of drill; five pounds to an acre.

	Pkt.	Oz.	¼ lb.	Lb.
Breck's Market Garden. For flavor, texture of flesh, form, smoothness and as a cropper, this variety is without an equal	\$0.05	\$0.15	\$0.50	\$1.50
Early Round, or Turnip-Rooted. Suitable for shallow soils, a fine cropper and good quality	.05	.15	.35	1.25
Hollow Crown. A standard sort, large and of good flavor	.05	.15	.35	1.25
Long Smooth White. Free from coarse roots, a general favorite	.05	.15	.35	1.25

Pumpkin.German, *Kurbis*.—French, *Courge*.—Spanish, *Calabaza*.

The pumpkin is now little used except for agricultural purposes, the squashes being so much sweeter, drier and finer grained for the kitchen. The farmer however finds the pumpkin a serviceable addition to his feed. The most common and least troublesome method of cultivation is to plant among the corn in hills eight feet apart, four seeds in a hill.

	Pkt.	Oz.	¼ lb.	Lb.
Connecticut Field. Very productive; largely grown for feeding stock	\$0.05	\$0.10	\$0.15	\$0.50

Winter Luxury. A fine pie pumpkin, round, color russet-yellow, flesh thick, fine flavor	.05	.15	.50	
Pumpkin for Medicinal Purposes			.10	.30

See Special Offers on third page of cover

Breck's Selected Strain Gradus Peas.

Peas.

German, *Erbse*.—French, *Pois*.—Spanish, *Chicaros*.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately heavy soil is better. Sow the smooth sorts as early in spring as the ground can be worked, and make successive sowings every ten days, the wrinkled sorts being given the preference as soon as the ground is warmed up. Plantings of the earlier sorts, such as Breck's Excelsior, may be made through July and even up to the 10th day of August with reasonable hope of a crop. Sow in rows, from two to five feet apart, according to the height of the variety. *One quart of peas will sow about 100 feet of drill.*

The seeds of the sorts to which an asterisk (*) is prefixed are wrinkled.

While the past season has been more favorable for the growing of Seed Peas, most varieties are still very scarce and correspondingly high cost. Prices quoted below are subject to change without further notice.

We supply four-ounce packets of Peas at 15 cts. each.

Extra Early Sorts.

	Pt.	Qt.	Pk.
Alaska, or Clipper. A smooth, blue, prolific, sweet, extra early	\$0.20	\$0.35	\$2.25
*Bliss's American Wonder. Well known early wrinkled sort	.25	.40	2.25
Breck's Excelsior. The best extra early for market and private garden	.20	.35	2.25
Breck's Old Glory. Surpasses all early sorts	.30	.50	3.00
*Carter's Premium Gem. Dwarf prolific, green, wrinkled variety of good quality	.25	.40	2.50
Claudit. The most desirable extra early pea introduced to date. The pea is large, deep green in color, and slightly wrinkled. The quality is unsurpassed	.30	.50	3.50
*Carter's Daffodil. Dwarf, extra early, prolific pea. Growth not over 18 inches. Pods long, broad, and of a deep green color	.30	.50	3.50
*Gradus, or Prosperity. The pods are almost as large as those of the Telephone, and are fit to pick three days after Alaska	.30	.50	3.50
Laxtonian. Early dwarf about 18 inches high; usually 9 pods to a vine and about 10 peas to a pod; excellent quality	.30	.50	3.50
Little Marvel. Extra early; superior to Nott's Excelsior; about 15 inches high; dark green pods, growing in pairs; very prolific	.30	.50	3.50
*Nott's Excelsior. Extra early, grows 15 inches high. Superior to American Wonder	.25	.45	3.00
*Sutton's Excelsior. A dwarf extra early, height 15 inches, pods large and well filled, a heavy cropper and of delicious flavor	.30	.45	3.00
*Thomas Laxton. A cross between Gradus and an extra early sort. It is without exception the best early wrinkled sort yet produced. It grows about three feet high	.30	.50	3.50

See page 25 for varieties of special merit.

Second Early Sorts.

*Alderman. Height 4 feet, strong vines, pods large, containing 8 to 10 peas of fine flavor	.30	.50	3.50
*Bliss's Abundance. Strong vines of medium height that bear an enormous number of well-filled pods	.25	.40	3.00
*Bliss's Everbearing. A most desirable main crop variety for the private grower	.30	.50	3.50
Daisy, or Dwarf Telephone. Height 18 inches, large pods like Telephone	.25	.40	3.00
Dwarf Champion Pea. A dwarf form of the Champion of England; very productive	.30	.50	3.50
*Duke of Albany, or American Champion. Larger pods than Telephone, earlier, dwarfier and with little tendency to "sport"	.30	.50	3.50
*McLean's Advancer. A dwarf, green, wrinkled marrow of fine flavor	.25	.40	2.50

See Special Offers on third page of cover.

Peas — Continued.*We supply packets of Peas at 15 cts. each.***General Crop.**

	Pt.	Qt.	Pk.
Admiral Dewey. A splendid large podded variety	\$0.25	\$0.45	\$3.00
Blackeye Marrow. An excellent old-fashioned sort15	.25	1.50
Breck's Improved Telephone. This is a distinct and desirable improvement on the ordinary <i>Telephone</i> . It is the result of careful breeding and selection30	.50	3.50
*Carter's Telephone. A vigorous grower, extra large, well filled pods25	.45	3.00
*Champion of England. The standard late variety, sweet and productive25	.40	3.00
Dwarf White Marrow. An old-fashioned yet popular variety20	.35	2.50
*Pot Latch or Improved Stratagem. Usually produces stalky vines covered with full pods of extra size25	.40	2.50
*Yorkshire Hero. A wrinkled marrow of extra fine quality25	.40	2.50

French Peas.

Petite Pois, "Clamart Hatif." Small sweet popular French variety, a good second early, growing in France 4 to 5 feet high. Pods about 3 inches long, somewhat curved, containing 7 to 9 peas, good bearer	\$0.30	\$0.50	\$3.00
Special prices per bushel quoted on application. For Canada Field and other Forage Peas see Forage Crops.			

Pepper.German, *Pfeffer*.—French, *Piment*.—Spanish, *Pimiento*.

Plant in hotbeds in March, and transplant into the open ground the latter part of May, in rows about 20 inches apart and eight inches apart in the row. Repeated hoeings promote their growth. *One ounce of seed will produce about 2,000 plants.*

	Pkt.	Oz.	¼ lb.
Cayenne, Long Red. The pods of this variety are from 3 to 4 inches in length, cone shaped, and coral red when ripe	\$0.05	\$0.25	\$0.75
Golden Dawn. Shaped like the bell; color, golden yellow10	.30	1.00
Large Bell, or Bull Nose. Fruit large, an early sweet variety05	.25	.75
Chinese Giant. Grows very large and uniform; as early as Ruby King and very mild10	.50	1.75
Neapolitan. Early, large; skin bright red, very mild flavor. Fruit about 4 inches long and 4 to 5 around10	.35	1.00
Red Cherry. Fruit round, very productive and ornamental10	.30	.85
Red Chili. Used for pepper sauce; small narrow pods, about five inches long; fine flavor05	.25	.75
Ruby King. Pods about five inches; fine flavor10	.35	.85
Squash, or Tomato-Shaped. The kind most generally grown for pickling; an excellent sort10	.50	1.75
Sweet Mountain, or Mammoth. Similar in shape to the Large Bell, but of much larger size10	.30	.85

Potatoes.

(Prices subject to market changes.)

Special prices on large quantities quoted on application. Special offers do not apply on potatoes.

Of the many varieties of potatoes that claim public favor, we have selected only a few, and these the best in cultivation. We aim to include in our list only those sorts which we have found by actual test are worthy of cultivation. Orders will be booked as received, and shipped in rotation, after danger of freezing is over; and as potatoes are of a perishable character, we assume no responsibility for damages incurred in transit, but we will, of course, exercise the greatest care to

guard against sudden changes in the temperature. *All the potatoes we offer are grown from selected stock especially for seed purposes. They are calculated to give the best results to planters, and when compared with common stocks will more than pay in increased crop for the small extra cost of seed, while the quality will be better and more uniform. Ten to 12 bushels will plant an acre.*

	Pk.	Bu.	Sack
Breck's Pride. Very early, medium size, white, heavier cropper than Irish Cobbler	\$0.75	\$2.50	\$5.00
Beauty of Hebron. A standard sort, pure white skin and flesh, an excellent cropper60	2.00	4.50
Carman No. 3. A potato with a long pedigree. Try it60	2.00	4.50
Delaware. Medium early, very large, white throughout and extra quality60	2.00	4.50
Early Harvest. Wonderfully early, fine sized tubers60	2.00	4.50

Norcross. Medium early, splendid market sorts, white60	2.00	4.50

Directions for sending goods by Parcel Post will be found on page three of cover.

Rhubarb.

German, *Rhabarber*.— French, *Rhubarbe*.— Spanish, *Rhubarbo Bastardo*.

(For price of Rhubarb Roots see Vegetable plants.)

Sow early in the spring in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

Linnæus. Early, large and tender. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.

Victoria. Very large, later than Linnæus. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.

Radish.

German, *Rettig*, *Radieschen*.— French, *Radis*, *Rave*, *Petit Rave*.— Spanish, *Rabano*.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hotbed in February. For winter radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using. *One ounce of seed will sow 100 feet drill; 10 lbs. per acre.*

See Special Offers on third page of cover.

Squash.German, *Kurbiss*. — French, *Courge* — Spanish, *Calabaza*, *Tontanera*.

As all squashes are somewhat tender, they should not be planted out until danger from frost is past. They will grow on almost any soil, but a warm, mellow one that has been well manured suits them best. The hills for bush varieties should be about four feet apart; for running sorts, eight feet. Thin out to two plants to a hill, and in the early stages of growth keep well sprinkled with plaster dust. *Bush varieties*, one ounce to 40 hills; *running varieties*, one ounce to 20 hills; two to four pounds per acre.

Bush Varieties.

	Pkt.	Oz.	¼ lb.	Lb.
Giant Summer Crookneck. Yellow fruit, large and good	\$0.05	\$0.10	\$0.30	\$1.00

Winter Crookneck. A standard winter sort, of fine quality	.05	.10	.30	1.00

Spinach.German, *Spinat*. — French, *Epinard*. — Spanish, *Espinaca*.

Spinach likes a rich soil, and should be sown for a main crop in August or September. When cold weather sets in, it should be protected from frost by covering it with straw and brush. Sow the seed of New Zealand Spinach (which must be scalded and soaked in hot water before sowing) in hills three feet apart each way, three or four seeds in a hill. This is fit for cutting all summer. *One ounce will sow 50 feet of drill; 12 pounds per acre.*

Salsify, or Oyster Plant.

German, *Boksbart*.—French, *Salsifis*.—Spanish, *Ostra Vegetal*.

Mammoth Sandwich Island Salsify.

directions for growing and keeping are the same as for parsnip. One ounce will sow 50 feet of drill; 10 lbs. to the acre.

Breck's Improved Long White. Roots of medium size, white and smooth	Pkt.	Oz.	¼ lb.	Lb.
	\$0.10	\$0.20	\$0.50	\$1.50
Mammoth Sandwich Island. Twice as large as the preceding, and of fine quality	.10	.20	.50	1.50

The demand for Salsify is increasing from year to year, as its delicious qualities are becoming known. It is used stewed, boiled or fried, and sometimes as a salad sliced raw in vinegar with salt and pepper. When cooked it has an oyster flavor, and is commonly called "Vegetable Oyster." The

Tobacco.

Connecticut Seed Leaf. Best adapted to the climate of the Northern and Middle States	.05	.25	2.00
Havana. Imported seed	.10	.30	3.50

Tomato.

German, *Liebsapfel*.—French, *Tomate*.—Spanish, *Tomate*.

(For Tomato Plants see Vegetable Plants.)

The seeds should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2000 plants.

Breck's Belmont. The best early either for forcing or open ground cultivation, fruit bright scarlet, with few seeds, finely flavored and solid	Pkt.	Oz.	¼ lb.	Lb.
	\$0.10	\$0.35	\$1.00	\$3.50

Strawberry, or Winter Cherry. (<i>Physalis Alkekengi</i> .) The fruit grows in a husk and will keep all winter. It has a pleasant strawberry-like flavor. It is much used for preserving, also for sauce	.10	.40	1.25	
Yellow Cherry. Similar to Red Cherry except in color	.10	.30	1.00	

See Special Offers on third page of cover.

Turnip.German, *Steckrube*.—French, *Navet*.—Spanish, *Navo Comun*.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crop, and early in August for a fall and winter crop. A light soil well manured the previous year is the best; no manure should be applied at the time of sowing, unless it be well decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug or plowed deep and made mellow and fine. Sow the seeds of the flat sorts broadcast, and rake in evenly. After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Baga sorts should be sown in drills 15 inches apart, and for winter use may be sown from the 20th of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop. *One ounce will sow 150 feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast.*

**White Egg Turnip.**

	Pkt.	Oz.	¼ lb.	Lb.

AGRICULTURAL GRAINS.

All grass, grain and clover seeds supplied by us are carefully tested for purity and germination before being offered for sale.
(Prices subject to market change.)

Harvest Time for Breck's King Oats

Breck's King Oats.

This most productive Northern grown oat, which we have grown especially for us for seed purposes is steadily growing in favor with the up-to-date New England farmer. The grain itself is large and plump, straw long, clean, firm and does not lodge readily. Our stock this year is the best we have ever offered, weighing nearly 40 pounds to the measured bushel, and our purity tests show that the seed will average 99% pure with a germination of over 95%, and free from rust or smut. **Per bushel, \$1.25; 5 bushels for \$6.00; 10 bushels for \$11.50; 20 bushels for \$22.50, bags extra.**

JOSEPH BRECK & SONS, Boston, Mass.

Gentlemen:

I had fine success with all the seeds you sent me this year.

Yours truly,

C. D. RUSSELL, Ashland, N. H.

BARLEY.		Per Bush.
Two-Rowed		\$1.60
Four-Rowed		1.50
Success Beardless.	A six-rowed variety that is practically free from the poisonous beard. It is early, hardy, large grained, strong of straw and productive	2.00

Japanese.	Enormously productive	1.75
India Wheat.	Similar to Buckwheat; good cover crop for poor soils in northern latitudes	2.00
OATS.		
Lincoln.	Good American sort	1.00
Wild Rice (<i>Zizania aquatica</i>).	Price quoted on application. Not kept in stock. Seed must be moist when sown.	

RYE.

To prevent disappointment, we offer only selected rye for seed purposes.

Spring . Per bush. \$2.00 **Winter** . . . 1.60

SPRING WHEAT.		Per Bush.
Blue Stem. Beardless.	White, velvet-like chaff and stem just below the head when green, with a beautiful blue bloom which disappears as the wheat ripens. Free from rust, grains hard and of fine milling quality	\$2.00
Fyfe.	A red, beardless wheat, with long smooth heads well covered with chaff; straw stiff, bright colored. Grain very hard, of a dull, reddish color. Very suitable for New England	2.00

WINTER WHEAT.

Dawson's Golden Chaff.	One of the hardiest wheats we know of, heads bald, color of grain white (inclined to light amber), straw of medium length	2.25
Satisfaction.	Heads beardless, white chaff, grain light amber. A strong growing variety with large grains and broad, well filled heads	2.25

See Special Offers on third page of cover.

Field of Breck's True Turkestan Alfalfa, Two Years Old, Growing on World's End Farm, Hingham, Mass.

BRECK'S TRUE TURKESTAN ALFALFA

After many years of careful investigation and field tests of many kinds of Alfalfa seed from different parts of the world, we have found that the seed coming from the high, dry, barren country of Turkestan gives the most satisfactory results in New England, and for that reason we offer no other seed but Turkestan. **Price per lb., 22 cts.; 100 lb. lots, 20 cts. per lb., f. o. b., Boston.**

ALFALFA or LUCERNE (*Medicago Sativa*.)

The greatest forage crop known now being grown with great success in all parts of the world and steadily growing in favor with the intelligent New England farmer, as it is proving to be of the greatest value to him not only as a forage crop, but as a soil improver. It is a legume, taking the free nitrogen from the air and storing it up in the deep growing roots. Alfalfa, as green fodder or cured hay, is relished above all other forage crops by stock.

To grow a good field of Alfalfa, it is important to select deep, loamy, well drained land with loose sub-soil, as standing water will soon kill out the young growing plants. Plow and harrow the land selected thoroughly, and with the first harrowing apply at least one ton Agricultural Lime per acre, thereby correcting any acidity in the soil. Continue to harrow the land at short intervals for some weeks, thereby thoroughly pulverizing the top soil and at the same time working out and killing the old grass roots and weeds that would otherwise get a quick start and choke out the young Alfalfa. If possible, give the ground a fair dressing of barnyard manure, and a short time before sowing the seed harrow in 600 or 800 lbs. per acre of high grade commercial fertilizer. It will also be found a great help if one will inoculate the seed with Farmogerm before sowing; or obtain some soil from an old Alfalfa field and broadcast at the rate of 300 or 400 lbs. per acre.

It has been found that in this latitude seed sown the last of June or early July will escape being hindered by weed growth, and get a good stand before cold weather. Do not cut closely the first season; when the first blooms appear, cut, allow it to wilt, put up in cocks and cure in the cock.

We can furnish soil from old Alfalfa fields for inoculating new land; not carried in stock, shipped direct from fields. Price about \$1.25 per 100 lbs., f. o. b. Boston.

CLOVERS.

Prices variable, subject to market changes.

There are no plants so valuable for fertilizers as the Clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red. (*Trifolium pratense*.) This is the common Red Clover, by far the most important of all varieties for the practical purposes of Agriculture. 60 lbs. to the bushel; price per lb. 25 cts.

Mammoth Pea Vine. (*Trifolium pratense* var.) Of ranker growth than medium red, sometimes grows 5 or 6 feet high; excellent for plowing under and reclaiming exhausted soils. 60 lbs. to the bushel; price per lb., 28 cts.

Alsike or Swedish. (*Trifolium hybridum*.) This is the hardiest of all clovers, resists cold, extreme drought and wet; can be cut several times in a season, and for low land liable to wash it is invaluable, excellent for bees. 60 lbs. to the bushel; price per lb., 30 cts.

White Clover. (*Trifolium repens*.) This should be included in all mixtures for lawns and permanent pastures. It is adapted to all soil and should be sown early in spring. 60 lbs. to the bushel; price per lb., 50 cts.

Crimson Clover. (*Trifolium incarnatum*.) Also known as the Scarlet and Carnation Clover. An annual of rapid growth and great value where only one crop is desired; excellent for a cover crop in orchard or for plowing under to improve poor soils. 60 lbs. to the bushel; price per lb., 15 cts.

Yellow Trefoil. (*Medicago lupulina*.) An annual or biennial suitable for pasture in wet meadows, or stiff clayey soils which are too poor for other clovers. 60 lbs. to the bushel; price per lb., 15 cts.

Bokhara. (*Melilotus alba*.) Will grow on very poor soils. Excellent for plowing under as green manure; valuable for those who have honey bees. 60 lbs. to the bushel; price per lb., 30 cts.

Yellow Sweet Clover. More suitable for turning under than the white variety. Good crop to precede and prepare land for Alfalfa, valuable for bees; grows about 2 feet high. 20 cts. lb., \$15.00 per 100.

BRECK'S SAND OR WINTER VETCH (*VICIA VILLOSA*) AND GOLDEN CHAFF WINTER WHEAT.

(Our Special Offers do not apply on goods under this heading.)

This mixture of a non-legume and a legume is a very desirable spring green fodder. It will produce excellent crops on poor, sandy soils as well as on good land; grows to a height of four to five feet. It is perfectly hardy throughout the United States, and should be sown in the fall. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. If more of the fodder mixture has been produced than can be fed green, the balance may be made into hay.

A Field of Breck's Sand or Winter Vetch and Golden Chaff Winter Wheat growing on Cherry Hill Farm, Beverly, Mass.

Seed for the above field was sown broadcast October 1st, at the rate of three bushels wheat and one-half bushel Vetch to the acre, and was harvested June 15th and produced twelve to fifteen tons green fodder to the acre.

NOTE.—Customers who wish to sow in the spring may use Fyfe spring wheat and spring Vetches (*Vicia Sativa*) in the same proportion per acre.

PRICES (Subject to Market Changes):

Breck's Sand or Winter Vetch, *Vicia Villosa*, 60 lbs. per bu., per bu. \$7.00
Golden Chaff Winter Wheat, 60 lbs. per bu. " 2.00

Joseph Breck & Sons, Boston, Mass.

Gentlemen:—

We have always had good success with the field seeds we have purchased of you; this year we are adding a small order of garden seeds. We are planning to raise quite a little sweet corn and shell beans for the Boston Market, and if we find it pays shall doubtless increase our acreage next year.

Yours truly

Fair View Farm, Marlboro, Mass.

E. D. HOWE & SON.

See Special Offers on third page of cover.

Japanese Barnyard Millet (*Panicum Crus Galli*).

Our Special Offers DO NOT apply on goods under this heading.

Under varying conditions this has given highly satisfactory results in New England, especially for two or three weeks in August for feeding green, also as ensilage and as a hay crop. The seed is being used more and more as a food for poultry; the green forage is tender and highly relished, about equal to the best green fodder corn in nutritive value.

The seed was originally introduced from Japan by Prof. William P. Brooks, Director Massachusetts Agricultural Experiment Station.

To obtain the most satisfactory results, one should select rich and retentive soils. The heaviest crops will usually be obtained from early sowing, planting about the same time that one would usually plant ordinary field corn, although farmers frequently sow it as late as the last of August. In the latitude of Boston, Japanese Millet grows very rapidly during hot weather, and yields of green fodder as high as 12 to 15 tons are not unusual for the season.

Sow at the rate of 25 lbs. per acre broadcast; or if to be planted in drills, 18 inches apart, 15 lbs. of seed to the acre will be sufficient. Per lb. 8 cts.; 100 lbs. 5 cts. per lb.

Southern Cow Peas (*Vigna Catjang*).

Make Poor Land Rich.

Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soil. They should be sown in May or June at the rate of 1½ bushels to the acre, and plowed under as soon as they have attained their full growth. While this crop is very largely grown wherever known, with the results attained from it the wonder is that it is not grown ten times as much as at present. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers. Nitrogen or ammonia in commercial fertilizers is valued at 15 cts. per lb.

Clay, or Wonderful. Has matured in New England. Qt. 20 cts., bush. \$4.00.

New Era. Early and large yielder. Qt. 20 cts., bush. \$4.00.

Southern Black Eye. Immense cropper. Qt. 20 cts., bush. \$4.00.

Whippoorwill. One of the earliest. Qt. 20 cts., bush. \$4.00.

} Prices subject to market changes.

Winter Vetch (*Vicia Villosa*).

Growth and appearance like Spring Vetch.

Valuable in New England as an early spring green forage crop if sown in the average season before September 15, at the rate of 1½ to 2 bushels Winter Wheat or Rye and from ½ to 1 bushel of Vetch. It is especially valuable as a winter cover crop for orchards. Per bushel of 60 lbs., \$7.00 bushel, net. Also see page 52.

Spring Vetch or Tares (*Vicia Sativa*).

Annual, legume, in growth and general appearance very much like common peas. Valuable as a summer forage when sown early in spring on well cultivated and enriched ground at the rate of ½ bushel Vetch and 2 bushels Grain, Barley or Oats per acre. Can also be sown alone at the rate of about 80 lbs. per acre as cover crop for orchard. Weight per bushel 60 lbs.; \$3.00 bushel net, subject to market changes.

Rape—Dwarf Essex, English.

Is easily grown, perfectly hardy and possesses remarkable fattening properties. Under ordinary field conditions the plants reach height of about 4 feet; the roots being strong growing, penetrate the soil to a considerable depth.

Rape is especially adapted to cool, moist conditions, such as prevail in New England, and for its best development requires a loamy soil, moist and rich; ground that has produced good crops of corn, turnips and cabbage will be found very suitable for Rape. Plant seed in New England from May 1 to middle or last of July in average seasons. In preparing the land for the seed, take every care possible to have it free from noxious weeds. Have the ground well pulverized with a harrow, thereby giving a deep, mellow seed bed.

Dwarf Essex Rape will be found to resist summer drought if care is taken to get the plants well started before extreme summer heat may be expected. For sowing in drills, about 10 lbs. of seed per acre is required; broadcast, 15 lbs. per acre. Per lb. 15 cts., per 100 lbs. \$12.00.

See Special Offers on third page of cover.

A Field of Winter Vetch.

MISCELLANEOUS SEEDS. For Forage Crops, Plowing Under, Etc.

Prices subject to market changes.

- Peas, Canada or White Field.** Unsurpassed as a green feed for milch cows. Sow with oats or Barnyard Millet. Broadcast two bushel peas and two bushel oats per acre or eight quarts Barnyard Millet. Pk. 85 cts.; bush \$3.00.
- Broom Corn, Long Brush Evergreen.** Sow 12 quarts per acre, after danger from frost is passed. It succeeds best in a good, deep, moderately moist soil. Lb. 15 cts.; 10 lbs. \$1.00.
- Lupins, Yellow.** This succeeds in the poorest soils, and is very valuable for plowing under to improve sandy soil. It makes good forage, either green or as hay. Sow in spring when the ground has become warm, 90 lbs. to the acre. Lb. 20 cts.; 100 lbs. \$10.00.
- **Blue.** Used for plowing under. Lb. 20 cts.; 100 lbs. \$10.00.
- Millet, Pearl (*Penicillaria spicata*).** A valuable and very productive fodder plant, should not be sown until danger from frost is over. This Millet has frequently been sold at very high prices under the names of *Brazilian Millet* and *Penicillaria Zeaoides*. Drill 18 inches apart, 10 lbs to acre. Lb. 15 cts.; 100 lbs. \$10.00.
- Spurrey (*Spergula arvensis*).** Annual. This plant will grow on land that is too dry and too thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and as hay. It is in condition to pasture sheep or cattle on in about six weeks after sowing, and sowings may be made every month from April to August. Sow broadcast, 20 lbs. per acre. Lb. 15 cts.; 100 lbs. \$10.00.

Soja Beans.

One of the most valuable and important forage and soil-improving crops.

The use of this crop is increasing everywhere. As a forage crop, Soja Beans make a larger growth than cow peas on the same land and can be cut and cured to better advantage. They also furnish a richer feed, containing more oil and fattening properties. Soja Beans supply a large amount of forage rich in protein and hence they are very valuable as a feed for milch cows. Can be cut with corn for the silo and wonderfully improves the quality of the feed.

As a soil-improving crop a great many of our customers think the Soja Bean is fully equal to cow peas. It is certainly one of the best crops to clean land and put it in good condition for succeeding crops.

Yellow Soja. A large-growing, yellow-seeded variety, especially suitable for ensilage and plowing under. Sow at the rate of one bushel per acre. Qt. 20 cts.; pk. \$1.00; bu. \$3.50.

Sorghum.

Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 lbs. per acre.

Early Amber Sugar Cane. Ripens where Indian corn matures. Per lb. 12 cts.; 100 lbs. \$7.00.

Red Kaffir Corn, or Sorghum. Non-saccharine. The plant is low, stocky, perfectly erect. The whole stalk, as well as the blades, cure into excellent fodder, and in all stages of its growth is available for green feed. Per lb. 12 cts.; per 100 lbs. \$7.00.

White Kaffir Corn. Per lb. 12 cts.; per 100 lbs. \$7.00.

White African Sorghum, African Millet, or White Dhoura. Per lb. 12 cts.; per 100 lbs. \$7.00.

Cover and Soiling Crops for Orchards.

One of the most important points in successful orcharding is the intelligent use of proper cover crops, and the orchardists of New England are giving this particular subject more and more careful attention, as the proper use of such crops conserve the nitrates in the soil after the growth of fruit trees is stopped, which would otherwise be washed away by the heavy fall or winter rains. They also help to break up, during time of their growth, the old sod, and later in the season when plowed under, furnish humus for the soil.

We can recommend the following cereals and legumes as the best suited for cover crops under New England climatic conditions:

Winter Rye. Sow at the rate of $1\frac{1}{2}$ to 2 bushels per acre; this can be sown from the middle of August up to the time the ground freezes late in the fall.

Japanese Buckwheat. Sow at the rate of 1 to $1\frac{1}{2}$ bushel per acre. Especially valuable where it can be sown early in spring on newly plowed sod land, as it is very effective in rotting down the old sod and at the same time enriching the soil.

Yellow Soya Beans. $1\frac{1}{2}$ to 2 bushels per acre. These do best if sown in drills about the middle of June and cultivated several times to promote vigorous growth.

Winter Vetch (*Vicia villosa*). If sown alone, use 1 bushel to the acre broadcast. In this latitude it should be sown before September 15th, so that it may get well rooted and established before cold weather. One of the best to cover and protect the ground during the winter.

Crimson Clover. Sow at the rate of 15 to 20 lbs. per acre the last of June or first of July, and plow under early the following spring.

For Prices of Special Mixtures see page 53.

AGRICULTURAL GRASSES.

Prices quoted are subject to market changes, net f. o. b. Boston; bags extra, as per price list on page 3 of cover. Special prices quoted on quantities.

Special attention is called to the fact that by advantageous arrangements with the parties who grow the different seeds for us, we are enabled to make a large reduction in the prices of Permanent Pasture and other Grass Mixtures, without impairing the very high standard of purity and germination that we have always maintained.

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already become an extensive one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the Continent, who by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the *very best*, and that which we know to be *free* from all *adulteration*.

We invite special attention to our "Mixtures" for Permanent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of *Mixtures*, which, we think, cannot fail to be of interest to anyone who is concerned in the laying down of profitable pastures, or who desires to obtain large crops of hay of choice quality from his fields.

Awnless, or Smooth Brome Grass (*Bromus inermis*). An erect growing perennial that attains a height of from three to five feet. It is especially recommended for dry and arid soils where the more delicate grasses will not grow. **Per bushel 12 lbs.; 16 cts. lb., \$14.00 100 lbs.**

Creeping Bent or Firoin (*Agrostis Stolonifera*). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low bottom-lands, especially if they are somewhat sandy. It is rapid of growth and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant trampling. Being of fine texture, it is one of the most valuable of our lawn grasses. **Per bushel, 15 lbs.; 35 cts. lb., \$30.00 100 lbs.**

Meadow Brome Grass (*Bromus pratensis*). A hardy perennial, useful in mixtures for both mowing and pasture. It should not be sown alone except in poor soil or dry hillsides. It withstands extreme cold and drought, and if cut before flowering it makes a good hay. **Per bushel, 18 lbs.; 25 cts. lb., \$22.00 100 lbs.**

Timothy (Herd's Grass or Catstail) (*Phleum Pratense*). Root fibrous on moist soils; on dry soils often bulbous; perennial; flowers in June and July. While this grass is commonly known as Timothy, it is frequently called Herd's Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and yields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding three or four tons per acre. **Per bushel, 45 lbs.; 10 cts. lb., subject to market changes.**

A Field of Breck's Special Grass Mixture for Permanent Mowing and Grazing Three Years after Seeding.

Orchard Grass.

Orchard Grass (*Dactylis glomerata*). Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable, it withstands droughts better than most species on dry sandy soils. **Per bushel, 14 lbs.; 20 cts. lb., \$18.00 100 lbs.**

Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass) (*Poa pratensis*). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to be the most valuable of all the grasses in our pastures. On the other hand, some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to

Kentucky Blue Grass.

become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years and be then plowed up. **Per bushel, 14 lbs.; 20 cts. lb., \$18.00 100 lbs.**

Red Top (Herd's Grass) (*Agrostis Vulgaris*). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils, producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the clover soon disappears, followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required, or 15 lbs. of the clean seed. **Per bushel, 10 lbs.; chaff seed 8 cts. lb., \$6.00 100 lbs. Fancy or clean seed per bushel, about 40 lbs.; 20 cts. lb., \$18.00 100 lbs.**

Italian Rye (*Lolium Italicum*). In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years it is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile and tenacious or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant and nutritive crops. **Per bushel, 18 lbs.; 12 cts. lb., \$10.00 100 lbs.**

Meadow Fescue.

Crested Dog's-Tail.

To insure a good Hay Crop
use Mapes Grass and Grain
Spring Top Dressing

To Stimulate Worn-out
Lawns use Breck's Lawn
Dressing

Meadow Foxtail (*Alopecurus pratensis*). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering. **Per bushel, 8 lbs.; 40 cts. lb., \$37.00 100 lbs.**

Crested Dog's-Tail (*Cynosurus cristatus*). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures for lawns. **Per bushel, 28 lbs.; 42 cts. lb., \$41.00 100 lbs.**

Meadow Fescue, or English Blue Grass (*Festuca pratensis*). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always sown mixed with other grasses. **Per bushel, 15 lbs.; 22 cts. lb., \$20.00 100 lbs.**

Sheep's Fescue (*Festuca ovina*). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures. **Per bushel, 12 lbs.; 30 cts. lb., \$27.00 100 lbs.**

Fine-Leaved Fescue (*Festuca Tenuifolia*). This is really a variety of *Festuca ovina*, with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for permanent pasture on high and dry situations. **Per bushel, 22 lbs.; 62 cts. lb., \$60.00 100 lbs.**

Tall Fescue (*Festuca elatior*). Root fibrous, somewhat creeping; perennial; flowers June and July. In appearance this species resembles the *Festuca pratensis*, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils.

Sweet Vernal.

Meadow Foxtail.

Hard Fescue.

Per bushel, 15 lbs.; 34 cts. lb., \$32.00 100 lbs.

Rhode Island Bent (*Agrostis canina*). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and lawns. Soil and treatment same as for Red Top (*A. vulgaris*). **Per bushel, 10 lbs.; 25 cts. lb.**

Fancy or clean seed. **Per bushel, 40 lbs.; 25 cts. lb., \$22.00 100 lbs.**

Rough Stalked Meadow Grass (*Poa trivialis*). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. **Per bushel, 14 lbs.; 65 cts. lb., \$64.00 100 lbs.**

Perennial Rye (*Lolium perenne*). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers. **Per bushel 24 lbs.; 10 cts. lb., \$9.00 100 lbs.**

Hard Fescue (*Festuca duriuscula*). This is one of the best grasses of the Fescue family. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the summer drought, and develops remarkable verdure during winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate husbandry. **Per bushel 14 lbs.; 28 cts. lb., \$26.00 100 lbs.**

Red or Creeping Fescue (*Festuca rubra*). This grass is found growing on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures. **Per bushel, 13 lbs.; 32 cts. lb., \$30.00 100 lbs.**

Sea Mat Grass (*Ammophila Arundinacea*). Valuable on the sandy seashore, canal and railway banks, etc. Its strong, creeping, matting roots bind the drifting sand into natural embankments against the action of wind and waves. This grass is usually propagated by transplanting in the fall. Where it is necessary to use seed, it should be sown in spring, and ground covered with brush to hold the seed in place until it has taken firm hold. **Per bushel, 15 lbs.; 70 cts. lb.**

Upright Sea Lime Grass (*Elymus Arenarius*). Valuable on the sandy seashore, canal and railroad banks, etc. It tends, with its tough, wide-spreading and thickly matting roots, to form natural and permanent embankments, thus serving to prevent the drifting of the sand, and to protect an exposed shore from wind and waves. It is of no agricultural value. **Per bushel, 12 lbs.; 60 cts. lb.**

Sheep's Fescue.

Sweet Vernal (*Anthoxanthum odoratum*). Root fibrous; perennial; flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, and is largely used for this purpose. **Per bushel 11 lbs.; 65 cts. lb., \$60.00 100 lbs.**

Yellow Oat Grass (*Avena flavescens*). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils. **Per bushel, 11 lbs.; 48 cts. lb., \$45.00 100 lbs.**

Tall Meadow Oat Grass (*Avena Elatior*). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds best on deep, sandy lands, and is suitable for sowing in orchards or other shady places. **Per bushel, 15 lbs.; 25 cts. lb., \$23.00 100 lbs.**

Red Top.

Perennial Rye Grass.

White Clover.

Wood Meadow Grass (*Poa nemoralis*). This grass, as its name implies, is found naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, on pleasure grounds. Root fibrous, flowers in June and July. **Per bushel, 14 lbs. 45 cts. lb., \$42.00 100 lbs.**

Various Leaved Fescue (*Festuca heterophylla*). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a valuable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. **Per bushel, 15 lbs. 32 cts. lb., \$30.00 100 lbs.**

Millets.

Prices subject to market changes.

Hungarian Grass (*Panicum Germanicum*). This is a species of millet growing less rank, with smaller stalks, often yielding two or three tons of hay per acre. It is very popular and valuable. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return than almost any other crop. **Per bushel, 48 lbs.; 5 cts. lb., \$2.00 bushel.**

Japanese Millet, Japanese Barnyard Grass (*Panicum Crus Galli*). Distinct from other varieties, enormous cropper, grows six to eight feet high, excellent either green or cured as hay. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July. Broadcast at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. **Per bushel, about 35 lbs.; 8 cts. lb., \$5.00 100 lbs.**

German or Golden Millet (*Panicum Miliaceum var.*). An improved variety, medium early, growing three to five feet high. The heads are closely condensed, though the spikes are very numerous. During the past few years the fact has been established beyond doubt that seed of the German or Golden Millet grown in Southern latitudes will produce a much larger yield of hay than from seed grown in Northern or Western sections of the country, and for that reason is far better for farmers to sow. **Per bushel, 50 lbs.; 5 cts. lb., \$2.25 bushel.**

I have had very good results from seed you sent me in early spring.

Yours truly,

JAMES M. BUTTIMORE, Winchendon, Mass.

Mixtures for Permanent Pastures.

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We are giving this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September inclusive, in which some of the valuable grasses do not attain their full perfection.

By using a mixture comprising these species it will be at once apparent that a rich and luxuriant growth will be secured throughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of soils, altitudes and climates. We think, however, that those we have compiled will be found sufficiently comprehensive to meet all the contingencies that arise in ordinary farming.

To insure prize hay crops, use liberally Mapes Grass and Grain Spring Top Dressing and Mapes Manure for General Use. For prices and full descriptive list, see page 128.

BRECK'S SPECIAL MIXTURES FOR PERMANENT PASTURES.

Table showing the proper quantities to Sow on an Acre of Light, Medium or Heavy Soils, for Permanent Pasture.

KIND.	No. 1.	No. 2.	No. 3.	No. 4.

ALTERNATE HUSBANDRY.

All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, consequently, much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

See Special Offers on third page of cover.

Lucerne Clover.

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what is commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

PERMANENT GRASS SEED MIXTURES FOR GOLF LINKS.

In order that we might be the better able to serve our customers and give them Golf Mixtures that will best withstand the soil and climate of New England, we have made careful study and comparison of the mixtures used on different Golf Links in Scotland and England—and the mixtures offered below are the results of many years' experimenting and study to get grasses that would make the finest and most permanent courses and greens. Some of the largest and best known Golf Greens in this section of the country have used our mixtures, and we have yet to hear report of any dissatisfaction in regard to results obtained.

No. 1. For Putting Greens, sow at the rate of 80 lbs. per acre. Per lb. 13 cts.

No. 2. For Courses, light and dry soils, sow at the rate of 50 lbs. per acre, Per lb. 18 cts.

No. 3. For Courses, low and damp soils, sow at the rate of 50 lbs. per acre. Per lb. 12 cts.

See Special Offers on third page of cover.

BRECK'S STANDARD LAWN GRASS SEED.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

One quart will sow 300 sq. ft.	Price per qt. \$0.25	One peck will sow 2,400 sq. ft.	Price per pk. \$1.50
" half peck will sow 1,200 sq. ft.	Price per ½ pk. .85	" bush. will sow 10,000 sq. ft.	Price per bush. 5.00

Four bushels will sow one acre.

Boston Park Lawn Grass.

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them.

Per pound, will sow 700 feet	\$0.30	Per ¼ bushel, 16 pounds, will sow 11,200 feet	\$4.25
" peck, 8 pounds, will sow 5,600 feet	2.25	" bushel, 32 pounds, will sow 22,400 feet	8.00

Two bushels will sow one acre.

Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt. 25 cts.; pk. \$1.50; bush. \$5.00

Breck's Bank and Terrace Grass Mixture

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt. 25 cts.; pk. \$1.50; bush. \$5.00

Sterlingworth Lawn Compound

Kills the weeds but not the grass and makes the lawn green and velvety.

It seems incredible that a preparation can be made which will kill the weeds in lawns without injuring the grass. This is exactly what "STERLINGWORTH LAWN COMPOUND" will do and also it will help the grass to grow green and greatly improve the sward. It absolutely destroys Dandelions, Plantain, Chickweed and all weeds with hairy surfaces or broad leaves. It is a dry sandy powder to be applied by sprinkling over the grass.

Five pounds will dress 500 to 700 square feet. Full directions for use on each package. Prices: 5 lb. cans. 60 cts., 10 lb. cans, \$1.00; 50 lb. kegs, \$4.00; 100 lb. kegs, \$7.50.

To Stimulate Worn-out Lawns use Breck's Lawn Dressing.

See Special Offers on third page of cover.

It is somewhat difficult to convey detailed particulars as to how success may be had in the planting and maturing of flowers. The skilled gardener who has every appliance necessary often fails in his efforts; while the little girl who has no knowledge of the art, but loves flowers, will frequently surprise not only herself but the older folks, *who are not so much interested*, with the results obtained by her labor and love. "The Norwegians have a pretty and significant word, 'Opelske,' which they use in speaking of the care of flowers. It means literally 'loving up,' or cherishing them into health and vigor."

The following practical information, in connection with the special cultural notes, that, when necessary, are set in the right-hand column against the variety, will be of service in making for success:

Hardy Annuals (hA.).—This class require no artificial aid, but grow and flower freely in the open ground, mature their seeds and die in the same year. Before sowing the seeds in the open border, the soil should be thoroughly enriched with fertilizer or stable manure, dug and raked until firm, level and smooth. If possible, the location should be free from shade, although some sorts do well where they do not have the sun for more than half the day.

Seed should be sown in spring as soon as the ground is dry enough to work freely. After the seed is sown shake over it fine soil sufficient to cover, light or heavier, according to size of seed; a good rule is, to cover seed twice its own depth. Very fine seed, such as *Portulacas*, requires no covering at all, but should be merely pressed into the soil with a piece of board or the palm of the hand. A second sowing can be made in from two to four weeks after the first, in order to provide for a succession, as well as to insure against failure.

When it is desired to sow hardy Annuals and carry them along indoors until they can be planted out there is nothing better than shallow boxes, two or three inches deep, filled with sandy loam. Take especial care until the plants are up and during their early stages of growth to give plenty of air and *water* carefully. When they are well out of the seed leaf they should be planted in rows in other shallow boxes; or in two-inch pots. If they begin to crowd one another before the weather is suitable for setting out, a second transplanting may be necessary. When first set out in the garden, or until well established, they should be watered carefully. Keep down all weeds, and loosen the ground occasionally, so that the plants may receive the full benefit of rains and dews, which will not benefit them if the ground is allowed to become hard or crusted.

Half-Hardy Annuals (hhA.).—These, in the latitude of Boston, should not be sown out-doors until about the middle of May. A good rule, followed by a successful gardener, is to sow these, and even some of the tender Annuals, at the same time he makes his sowings of cucumbers and melons. With half-hardy Annuals, however, it is generally best to sow them under the same conditions as advised for hardy Annuals in-doors.

Tender Annuals (tA.).—To get strong plants and an early bloom, sow the seed in shallow boxes or pots in March, and place them in a warm greenhouse, or plunge in a moderate hot-bed, shade from the strong sun and water only with a very fine rose. A very light, sandy soil and good drainage are essentials. Be particular that the finer seeds are not covered over deep, but have the soil pressed closely about them. Water frequently, especially if the green-house or hot-bed is very warm. When the plants are out of the seed leaf, transplant into shallow boxes or small pots. When sufficiently strong and the weather is suitable, set out in the flower beds, but not before the end of May.

Hardy Biennials (hB.) and **Perennials** (hP.).—These require the same conditions as hardy Annuals. Those marked with a dagger (†) if sown early, in boxes, as directed for hardy and half-hardy Annuals, will

See Special Offers on third page of cover.

bloom the first year. All, however, may be sown in the open border in August or September; in which case it is a good plan at the commencement of frost to give them a light covering of straw, leaves or dry litter. When the frost is out of the ground in spring remove the covering, loosen the soil around the plants, and when large enough transplant them to where they are permanently to remain.

Half-Hardy Biennials (hhB.) and **Half-Hardy Perennials** (hhP.).—These may be sown in the open border as directed for hardy Annuals, but, when practical, it is generally better to start them in-doors, as recommended for half-hardy Annuals.

Tender Biennials (tB.) and **Tender Perennials** (tP.).—Accord these the same treatment as recommended for tender Annuals.

Those to whom a greenhouse or hot-bed is not available will meet with good success by placing the boxes or pots in the open sunlight in the windows of the dwelling house, and keep the temperature from 65 to 75 degrees during the day and 10 degrees less at night. If the soil was in proper condition at planting time, a slight sprinkling once a week will be sufficient until the plants begin to grow nicely.

Greenhouse Seeds.—Leaf mould, or peat, with some fine sand added, is the most suitable soil for sowing. The smaller seeds of greenhouse plants are somewhat difficult to germinate unless extra care be taken with them; they require to be slightly watered occasionally, and sheltered from the hot sun until large enough to transplant. Press the soil firmly down into the pot or box and make perfectly level, so that no unequal settlement takes place through watering. The seeds should be sown thinly and *covered very lightly*. A pane of glass placed over the pot or box until the little plants get well started is of decided benefit, but care should be taken to air occasionally, when excessive moisture is shown by water globules on the under side of the glass. When the young plants have two leaves they should be transplanted into a similar soil, in other pots or boxes. To do this do not pull them out one by one, but, if in a pot, remove the entire contents and break up gently; if in a box, loosen by running a trowel around the side and take out a mass at a time, thus preserving the little roots which are so essential to their future welfare. After transplanting, keep in a shady part of the greenhouse and water sparingly until established, when they may be removed to the light.

It is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias and Asters cannot be planted in too rich a situation;

Directions for Making and Caring for Hot-Beds.

Early in March obtain a good quantity of fresh horse manure, mix with it one-third to one-half its bulk in leaves, and by tramping down the mass in layers, make a large pile, so that the fermentation will continue even in very cold weather. When this fermentation shows, by the escape of steam from the pile, turn it over and allow it to remain so for a few days or until the second fermentation shows; then place the manure in a pit at least 2½ feet deep and tread it down firmly in layers to a depth of about 2 feet. Build your pit in a sheltered spot, facing the south or east if possible and line with heavy planks or concrete. The frame used to support the sashes covering the bed should be raised 6 inches higher at the back than the front, to give proper slope to the sash to catch the sunlight.

After the manure is firmly trodden down in the pit, scatter over the surface a good covering of air slaked lime, to keep all slugs, worms, and other pests from infesting the surface soil. After this is done, fill in about 4 or 5 inches of good, rich, clean-sifted loam, level off and place a thermometer therein. Put on sashes and let the frame remain closed until the thermometer registers about 70 to 75 degrees and remains steady. Sow your seed, covering it lightly. Keep the surface moist by an occasional watering with a fine spray. As the seedlings appear it is advisable to allow them a little air each day to prevent them damping off; when the plants are large enough they can be thinned out, transplanted into boxes or small pots and placed back in the warm frame.

Explanatory.

Our General List of Flower seeds comprise the following, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that their simplicity will not only find favor with our customers, but prove valuable to them as a handy reference.

Key to Abbreviations.

hA	designates Hardy Annuals—Lasting but one year.	hhP	designates Half Hardy Perennials—Require protection during winter.
hhA	“ Half Hardy Annuals—Lasting but one year.	tP	“ Tender Perennials—Lasting three or more years, but require greenhouse protection during winter.
tA	“ Tender Annuals—Lasting but one year.	†	“ Biennials or Perennials that if sown early will bloom the first year.
hB	“ Hardy Biennials—Lasting two years.	Var.	“ Various.
hhB	“ Half Hardy Biennials—Require protection during winter.		
hP	“ Hardy Perennials—Lasting three or more years.		
Tra.	Trailing Habit.		

The abbreviations of colors are: blk.—black; br.—brown; tri.—tricolor; car.—carmine; crim.—crimson; sul.—sulphur; lav.—lavender; pur.—purple; var.—variegated; scar.—scarlet; strip.—striped; ver.—vermilion.

In some instances when the flower is of two colors, these are indicated by the initial letter only,—for example, b. & w.—blue and white; s. & y.—scarlet and yellow; w. & p.—white and pink.

For Flower Seed Novelties see pages 14 to 18.

Breck's Selected List of High Grade Flower Seeds

Our Complete List of Flower Seeds begins on page 85.

This special list embraces only sorts that are of the easiest cultivation, and particularly desirable for producing a quick and continued effect. A dollar's worth of seeds selected from these varieties will, under reasonably favorable conditions, give a greater amount of bloom in varied form and color than could be had by planting ten dollars' worth of plants from the greenhouse. Sow the seed freely. Their combined strength will break the crust on hard soils; and in the thinning which follows, only strong and promising plants are allowed to remain. Better effects are also often secured, when the flowers are in masses, especially if the flowers are thrown into the bays of heavy shrub borders.

Plants continue to bloom for a longer period if they are not allowed to produce seed. The flowers should be picked, if possible, before they begin to fade.

Joseph Breck & Sons:—

I wish to say a few words regarding your seeds. Your seeds in general have never been excelled. I have used seeds from leading seedsmen from Maine to California and from Maine to Florida. Your seeds are of strong germinating powers and true to name. They cannot be excelled.

A. B. REED,
Richmond, Me.

Ageratums.

In many respects this is one of the most desirable summer flowering plants we have. It may be used alone for beds and borders, or planted in connection with geraniums, coleus, cannas, etc. The colors include many shades of blue as well as white, rose and a pale yellow. The plants grow well almost anywhere. If the seed is started in a box in the house, or in a hot-bed, in the beginning of April and transplanted to where they are intended to bloom about the end of May, an abundance of flowers will be produced until hard frost. Seed sown in August will produce plants for winter flowering.

Sweet Alyssum.

The Sweet Alyssum is so well known and such a general favorite that it is scarcely necessary to call special attention to it here. It is of the easiest culture both indoors and out, and is suitable alike for beds and edging in summer or for growing in pots and boxes for winter blooming. It will stand considerable cold in the open ground and may be sown early; it blooms throughout the entire season until destroyed by hard frost. For winter flowering sow the seed in August or September.

Sweet Alyssum.

See Special Offers on third page of cover.

Antirrhinum (Snapdragon).

If sown in March or April and set out when strong enough, these plants make a display that is unequalled for duration and brilliancy. The tall sorts are fine in borders. The dwarf make splendid beds. They prefer a light, warm, but a well enriched soil. Seed sown outdoors in May will produce satisfactory results. If grown indoors they require about the same temperature and treatment as carnations. Most of the varieties are fairly hardy and will live through a New England winter if well covered.

Aquilegia (Columbine).

This family is one of the most beautiful and popular among hardy perennials. The different varieties present an unusual wealth of color and form. For growing in borders or filling up bays in shrubbery they are unsurpassed. Seed sown in the house, in March will frequently produce bloom the same year. It is best, however, to sow seed out of doors when ground warms up. Any ordinary garden soil is suitable for their growth. The flowers are fragrant.

Breck's Special Asters.

The demand for Breck's Asters from the leading commercial and private growers all over the United States is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded. Our prices speak for themselves.

Cultivation.—Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, three inches apart.

Breck's International Prize.

265—Breck's International Prize represents all the best classes and colors of large flowering Asters and embraces the cream of the most desirable species only.

ASTERS—Continued.**LATEST IMPROVED VARIETIES.****Breck's Dawn of Day Aster.**

The earliest flowering white Aster yet raised; of perfect form, erect growth and with long stems. It flowers about two weeks ahead of Queen of the Market, and continues until late in the Fall.

260 Dawn of Day.....Pkt. 10 cts.

Breck's Crego Aster.

This is a giant strain of the Comet type of Aster, with large and feathery flowers; recognized as the finest Aster grown, producing an abundance of bloom on fine, long, graceful stems borne well above the foliage.

295 Deep pink.....Pkt. 10 cts.
296 Snow white....." 10 cts.

Hercules Aster.

This is an Aster raised from the large white variety of Hercules first offered in 1905. It is a beautiful, delicate rosy lilac; the plants grow in a compact semi-dwarf form about 20 inches high, and produce immense and perfect flowers. One of the most refined of all Asters.

261 Rosy Lilac.....Pkt. 15 cts.

Queen of Italy Aster.

Italian introduction and has been called the Queen, as it will doubtless range foremost amongst all Asters. It grows about 28 inches high and bears giant flowers 5 inches in diameter, on long and graceful stems. The flowers are very double and of a distinct chamois color.

268 Queen of Italy.....Pkt. 25 cts.

Collection of six distinct colors, 50 cents.

Customers who are interested in or intend purchasing Ornamental Shrubbery, Fruit Trees or nursery stock of any description should have our new, complete and finely illustrated Nursery Catalogue. Ready for mailing in February; free on application.

See Special Offers on third page of cover.

Balsam (*Impatiens Balsamina*).

Magnificent summer and autumn flowering annuals. A rich sandy loam is most suitable for them. They must be kept well watered. If transplanted several times the plants have a tendency to dwarf and produce more double flowers. Seed may be started early in heat or outdoors in May.

Balsams are not often given room for perfect development; they will easily cover 12 to 18 inches of space each way if given fair treatment.

Campanula (*Canterbury Bells*).

These are well-known favorites. Seed may be sown in the open ground in April or May. The annual and biennial sorts will bloom the first year; the perennials early the year following. They all like a good rich soil. All of them are exceedingly beautiful and attractive, especially when the different colors are planted together.

C. calycanthema can be transplanted to pots for house decoration by soaking the soil about them with water and lifting with a ball of earth.

Calendula (*Pot Marigold*).

"The Marigold of Shakespeare's time." One of the most popular and easily grown hardy annuals. The plants are free flowering and do well in almost any situation, although they prefer a warm, loose soil. They bloom the whole season. It is usual to sow the seeds where the plants are intended to stand, but they will bear transplanting. Calendula make good pot plants and flower freely during the winter.

Candytuft (*Iberis*).

Very showy, branching annual plants that produce flowers which embrace nearly all shades of red, purple and white. A succession of sowings lengthens the season of bloom. Seed sown outdoors in spring will produce flowers from July until September. Is very effective for beds, borders, etc., and useful for pot culture during winter. Grown extensively by florists for cutting.

Coreopsis (Calliopsis).

A species of very showy annual and perennial plants that are invaluable for garden decoration and cutting. They enhance the color of the garden by the wealth of bright yellow flowers, which is strengthened in some sorts by disks of rich crimson, maroon and various shades of brown. The perennials are all hardy border plants and well worthy a place in every garden. The flowers last well when cut.

Breck's Early Flowering Cosmos

Cosmos (Cosmea)

We especially recommend Breck's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades. Sow seeds of Breck's Early Flowering varieties in open ground, in light warm soil, early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine for successful growing. High-grade fertilizer, rich in potash, such as Breck's Lawn and Garden Dressing, gives best results. Seeds of the later varieties should be sown early in March in a hot-bed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot into 4-inch pots and water moderately. Transplant to open ground in June.

Dahlias Breck's Selected

We offer seed of the following varieties. This seed is saved from the best collections in Europe. If the seed is started early in a hot-bed an abundance of flowers will be produced the same season. Dahlias like a good, deep, rich soil. The roots should be housed during winter in a cool cellar where they will be safe from frost. In spring roots can be divided and about May 20th transplanted to the open ground.

Dianthus
(Pink or Carnation).

Among the Dianthus will be found some of our best loved flowers.

The biennial sorts are all well-known favorites that flower the first season. The colors of the Heddewegii vary through all shades of crimson to a delicate rose.

The Diadematus shades from rose to purple. They are all exceedingly ornamental, and suitable alike for beds, borders, house cultivation and cutting.

Barbatus is the old-fashioned German Sweet William.

The Caryophyllus bloom in about four months from time of sowing and produce 80 per cent double flowers.

Seed can be sown under glass in the spring, or in an open, sheltered bed. The seedlings are easily transplanted and should stand 8 to 12 inches apart.

Eschscholtzia **(California Poppy).**

Large showy flowers in shades of yellow, orange, rose and white. The foliage is bluish green and very attractive. For a display in beds and borders as well as for cutting, these flowers are very satisfactory. The plants are fairly hardy and seed may be sown quite early where wanted to bloom.

Per oz. Pkt.

Double English Daisy.

The English Daisies are very popular spring-flowering, perennial plants; they are very often used for bedding with Pansies and Forget-me-nots, *Silenes*, etc. They grow about 4 inches high and have a flowering season from May until Sept. They are easily grown. Seed can be sown either in spring or in midsummer. They require protection in a cold frame during winter.

Breck's Giant Eschscholtzia.

Breck's Silver Medal Hollyhocks **(Althæa Rosea).**

Breck's Silver Medal strain of seed is superior to any in vigor of growth, texture, quantity and range of color.

Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, cool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

Larkspur (Delphinium).

Larkspurs thrive in any good garden soil, but are of much better color and texture of flower when grown in a deep, rich, sandy loam. Both the annual and perennial sorts are easily raised from seed, fall or early spring sowing is recommended. Perennial sorts are also propagated by divisions of roots. Seedlings should be set out where they are intended to flower any time in May or June. The tall sorts are very suitable for borders; the dwarf kinds are effective for beds.

Breck's Colossal Sweet Mignonette.

Marigolds (Tagetes). (See also *Calendula*.)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the Dwarf French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. Sowings should not be made outdoors until danger from frost is passed.

Mignonette (Reseda Odorata).

Well known, fragrant favorites, delightful for working into bouquets. For winter flowering seed should be sown in July or August. All the sorts we offer are very fine, but especial attention is called to Breck's Giant Machet and Breck's Colossal as being particularly good and the most desirable for pot culture. A succession of bloom during both summer and winter may be had by repeated sowings.

Breck's Rainbow Nasturtiums (*Tropæolum*).

A great variety of soft and pleasing colors. The seed we offer is a selected strain and mixed in proper proportions so that our customers may be assured of having all the effective shades of *pink, rose, scarlet, crimson, brick, claret, chocolate, brown, garnet, orange, primrose, yellow and white*. Seed may be planted, one inch deep, early in April, where wanted to bloom or in any convenient place, and the plants when large enough transplanted to the beds.

Pansy (Viola Tricolor).

The Pansy is one of our specialties. For size and form of flowers, variety and brilliancy of colors and markings, there is nothing approaches it. *Breck's Boston Prize* is an American strain and is superior to any European mixture. The flowers are immensely large and wonderful in their coloring.

The English and Scotch Prize Pansies are remarkably fine; they are from the finest collections in these countries.

Our Trimardeau Pansies embrace the cream of that type, and will give perfect satisfaction in every particular.

Pansies delight in a cool, moist soil and a situation that protects them from cutting winds as well as the midday sun. To obtain large flowers early in spring, seed should be sown in July or August and the plants protected with a frame during winter. Spring sown seed does very well, although the flowers produced are not so large.

I have no hesitation in saying that yours is the best strain of Pansy seed I have ever used, and you can send along the usual order.

Yours respectfully,

ALEXANDER EMSLIE, Barre, Vt.

See Special Offers on third page of cover.

Shirley Poppy.

POPPY (*Papaver*).

Poppies are so well known that it is needless to say anything in their favor. Quite a number of the perennial varieties bloom the first year from seed if sown early. The new strain of Shirley we offer produces softer and more pleasing shades than we have offered hitherto. Sowings made in May, and again several times during spring, will produce a continuous bloom from early summer until frost. The seed should be sown where the plants are wanted to bloom, as Poppies do not take kindly to transplanting. Cover seed very lightly, and firm the soil with a flat board. When large enough thin out the plants. A sandy loam and early spring sowings produce the best flowers.

Petunia Hybrida.

Free flowering, sweet scented and easily cultivated, well-known favorites, effective and beautiful in borders, beds, vases, etc. They thrive in almost any soil and produce a brilliant array of color throughout a long season. Breck's Prize is an exceedingly fine strain of large fringed flowers that produces a large percentage of doubles. We call special attention to the collections offered. The seed is all saved from selected pot-grown plants, and we believe will prove perfectly satisfactory.

Breck's Large Flowered Petunia.

Salpiglossis.

The Salpiglossis is a beautiful garden annual. The magnificent flowers, large and funnel shaped, present an extremely pleasing variety of colors in mottled, veined and self-colored forms. They require good, rich soil, and will amply repay in glorious effect good care and liberal treatment.

The strain we offer under the name of Multi-Colored is a wonderful improvement over all other varieties of this very desirable plant.

Sweet Peas (*Lathyrus odoratus*).

We have endeavored to simplify the selecting of Sweet Peas by reducing our list of varieties, and by specifying those sorts that, in the opinion of leading specialists, are most representative and desirable to persons who desire to grow the named kinds.

Sow seeds in spring as soon as the ground can be worked. Make a trench about 8 inches deep, dig in some good manure and level off the surface, then sow the seed and cover the same with about 2 inches of soil, pressing it down firmly. As the plants grow thin them out if necessary, and gradually fill in the trench using care to have 6 or 8 inches of growth above the soil at all times. In staking the vines use either brush or strong stakes; set about 10 feet apart; to this wire netting can be fastened. Do this before filling in the trench.

BRECK'S BOSTON MIXTURE.

1900. *The very best mixture offered at any price. It includes in good proportion over sixty of the choicest kinds.* Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb., 40 cts., lb. \$1.25.

JOSEPH BRECK & SONS, Boston, Mass. Gentlemen: I am more than pleased with the seed bought of you this year.—F. H. TUTHILL, Jamesport, New York.

Sunflowers (Helianthus).

Most Sunflowers being of strong growth are not suited for beds near the house, but are very desirable for growing in shrubberies, against fences, or making backgrounds for borders. They do well in any kind of soil, from light sandy to heavy; they do not grow to perfection if heavily shaded. Seeds may be sown where the plants are wanted to bloom, or indoors in March and April, and transplanted when the weather is suitable.

Breck's Defiance Zinnia.

Breck's Zinnias.

Breck's Defiance is without exception the finest strain of large Double Zinnias offered. The plants are of vigorous branching habit and produce freely immense double flowers in an endless variety of splendid colors. The separate colors are saved from the same collection, which is admitted to be the finest in Europe. Seed sown early in heat will begin to bloom in June and continue until frost, or seed may be sown outdoors where the plants are intended to bloom.

GENERAL LIST OF FLOWER SEEDS

Explanation and Key to Abbreviations.

Our General List of Flower Seeds comprises the following, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (—) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the *first column*, following the name, denotes hardness and duration; the *second column*, height in feet; the *third column*, color or predominating colors; the *fourth and fifth columns* show the price per ounce and packet respectively; the *sixth column* gives brief descriptions or special notes on culture.

hA designates Hardy Annuals—Lasting but one year.
 hhA " Half Hardy Annuals—Lasting but one year.
 tA " Tender Annuals—Lasting but one year.
 hB " Hardy Biennials—Lasting two years.
 hhB " Half Hardy Biennials—Require protection during winter.
 hP " Hardy Perennials—Lasting three or more years.

hhP designates Half Hardy Perennials—Require protection during winter.
 tP " Tender Perennials—Lasting three or more years, but require greenhouse protection during winter.
 † " Biennials or Perennials that if sown early will bloom the first year.
 Trail. " Trailing Habit.
 Var. " Various.

The abbreviations of colors are—

blk.—black.
 br.—brown.
 car.—carmine.
 crim.—crimson.
 sul.—sulphur.
 lav.—lavender.
 pur.—purple.

var.—variegated.
 scar.—scarlet.
 strip.—striped.
 ver.—vermilion.

In some instances when the flower is of two colors, these are indicated by the initial letters only,—for example, b. & w.—blue and white; s. & y.—scarlet and yellow; w. & p.—white and pink.

Stocks, large flowering ten week						} The seed we offer is all pot grown especially for us in Germany by the foremost cultivator of this fragrant favorite. It will produce a very large percentage of flowers that are unsurpassed for doubleness, form, size and color. Our Boston Florists' strain is now also raised in Germany. It produces a fine long spike, very double globular flower of the purest white. For a succession of flowers seed should be sown in March or April, in heat, and outdoors in May and June. A light soil and high cultivation are desirable.

Stocks (Gilliflower)—Continued					
2860 Breck's Boston Florist White...	hA	1 1/4	white	4.00 10	The "cut and come again" and the "mammoth column" varieties are very suitable and highly recommended as forcing varieties for Florist purposes. Beauty of Nice is also one of the best for indoor culture being a beautiful shade of shell pink and a strong grower. The Pyramidal forms are well suited for outdoor culture, making strong growth which produces an abundance of flowers.

Wild Garden Seeds.

Any one who has cultivated flowers in neatly laid out beds or carefully planted ribbon borders is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Half-oz. packets, 20 cts.

See Special Offers on third page of cover.

BULBS and PLANTS

ACHIMENES. Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mould. Keep warm and water carefully. Assorted colors, 5 cents each; 50 cts. doz.

AGAPANTHUS UMBELLATUS (*African Lily*). Blue, fine for tubs, pots, etc. 35 cts. each.

—*Umbellatus albus*. White, 35 cts. each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

—*Belladonna major*. Rosy pink, fragrant, 15 cts. each.

—*Formosissima* (*Jacobean Lily*). Blooms freely out-of-doors; flowers velvety crimson. 15 cts. each; \$1.75 doz.

—*Johnsonii*. Large crimson and white flowers. 40 cts. each; \$4.00 per doz.

HALLI (*The Hardy Amaryllis*). Produces in early summer strong stems about eighteen inches long on which are borne large clusters of beautiful rose-colored flowers. The bulbs are perfectly hardy and when planted in the border require no protection during winter. Extra strong bulbs, 50 cts. each.

APIOS TUBEROSA. A pretty, hardy native climber. Flowers resemble the popular *Wistaria*; very fragrant. 10 cts. each; \$1.00 per doz.

BEGONIA. Tuberous Rooted. These are desirable plants for bedding. The flowers are not destroyed by rain storms, but seem to shine more brilliant after every shower. The colors are varied and beautiful. Our bulbs are imported from the most reliable source known. Single flowered sorts as follows: *Red, Crimson, Scarlet, Rose, Pink, White, Yellow, Gold and Bronze, Striped and Flaked*. 5 cts. each; 50 cts. per doz.; \$3.75 per 100.

—*Single Flowered*. Mixed colors, 4 cts. each; 40 cts. per doz.; \$3.00 per 100.

—*Double Flowered Sorts*. Same color as the single kind. 10 cts. each; \$1.00 per doz.; \$6.50 per 100.

—*Double Flowered Mixed*. 8 cts. each; 85 cts. per doz.; \$5.50 per 100.

BESSERA ELEGANS (*Coral Drop*). Bright scarlet flowers borne on stems about two feet high. Will bloom from shortly after planting until frost. 5 cts. each; 50 cts. per doz.

CALADIUM ESCULENTUM. Beautiful ornamental foliage plant. The leaves are of immense size, light green with darker veins. Will grow in any good garden soil, to a height of five feet. Dry bulbs, according to size, 10, 15 and 20 cts. each; \$1.00 to \$2.00 per doz. Growing plants from pots, 20 and 25 cts. each; \$2.00 to \$3.00 per doz.

CINNAMON VINE. Hardy climber, shining green foliage, fragrant white flowers. 5 cts. each; 50 cts. per doz.

GLOXINIA BULBS. Our stock of these is very choice.

Bulbs potted up in nice sandy loam in February or March, will bloom in June and July. In the fall, dry them and store in a warm place through winter. Strong flowering bulbs in separate colors, per bulb, 10 cts.; \$1.00 per doz.; \$7.50 per 100.

GLADIOLI. To keep up a continuous bloom from June until frost, plantings should be made every two weeks. Plant six inches apart in rows, four inches deep. After frost lift and cut off near the bulb, and store in any dry place where the frost will not reach them.

—*AMERICA*. Color, charming soft flesh pink, slightly tinged with lavender. Doz., \$1.00; 100, \$6.50.

—*AUGUSTA*. Pure white, blue anthers. Doz., 50 cts.; 100, \$4.00.

—*BRANCHLEYENSIS*. Vermilion scarlet. Doz., 40 cts.; 100, \$3.00.

—*MAY*. White flaked crimson. Doz., 50 cts.; 100, \$4.00.

—*Shakespeare*. White with pale rose; good forcing variety. Doz., \$1.50; 100, \$10.00.

—*BRECK'S BOSTON MIXED*. A good mixture, containing almost every shade known in the Gladioli family. 30 cts. doz.; \$2.25 per 100.

—*GROFF'S HYBRIDS*. A new strain, largely hybrids of *Nancieanus*, *Lemoinei* and *Childsii*. Very vigorous growth, largest size blooms, nearly all scarlet shades. 30 cts. doz.; \$2.00 per 100.

See page 16 for complete list of named varieties.

Unnamed Gladioli, Separate Colors.

Scarlet Red Shades. 30 cts. doz.; \$2.00 per 100.

Pink and Rose Shades. 30 cts. doz.; \$2.00 per 100.

White Shades. 30 cts. doz.; \$2.50 per 100.

Yellow Shades. 85 cts. doz.; \$7.00 per 100.

Striped and Variegated. 40 cts. doz.; \$3.00 per 100.

Gladiolus America.

HARDY GARDEN CHRYSANTHEMUMS.

These old-fashioned hardy plants are eagerly sought for by garden lovers. The list below embraces every variety of color. These plants, though hardy, with a slight protection winter more safely. Splendid for fall effects.

Herbaceous Pæonies.

The most popular hardy plants of the day. They surpass the rose in size, equal it in range of color and fragrance, are not troubled with insect pests. They do well in any good, rich, deep soil, and prefer a sunny situation, although they thrive almost equally well in a partially shady location. A liberal supply of water should be given them during the growing season. They are perfectly hardy, requiring no protection whatever even in the most severe climate.

The following 19 fine named double sorts, 50 cts. each; \$5.00 per doz.

Amabilis Grandiflora. White, large fringed petals.
Amabilis Speciosa. Rose shading to pink; large, sweet.
Baron T. Rothschild. Rose outside, centre salmon, sweet.
Delectissima. Rose, large, full, fine sweet.
Duchesse de Nemours. Rose pink, very large, double.
Fulgida. Dark crimson, showing golden anthers.
Festiva Maxima. Creamy white, centre carmine.
Francis Ortegal. Dark purple crimson, very large.
Humei. Rose, full, large, late; one of the best.
Officinalis Rubra. Deep red.

Perfection. Rose lilac, inside salmon, sweet.
Caroline Mather. Dark crimson, rose scented.
Couronne de Roses. Large, full and sweet.
Festiva Alba. Pure white, with few marks of carmine in center.
King of Roses. Pink, large, rose scented
L'Innocence. White, rosy outer petals.
Officinalis Alba. White, tinged red; very early.
Officinalis Rosea. Crimson, changing to rose; very early.
Triomphe du Nord. Violet-rose, shade lilac.

Double unnamed mixed, our selection, 25 cts. each; \$2.75 per dozen.

Single mixed, exceedingly beautiful, both in flower and foliage. The shades of color embraced are many and delicate, while the form and fragrance are delightful. 50 cts. each; \$5.00 per dozen.

HARDY PERENNIAL PHLOX (Phlox Decussata).

The Phlox is an old-fashioned favorite which is becoming more popular every year.

It is hardy and does well in all situations. By a selection of varieties they can be had in bloom from July until the middle of September; or by "cutting back" the plants early in the season, they will bloom through September.

Mme. Edmund Andre. Bright crimson. 75c. each.
Virginiana. (American White Clematis.) A profusion of white flowers in August. 25c. each.

HARDY CLIMBING PLANTS.

- Actinidia Polygama.** A strong, clean vine from Japan. 50c. each.
Akebia Quinata. Of rapid growth, with shining foliage and bluish clusters of fragrant flowers. 35c. each.
Ampelopsis Englemanni. A variety of the Virginia Creeper, with bright foliage; fine color in the autumn; the tendrils enable it to support itself like *A. Veitchii*. 25 and 35 cts. each.
— Quinquifolia (Virginia Creeper). Well known climber; very vigorous. 25c. each.
Ampelopsis Velitchii (Boston Ivy, Japanese Ivy). Well-known, particularly around Boston. It grows rapidly and clings to a wall or fence with the tenacity of ivy; the foliage is handsome in the summer, and changes to a crimson scarlet in autumn. For the ornamentation of brick or stone structures, it can be especially recommended. 25c. each; \$2.50 per doz.
Aristolochia Sipho (Dutchman's Pipe). Rapid grower, magnificent foliage 10 to 12 inches across, and curious, piped shaped, yellowish-brown flowers. 75c. each. Extra size, 1.00.
Bignonia Radicans (Trumpet Vine). A quick growing vine, bearing large scarlet flowers, very brilliant. 35c. each.
Celastrus Scandens (Roxbury Wax Work). A vigorous vine with conspicuous orange-scarlet berries in autumn. 35c. each.
Dolichos (Pueraria). Kudzu Vine. Quick growing vine with rosy purple flowers. 35c. each; \$3.00 per doz.
Euonymus Radicans. Retains its glossy green and bright foliage through the winter; nice plants, 35c. each.
Honeysuckle, Hall's Japan. Abundant, vigorous foliage retained until early winter, flower white and yellow; fragrant. 25c. each. Extra size, 50c. each.
Honeysuckle, Scarlet. Strong, rapid grower, bright scarlet. 35c. each.
— Belgica. Dutch monthly, very sweet scented, red and buff. 35c. each.
— Chinese Twining (Lonicera Japonica). A well known vine, holding its foliage nearly all winter, blooms in July and Sept. Sweetly scented. 35c. each; \$3.00 per dozen.
Humulus Lupulus (Hop Vine). Distinct foliage, with clusters of hops. 15c. each; \$1.50 per dozen.
Lycium Barbatum (Matrimony Vine). Useful for covering screens or ledges. A fast grower. 25c. each; \$2.50 per doz.
Wistaria Chinensis. One of the most elegant and rapid growing of all climbing plants, bearing long pendulous clusters of pale blue flowers in May and June. 50c. each.
— Alba. White, otherwise similar to preceding. 75c. each.

Wistaria.

RHODODENDRONS.

There are no evergreen shrubs more desirable than Rhododendrons. They are hardy, and grow to spread several feet in diameter, giving annually a large mass of showy flowers in many colors. The leaves remain green throughout the winter, making the plant attractive and showy. They do best in a partial shade, and when set, a good sized hole should be dug and filled with leaf-mould from the woods, or pulverized muck. In fall, a mulch with leaves or stable manure will be found very beneficial.

18 in. plants \$1.50 each, \$15.00 per doz. 24 in. plants \$2.00 each, \$20.00 per doz.

Abraham Lincoln. Rosy crimson, of good form.
Album Elegans. Blush, changing to white; fine shape.
Boule de Neige. Pure white, very hardy.
Caractacus. Red purplish crimson, fine trunk.
Delicatissimum. Blush white, edged pink.
Everestianum. Rosy lilac; spotted and fringed.

General Grant. Crimson pink.
Gloriosum. White, bold flowers and good foliage.
H. H. Hunnewell. Dark rich crimson.
Lady Armstrong. Pale rose, beautifully spotted.
Mrs. Milner. Rich crimson.
Roseum Elegans. Vivid rose, beautiful.

HARDY FLOWERING SHRUBS.

The month after each sort indicates the time of flowering.

Almond (Prunus Jap. Rubra fl. pl.). Double pink. 50c. May.
— (Prunus Jap. Alba fl. pl.). Double white flowers, beautiful. 50c. May.
Althæa Purpurea Plena (Rose of Sharon). Hibiscus. 35 and 50c. October.
Althæa. Double variegated. 35 and 50c.
— Double red, Double white, Double pink. 35 and 50c.
— Single white and Single blue. 35 and 50c.
Azaleas. Ghent Hybrids, perfectly hardy, brilliant colors. Fine plants \$1.00; large sizes \$2.00 and \$2.50. June.

Azaleas.

— Mollis. A new type, flowering earlier than the *Ghent*, and in color and form approaching the Indian varieties. 75c. to \$1.00.
Barberry (Berberis Thunbergii). A low growing shrub of arching habit; the foliage changes to many brilliant colors in the fall. 35c. each. June.
— Vulgaris (Common Barberry). Vigorous habit, free bearer. 35 and 50c.
— Purple leaved. 35 and 50c.

For Complete List see Special Nursery Catalogue.

HARDY FLOWERING SHRUBS—Continued.

Currant Missouriia (*Ribes aureum*). Very ornamental, yellow flowers and glossy foliage. 35 cts. each. May.

Calycanthus Floridus. Strawberry tree or sweet-scented shrub, dark flowers. 35 cts. each. June–Sept.

Chionanthus Virginicus (*Fringe Tree*). White. 50 cts. June.

Clethra Alnifolia. White, fragrant flowers, on spikes. 50 cts. July.

Cornus Florida (*Dogwood*). White. 75 cts. May.

—**Sanguinea** (*Red Osier*). Bark deep red. 35 cts.

—**Elegantissima**. Variegated foliage. The leaves are marked with silvery white. 75 cts.

Corchorus Japonica (*Kerria*). A small shrub with bright green leaves and clear yellow flowers. 25 and 50 cts. June and July.

Desmodium Penduliflorum (*Sweet Pea Shrub*). Red and violet pea-shaped flowers. 35 cts. Autumn.

Deutzia Gracilis. Compact, filled with starry white flowers. 35 and 50 cts. June.

—**Crenata fl. pl.** Flowers double white, tinged with rose. 35 and 50 cts. June.

—**Alba fl. pl.** With very double pure white flowers. 35 and 50 cts. June.

—**Pride of Rochester**. Large panicles of white flowers, tinted rose. 35 and 50 cts.

—**Lemoine**. An early bloomer; flowers pure white and well opened. 35 and 50 cts.

Elder, Golden (*Sambucus Aurea*). Very effective for its bright yellow foliage. 35 cts.

Eleagnus Longipes. A new fruit-bearing ornamental shrub from Japan. A decided novelty. 75 cts. July.

Euonymus Europeus (*Burning Bush*). Purple. 50 cts. June.

Exochorda Grandiflora. A choice shrub of strong, upright growth, producing a profusion of large, snowy-white flowers in June. 50 and 75 cts. May.

Forsythia Fortunii. Large deep yellow flowers; upright. 35 and 50 cts. April.

—**Suspensa**. Trained on a trellis, it becomes one of the most beautiful weeping shrubs, covered with bright golden-yellow blossoms, early in summer. 35 and 50 cts. April.

Hydrangea Paniculata Grandiflora. Flowers white in great pyramidal panicles, about a foot long. 35 and 50 cts.

—**Hydrangea Paniculata**. Grand tree form. \$1.00 each.

Kalmia Latifolia (*Mountain Laurel*). A choice native evergreen shrub with shining foliage and dense clusters of pink or nearly white flowers. Well formed clumps. \$1.50 and \$2.00. June.

Lilac (*Syringa*). Bluish-purple flowers. 35 and 50 cts. May.

—(*S. Alba*). Pure white. 50 cts. May.

Lonicera Tartarica (*Bush Honeysuckle*). Pink, sweet-scented. 35 cts. May.

Mahonia Aquifolia. A handsome shrub with shining prickly leaves, and showy, bright yellow flowers in May, followed by large clusters of purple berries. 35 cts. May.

Pyrus Japonica (*Cydonia*). Japan Quince, flowers bright scarlet, very showy. 25 and 50 cts. May.

Rhus Cotinus. The well known smoke bush. 3 ft. 50 cts.; 5 ft. \$1.00. June.

—**Glabra Var. Laciniata** (*Cut-leaved Sumach*). Leaves deeply cut, like a *Sword Fern*. Red in autumn. 75 cts.

Snowball (*Viburnum Plicatum*). A great improvement on the old-fashioned sort, with dark green foliage, and superb trusses of white flowers in midsummer. 50 and 75 cts. June.

Spiræa Aurea. Frequent pinching produces a deep golden-yellow color. 35 and 50 cts.

—**Anthony Waterer**. One foot high. Crimson. 50 cts. June–Oct.

—**Thunbergii**. Dwarf, flowers early, very pretty. 35 and 50 cts. April–May.

—**Van Houttei**. The most profuse flowering of the Spiræas, the bush being a mass of white bloom. 35 and 50 cts. June.

Syringa or Mock Orange (*Philadelphus*). Of compact habit, with creamy-white flowers, deliciously fragrant. 35 and 50 cts. June.

—**Aurea** (*Golden-leaved Syringa*). A very showy plant of medium size, with golden-yellow foliage. 35 and 50 cts. June.

Viburnum Opulus (*High Bush Cranberry*). Very ornamental, having clusters of red berries which remain on the branches until winter. 50 cts.

Weigelia Rosea. Well known, very free flowering. 35 and 50 cts. May–June.

—**Variegata**. Fine variegated foliage, rosy-pink flowers. 50 cts. June.

—**Eva Rathke**. An erect grower with dark carmine-red flowers. 35 and 50 cts. June.

EVERGREENS.

Arbor Vitæ (*Thuja Occidentalis*). Common American form. 2 ft. 25 cts.; 3 ft. 50 cts.

Fir Balsam (*Abies Balsamea*). Erect, regular pyramidal tree, rapid grower, very hardy. 50 cts. to \$1.00.

—**Concolor**. The foliage varies from blue to green. 3 ft. \$3.50; 4 ft. \$5.00 each.

Juniper Virginiana (*Red Cedar*). Native variety. 3 ft. \$1.00; 4 ft. \$1.50.

—**Hibernica** (*Irish Juniper*). Of erect, tapering growth, beautiful and hardy. 75 cts. and \$1.00.

—**Sabina**. Trailing habit, fine for massing. 2 to 3 ft. \$1.50 each.

See Special Offers on third page of cover.

Spiræa Van Houttei.

EVERGREENS—Continued.

- Pine, Austrian.** Stout growth, long needles, perfectly hardy in bleakest exposure. 2 ft. 50 cts., 3 ft. 75 cts. each.
 — **White** (*P. Strobus*). The most ornamental of all our native pines. 3 ft. 50 cts., 4 to 5 ft. \$1.00 each.
Retinospora Plumosa. Very hardy, with plume-like foliage. 2 ft. 75 cts., 3 to 4 ft. \$1.50, 4 to 5 ft. \$3.00.
 — **var. Aurea.** Of bright golden color. 2 ft. \$1.00, 4 ft. \$2.50, 5 ft. 3.00.
Squarrosa. Graceful, drooping, plume-like, glaucous green foliage. \$1.00 and \$2.00.
Spruce, White (*Picea Alba*). Very hardy native tree. 2½ ft. 50 cts., 4 ft. \$1.00.
 — **Colorado, Blue** (*P. pungens*). Perfectly hardy, pyramidal, foliage dark steel-blue. 2 ft. \$2.50, 3 ft. \$5.00.
 — **Norway** (*Abies Excelsa*). An elegant tree, hardy, lofty, rapid growth, and pyramidal form. 2 ft. 50 cts., 4 ft. \$1.00.
 — **Hemlock** (*Abies Canadensis*). Of good shape and habit. 2 ft. 75 cts., 3 ft. \$1.00.

SHADE AND ORNAMENTAL TREES.

- Apple, Bechtel's Double Flowering Crab** (*Malus Halleana*). Large double flowers resembling pink roses; very fragrant. 50 cts. and \$1.00.
 — **Floribunda.** Single, carmine in bud, white when open. 50 and 75 cts.
Ash, American White (*Fraxinus Alba*). A large, noble tree. 9 ft. 75 cts., 10 ft. \$1.00.
 — **Mountain** (*Sorbus Aucuparia Pendula*). Very ornamental, bearing large clusters of shining red berries. 6 to 7 ft. 75 cts., 9 ft. \$1.00.
Beech, American (*Fagus Ferruginea*). Compact form, rich, glossy, attractive foliage. 3 to 4 ft. 50 cts., 5 to 7 ft. \$1.50.
 — **Rivers Purple** (*F. Atropurpurea*). Finest of all purple-leaved trees, beautiful as single specimens. 4 to 5 ft. \$1.50.
 — **Cut-Leaved** (*F. Incisa*). Distinct and fine. 3 ft. \$1.00.
 — **Weeping** (*F. Pendula*). A remarkable picturesque tree of curious growth. 4 ft. \$2.00.
Birch, European White (*Betula Alba*). A graceful tree with silvery bark, slender branches, elegant drooping habit. 5 to 7 ft. 50 cts., 7 to 8 ft. 75 cts.
 — **Canoe** (*B. Papyracea*). A native variety which attains great size. 6 to 8 ft. 75 cts., 8 to 10 ft. \$1.00.
 — **Cut-Leaved, Weeping** (*B. Pendula Lacinata*). One of the most popular weeping trees, most beautiful as specimens on the lawn. 6 to 8 ft. \$1.00, 8 to 10 ft. specimens \$2.00.
Catalpa Speciosa. A Western type, very desirable, being more hardy and finer in bloom than the common variety. 6 to 7 ft. 75 cts., 8 to 10 ft. \$1.00.
 — **Bungei, Chinese.** Grafted on high stems, head round in form. \$1.50 each.
Chestnut, American (*Castanea Americana*). A tree of stately growth. 4 to 5 ft. 75 cts.
 — **Horse** (*Aesculus Hippocastum*). Strong habit, magnificent foliage, and fine spikes of flowers in May and June. 5 to 6 ft. \$1.00, 8 ft. \$1.50.
Elm, American (*Ulmus Americana*). The noble spreading and drooping tree of our own forests. 10 ft. \$1.25, 12 ft. \$1.75.
 — **English** (*U. Campestri*). An erect, lofty tree of rapid, compact growth. 8 to 10 ft. \$1.00.
Gymnocladus Canadensis (*Kentucky Coffee Tree*). Large pinnate leaves, green flowers in June, followed by large pods. Does well in wet places. \$1.00 and \$1.50.
Hawthorn, Double White (*Crataegus Alba, fl. pl.*). Ornamental flowers and foliage. 5 ft. \$1.00.
 — **Paul's Scarlet** (*C. Coccinea fl. pl. Paulii*). Flowers bright carmine red, makes a striking contrast when planted with the white. 5 ft. \$1.00.
Laburnum, Golden (*Cytisus*). A small tree producing freely long clusters of the brightest golden-yellow blossoms of sweet-pea size and shape. 4 ft. 50 cts., 5 to 6 ft. \$1.00.
Larch, European (*Larix Europaea*). An elegant rapid-growing pyramidal tree. 4 to 6 ft. 75 cts.
Linden, American, or Basswood (*Tilia Americana*). A beautiful, rapid growing native tree with large leaves and fragrant flowers. 8 ft. \$1.00, 10 ft. \$1.50.
 — **European** (*T. Europaea*). Pyramidal tree of larger size. 7 to 8 ft. \$1.00, 8 to 10 ft. \$1.50.
Maple, Cut-Leaved Weeping (*Acer Wierii laciniatum*). A weeping silver-leaved variety with deeply cut foliage. 8 ft. \$1.00.
 — **Japan** (*Atrorubiginum purpureum*). This is the richest crimson and the most brilliant, vigorous, and the best type of the Japanese varieties. \$2.00 each.
 — **Japonicum aureum** (*Golden-leaved Japan Maple*). \$1.50.
 — **White or Silver-Leaved** (*A. Dasycarpum*). A native variety of rapid growth, very beautiful. 8 to 10 ft. 75 cts., 10 to 12 ft. \$1.00.
 — **Norway** (*A. Plantanoides*). Of sprawling habit, foliage dark green. 7 to 8 ft. 75 cts., 10 to 12 ft. \$1.00.
 — **Sugar** (*Acer saccharinum*). One of the best street trees. 6 to 8 ft. 75 cts., 10 to 12 ft. \$1.50.
Magnolia Acuminata (*Cucumber M.*) Of pyramidal growth, flowers yellow, tinted with bluish purple. Fine specimens. 5 ft. \$1.00.
 — **Conspicua** (*Chinese White*). A variety of great beauty; the flowers are large, pure white, and appear before the leaves. 2 to 3 ft. \$1.75, 3 to 4 ft. \$2.50.
 — **Soulangeana.** Flowers white and purple, cup-shaped; foliage large and glossy. Fine specimens. 2 to 3 ft. \$2.00, 3 to 4 ft. \$2.50, 5 to 6 ft. \$5.00.
Mulberry, Downing's Everbearing (*Morus*). A rapid growing tree which bears nice fruit. 4 to 5 ft. \$1.00.
 — **Teas, Weeping.** Absolutely hardy and free from disease, very vigorous in growth. 2 years old \$1.50.
Oak, Palustus or Pin. The best and most popular species for general planting. 8 to 9 ft. \$1.00.
 — **Red** (*Q. rubra*). Native species of rapid growth. 6 to 8 ft. \$1.00, 8 to 10 ft. \$1.50.
Poplar Bolleana (*Populus*). Pyramidal growth. 8 to 10 ft. \$1.00, 10 to 12 ft. \$1.50 each.
 — **Carolina.** Pyramidal form, rapid grower, suitable for park or street planting. 8 to 10 ft. 50 cts., 10 to 12 ft. 75 cts. each.
 — **Lombard** (*P. fastigiata*). Well known and remarkable for its erect rapid growth. 8 to 10 ft. 50 cts., 10 to 12 ft. 75 cts.
Prunus Plissardi. One of the best novelties of late years. The wood and leaves are dark purple throughout the entire season. 4 to 5 ft. 75 cts.
Syringa Japonica (*Giant tree lilac*). It makes a stout tree with large rich foliage, and throws up well above the leaves large clusters of white flowers about a foot long. 3 to 4 ft. 75 cts., 4 to 5 ft. \$1.00.
Tulip Tree (*Liriodendron tulipifera*). Fiddle-shaped leaves and tulip-like flowers. 8 to 10 ft. \$1.00.
Willow, Kilmarnock (*Salix Caprea Pendula*). An exceedingly graceful tree with glossy foliage and perfect umbrella head. \$1.00.
 — **Golden Barked** (*S. aurea*). Rapid grower. Golden bark in winter. Valuable for sea shore. 4 to 5 ft. 50 cts., 6 to 8 ft. 75 cts.
 — **Laurel Leaf** (*S. Pentandra*). Leaves large, dark, glossy green, highly ornamental; excellent for sea shore planting. 5 to 6 ft. 50 cts., 6 to 8 ft. 75 cts. each.

Gravenstein Apples.

FRUIT TREES—Apples.**Summer.**

Astrachan. Large, crimson, very early.
Early Harvest. Pale yellow, excellent, early
Golden Sweet. Large, pale yellow, sweet.
Williams. Dark red, mild flavor.

Autumn.

Walter Pease. Larger, better flavored, more productive and longer keeper than the *Gravenstein*. Highest quality. \$1.00 each.
Gravenstein. Large, yellow, striped red.
Fameuse (Snow Apple). Crimson, flesh white, excellent.
Porter. Medium, bright yellow, good.
Pippin. Fall, yellowish green, very fine.

Prices, 7 to 8 feet, "Extra" size, \$1.00 each; \$10.00 per dozen. 5 to 7 feet 75 cents each; \$6.00 per dozen; \$40.00 per 100. 4 to 5 feet 50 cents each; \$5.00 per dozen; \$30.00 per 100.

Grab-Apples.

Hyslop. October to January; deep crimson.
Transcendent. September, October; useful alike for preserving, pies, sauces and cider.

Sops of Wine. Medium, red, flesh white, mild.
Sweet Bough. Moderate growth, large, pale yellow, tender, juicy, sweet, very good. Ripening August.

Winter.

Baldwin. Large, dark red, productive, medium.
Golden Russet. Late yellow, good flavor.
Hubbardston. Large, yellow, splashed red, early.
King. Large, striped red, excellent.
Northern Spy. Large, striped red, good keeper.
Rhode Island Greening. Large, yellowish green, medium.
Roxbury Russet. Extra quality. Largest of the russets.
Tolman's Sweet. Medium, light yellow, excellent.
Pound Sweet. Best, late-keeping sweet.

Whitney. November, December. New; large, bright red.
 Price, 75 cents each; \$7.50 per dozen.

Cherries.

Coe's Transparent. June; medium, pale amber and red.
Black Tartarian. June; large, purplish black.
Montmorency. July; large, tender, rich, sub-acid.

May Duke. June; large, dark red, tender, sub-acid.
Windsor. July; large, dark red, nearly black, sweet.
Yellow Spanish. Late June; pale yellow, red cheek.

Price, 6 to 7 feet 75 cents each; \$6.00 per dozen.

See Special Offers on third page of cover.

Peaches.

Carmen. New, hardy rot-proof. Pale yellow skin and red cheek; early.
Alexander. July; medium, melting and juicy.
Elberta. Late July; flesh yellow. Very juicy.
Crosby. (*Ironclad.*) September; medium, sweet, firm, most desirable.
Belle of Georgia. Very large. Skin white, red cheek.

Mountain Rose. September; large, white and red, melting, good.
Crawford's Early. September; large, yellow, juicy, freestone.
Foster. Sept.; similar to preceding, but of better quality.
Old Mixon. Sept.; large, white and red, juicy and rich.
Crawford's Late. Very large, juicy, good, freestone.
Stump the World. Sept.; medium, red and white.

Prices, 5 to 6 feet 50 cents each; \$5.00 per dozen; \$25.00 per 100. 4 to 5 feet 35 cents each; \$3.00 per dozen; \$20.00 per 100.

Pears.

Summer. Clapp. Very productive, large, juicy.
Bartlett. Large, clear, yellow, juicy; late.
Wilder. Ripens beginning August.
Autumn. Bosc. October; large, russet, buttery.
 5 to 6 ft. \$1.25 each, \$12.00 doz.
Duchesse d'Angouleme. October; large, greenish.
Louise Bonne. October; pale yellowish and red.
Seckel. September; small, dull brown, red cheeked.

Sheldon. November; large, russet brown.
Vermont Beauty. October; yellow with carmine cheek.
Winter. Anjou. Nov.-Jan.; green, yellow, red cheek.
Dana's Hovey. November; small rusty yellow.
Lawrence. January; medium, pale yellow.
Nellis. January; medium, of excellent quality.
Vicar. December; yellowish green; cooking.

Prices, 5 to 6 feet 75 cents each; \$6.00 per dozen, except as noted.

Quinces.

Apple, or Orange. Large, roundish, bright golden yellow; very productive.
Champion. A vigorous and productive variety, ripening very late.
Meech's Prolific. Very early; pear-shaped and of high quality. Color, golden yellow.

Bourgeat. A new variety of large size, and believed to be one of the finest yet offered. It is a good keeper. Color, rich golden.
Rea, or Rea's Mammoth. A very large and fine variety of Orange Quince. One of the best.
 4 to 5 feet 50 cents each; \$5.00 per dozen.

PLUMS.**European.**

Beauty of Naples. August; large, yellow and red.
Bradshaw. August; large, purple, sweet.
Damson. September; dark purple, very productive.
Green Gage. Sept.; large, greenish yellow, very fine.

Imperial Gage. August; large, greenish, juicy and rich.
Lombard. September; medium, violet, red, juicy.
Yellow Egg. August; large, yellow.

Japanese.

Abundance. Early; fruit amber turning to cherry, flesh yellow, juicy, tender and sweet.
Burbank. September; bright red, flesh yellow and sweet.

Wickson. Late, large, carmine, delicious, small stone.
Satsuma. September; purplish red, flesh dark red, juicy and of fine quality.

Price: 5 to 7 ft., 50 cts. each; \$5.00 per doz.

Distances Between Trees or Plants in Plantations.

Standard Apples, 30 to 40 feet apart each way. In poor soils 25 feet may be enough.
Standard Pears and Cherries, 20 feet apart each way. Cherries will do at 18 feet, and the dwarf-growing sorts, Dukes and Morellos, even at 16 feet.
Standard Plums, Peaches, Apricots and Nectarines, 16 to 18 feet apart each way.
Quinces, 10 to 12 feet apart each way.
Dwarf or Pyramidal Pears, Cherries and Plums, 10 to 12 feet apart each way. The greater distance is better where land is not scarce.
Dwarf Apples, bushes, 6 feet apart.
Currants, Gooseberries and Raspberries, 3 to 4 feet apart.
Blackberries, 6 to 7 feet apart.

HARDY GRAPES.

Concord. A large, handsome, popular grape. Sept.
Eaton. Large in berry and bunch, sweet and juicy. Sept.
Moore's Early. Large, reliable. August.
Wilder. (*Roger's No. 4.*) Sweet and solid. September.
Agawam. (*Roger's No. 15.*) Dark red, tender, juicy. Sept.
Green Mountain. Desirable in every way, very early. 50 cts.
Moore's Diamond. As early as Concord, large, fine flavored.
Niagara. As good as any, early and hardy.

Brighton. Flesh rich, sweet and best quality. Sept.
Delaware. Small in berry and bunch, flesh very juicy. September.
Salem. (*Roger's No. 22.*) Very rich flavor, large. Sept.
Campbell's Early. Large, black and very sweet. 50 cts.
 { 2-year plants, 30 cts. each; \$3.00
 doz. 3-year plants, 50 cts. each;
 \$5.00 doz., except as noted.

See Special Offers on third page of cover.

Blackberries.

Agawam. The earliest; flavor like the wild berry.
Rathbun. Extra large, productive, new.
Snyder. Best quality, very sweet.
Eldorado. Hardy, good size and quality.

\$1.00 per doz.; \$5.00 per 100, except as noted.

Wauchestet Thornless. Fruit medium, hardy and very productive.
Wilson's Early. Large and sweet.
Taylor's Prolific. Extremely hardy, large, prolific.

Currants.

Black Naples. Fine for wine and jelly. \$1.50 per doz.; \$9.00 per 100.
Cherry. Large, red, juicy. \$1.50 per doz.; \$9.00 per 100.
Fay. Like Cherry, but more prolific. \$1.50 per doz.; \$9.00 per 100.

La Versailles. Very large, red. \$1.50 per doz.; \$9.00 per 100.
Perfection. The largest red currant in existence; a prize winner. 25 cts. each; \$2.50 per doz.

I wish to express to you my satisfaction over the currant bushes you sent me; they were in fine condition on arrival, and being carefully set, every one of the 102 is now alive.

Most truly,
 F. H. BUFFAM, Winchester, N. H.

Gooseberries.

Crown Bob. Very large, red. 25 cts. each; \$2.50 per doz.
Red Jacket. The best red, free from mildew. 25 cts. each; \$2.50 per doz.
Pearl. The most prolific, free from mildew, green. 25 cts. each; \$2.50 per doz.
Industry. Very large, dark cherry red. 25 cts. each; \$2.50 per doz.
Downing. Whitish green. 20 cts. each; \$2.00 per doz.

Raspberries.

Cuthbert. Red, firm and superior quality.
Columbian. Very large, purple.
Golden Queen. Productive and of superior quality. Golden yellow. \$1.50 per doz.
Cumberland. One of the finest black, large and productive.
Gregg. Good black, productive and hardy.
Marlboro. Large, red, very productive.
 \$1.00 per doz.; \$5.00 per 100, except as noted.

Strawberries.

For Garden Culture, set plants one foot apart in the row, and the rows two feet apart, keep the runners cut off. The varieties marked "P" are pistillate and must have a row of staminate, or perfect-flowered varieties, planted say every ten feet among them.

The Autumn (P). Of vigorous growth, very productive and mild flavor, dark red, late. Autumn is a pistillate and must have a few Pan-Americans to fertilize them. Price, 1/3 doz. \$1.00; 1 doz. \$2.00; 100, \$10.00.

Pan-American. New everbearing variety of good quality, large clear red, free from rust and of fine flavor. A persistent bloomer from May to November. Price, 1 plant 30 cts.; 1/2 doz. \$1.25; 1 doz. \$2.50; 100 \$20.00.

Abington. Large fruit, solid, and excellent flavor. P. F.
Belmont. Late; crimson berry; very productive. P. F.

Breck's Abundance. Large, excellent berry; very heavy cropper; flavor tart; medium early. Highly recommended. P. F.

Brandywine. Hardy, good quality. Medium.

Commonwealth. Late; very large; deep crimson; excellent flavor. P. F.

Excelsior. The best of all early strawberries. Is medium small; crimson; tart, and the earliest of all. Splendid variety. P. F.

"Gandy." Large berries; late and an excellent cropper. Splendid keeper. P. F.

Glen Mary. Large; crimson berry; good quality; very productive; late. P. F.

Marshall. Requires no recommendation; is medium late. The fruit is very large, deep crimson color, and extra quality. P. F.

Minute Man. (P.) Medium early; vigorous grower, free from rust; berries light red and a great cropper.

\$1.00 per 100, except as noted. \$8.50 per 1000.
 Pot Grown Plants ready in August, \$3.50 per 100.

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

PLANT.	First Application.	Second Application.	Third Application.	Fourth Application.
Apple. Scab, codlin moth, bud moth.	When buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. For bud moth, Arsenites when leaf buds open.	*When blossoms have fallen, Bordeaux and Arsenites.	8-12 days later, Bordeaux and Arsenites.
Cabbage. Worms, aphs.	*When worms or aphs are first seen, Kerosene emulsion.	7-10 days later, if not heading, renew emulsion.	*7-10 days later, if heading, hot water 130° F.	Repeat third in 10-14 days if necessary.
Carnation. Rust and other fungous diseases, red spider.	*When rust is first noticed, Bordeaux. Kerosene emulsion when red spider is first seen.	*For rust repeat first in 10-14 days. For red spider repeat in 3-4 days.	Repeat second, using the Ammoniacal carbonate of copper if plants are in bloom.	Repeat second as before if necessary.
Cherry. Rot, aphs, slug.	As buds are breaking, Bordeaux; when aphs appear, Kerosene emulsion.	When fruit has set, Bordeaux. If slugs appear, dust leaves with air-slaked lime. Hellebore.	10-14 days, if rot appears, Bordeaux.	10-14 days later, Ammoniacal copper carbonate.
Currant. Mildew, worms.	*At first sign of worms, Arsenites.	*10 days later, Hellebore. If leaves mildew, Bordeaux.	If worms persist, Hellebore.	
Gooseberry. Mildew, worms.	*When leaves expand, Bordeaux. For worms, as above.	*10-14 days later, Bordeaux. For worms, as above.	*10-14 days later, Ammoniacal copper carbonate. For worms, as above.	*10-14 days later repeat third.
Grape. Fungous diseases, flea beetle.	In spring when buds swell, copper sulphate solution. *Paris green for flea beetle.	*When leaves are 1-1½ inches in diameter, Bordeaux. Paris Green for larvæ of flea beetle.	*When flowers have fallen, Bordeaux. Paris Green as before.	*10-14 days later, Bordeaux.
Nursery Stock. Fungous diseases.	*When first leaves appear, Bordeaux.	*10-14 days, repeat first.	10-14 days, repeat first.	10-14 days, repeat first.
Peach Nectarine Apricot. Rot, Mildew.	*Before buds swell, copper sulphate solution.	Before flowers open, Bordeaux.	*When fruit has set, Bordeaux.	*When fruit is nearly grown, ammoniacal copper carbonate.
Pear. Leaf blight, scab, psylla, codlin moth.	As buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. Kerosene emulsion when leaves open for psylla.	*When blossoms have fallen, Bordeaux and Arsenites. Kerosene emulsion if necessary.	*8-12 days later, repeat third.
Plum. Fungous diseases, curculio.	*During first warm days of early spring, Bordeaux for black knot. When leaves are off in the fall, Kerosene emulsion for plum scale.	*When buds are swelling, Bordeaux for black knot and other fungous diseases. During mid-winter, kerosene emulsion for plum scale.	*When blossoms have fallen, Bordeaux. Begin to jar trees for curculio. Before buds start, Kerosene emulsion for plum scale.	*10-14 days later, Bordeaux. Jar trees for curculio every 2-4 days. For San Jose scale, Kerosene emulsion when young appear spring and summer.
Potato. Scab, blight, beetles.	*Soak seed for scab in corrosive sublimate solution, 2 oz. to 16 gals. of water, for 90 minutes.	*When beetles first appear, Arsenites.	*When vines are two-thirds grown, Bordeaux. Arsenites for beetles if necessary.	10-15 days later, repeat third.
Raspberry. Blackberry. Dewberry. Anthracnose, rust.	Before buds break, copper sulphate solution. Cut out badly diseased canes.	During summer, if rust appears on leaves, Bordeaux.	Repeat second if necessary.	*Orange or red rust is treated best by destroying entirely the affected plants.
Rose. Mildew, black spot, red spider, aphs.	For mildew. *Keep heating pipes painted with equal parts lime and sulphur mixed with water to form a thin paste.	For black spot. *Spray plants once a week with Ammoniacal copper carbonate, using fine spray.	For red spider. *Spray plants twice a week with kerosene emulsion. Apply to under side of foliage.	For aphs. *Spray affected parts with Kerosene emulsion when necessary.
Strawberry. Rust	*As first fruits are setting, Bordeaux. At first appearance of blight or rot, under glass or out of doors, Bordeaux.	As first fruits are ripening, Ammoniacal copper carbonate. Repeat first if diseases are not checked.	*When last fruits are harvested, Bordeaux. Repeat first when necessary.	Repeat third if foliage rusts.

For Aphides or Plant Lice use Kerosene Emulsion on all Plants.

Fibre Saucer Trucks for Large Pots and Tubs.

These are made of Indurated Waterproof Fibre Ware, mounted on castors. They are a great convenience for using with the larger size pots and tubs. Being perfectly waterproof, they are especially suitable for use in parlors, halls, etc. The four smaller sizes have a detachable and strongly made metal base, so that a new saucer can be substituted when one is worn out or broken. The two larger sizes have the castors attached to the bottom.

	Each.	Doz.		Each.	Doz.
12-in. diameter, 3 castors	\$0.60	\$6.00	18-in diameter, 4 castors	\$0.95	\$10.00

Folding Wire Plant Stands.

The most compact, strong, durable plant stand ever offered for sale, and at prices less than all others of the same capacity. They pack closer than any other plant stand for shipment. The ends are made of flat steel and have porcelain castors. The steel and iron work is finished in green and bronze. The construction of the shelves or trays are such that there is more room for the pots and foliage than any other plant stand that takes up the same amount of room on the floor.

Sterlingworth Weed Killer.**Before Using****This Picture Shows the Results from Its Use.****After Using**

This preparation is the most powerful and effective weed-killing compound known. It is unexcelled for use on walks, drives, tennis-courts, and golf links, and is used largely in parks and cemeteries, or where the killing of all objectionable vegetation is desired. It is a dry powder to be dissolved in water. It permanently destroys all kinds of weeds, grass (including milk-weed and witch grass), poison ivy, briars burdocks, dandelions daisies, thistles. One application kills roots and foliage, preventing further growth until new seed is sown. Do not dig up your walks, drives, and tennis-courts to kill weeds. The cheaper, quicker and less laborious way is to use this Killer.

It is applied with an ordinary watering can. Full directions on every can. Prices: 1 lb. pkg. (makes 10 gal.) 50 cts.; 3 lb. pkg. (makes 30 gal.) \$1.25; 5 lb. pkg. (makes 50 gal.) \$2.00.

**Glazing Points, The Peerless.**

The only durable and reliable points. Made of galvanized steel wire no rights and lefts. No raising up when driving. Three sizes, Nos. 2, 2½ and 3. The Nos. 2 and 2½ are for general use; the No. 3 for extra heavy work. Price, per box of 1,000, 60 cts. Pincers for driving same, 40 cts.

Caps, Hay, Breck's Improved.

Brown, medicated, complete with ropes and pins, 50 cts. each; \$48.00 per 100.

Butter Color, Hansen's Danish.

This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June"

to butter at all seasons of the year. Bottle, sufficient to color 500 lbs. of butter, 25 cts.; for 1,200 lbs., 50 cts.; for 2,500 lbs., \$1.00.

Cotton Batting.

For packing flowers, etc., per sheet, 6 cts.

Mats, Straw.

Hotbeds, 6 x 6, \$1.75 each; 3 x 6, \$1.25. Other sizes to order.

Palmer Hotbed Mat No. 2.

Size 76 x 76 in., wool filled and quilted, frost proof, duck, and burlap outside, \$1.50 each.

Pencils.

Wolff's Indelible Garden. For writing on wood labels, with point protector, each, 20 cts.; doz. \$2.00.

Protectors, Arlington Plant.

Protects from bugs, borers and fowls, also subdues wind, rain and cold, 15 cts. each; doz. \$1.50.

Protecting Cloth for Hotbeds.

Used as a substitute for glass for protecting plants in early Spring; in pieces of 60 yds., 10 cts. per yd.

Putty Bulbs.

A simple and useful device for applying putty to sashes, \$1.00 each.

**Arlington Plant Protector****MASTICA.**

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

We are the Manufacturers' Distributing Agents for Boston.

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent reglazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans, \$1.25; half gallons, 65 cts. 6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons. F. O. B. Boston.

Machines for applying Mastica, \$1.25 each. *Net.*

See Special Offers on third page of cover.

Roffea.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. While it is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. Price, 25 cents per lb.

Garden Gloves. Specially made for garden use. Men's Gauntlet 85 cts. per pr. Ladies' Gauntlet 75 cts. per pr.

"Basket Making." The first book of the "How to Do It Series." Tells all about basket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail 25 cents.

Silkaline. Used for growing smilax and asparagus on, also for tying in bouquet work. per reel 25 cents.

Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 75 cts., \$1.00, and \$1.25 each.

Sunlight Double Glass Sash.

The double layer of glass does it. Lets in the light always. Never has to be covered or uncovered; no boards or mats needed. Retains the heat, excludes the cold. Makes stronger and earlier plants. Glass slips in; no putty; can't work loose; easily repaired.

Has been thoroughly tried out during the severe winter 1910-11. A great time and labor saver. No mats or shutters. The Sash is of standard size, 3 x 6 ft., of best material, and in place of the regulation layer of glass it has two layers $\frac{3}{4}$ inch apart; the dry, still air in this space is the best non-conductor known and acts as a protecting mat or blanket, while admitting the sunlight with its heat rays. Five sashes or over shipped from factory, freight allowed New England points.

Write for special catalogue and price list.

1 to 5 Sashes, painted and glazed, at \$4.65 each, f. o. b. Boston.

**Single Glass Sash for Hot-Beds.**

Made from thoroughly seasoned lumber, frame $1\frac{3}{4}$ in., 3 x 6 ft., \$3.50 each.

Hot-Bed, Sash and Frame complete, for Violets, Flower Seeds and Early Vegetables.

The outside dimensions of **Frame** are three feet one inch long, and four feet eight inches wide, made of one inch **Cypress**; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing the frame may be made to last for years.

The **Sash** is also made of **Cypress** of one and one-half inch stock, put together and glazed in the very best manner. On the under side of **Sash** is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with a hammer and screwdriver can put it together in a few minutes. We furnish hinges and screws for attaching the sash to back of frame; also the hook and eyes for corners.

In offering this **Special Hot-Bed** to our customers we feel that we have something that will give entire satisfaction and will supply a long felt want.

Our price for **Frame and Sash** complete is **only** \$6.00 delivered at the railroad in Boston.

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20, 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each, respectively.

Soil, Peat, Leaf Mould, Etc.

Prepared Potting Soil. Specially prepared with **peat, leaf mould, loam, sand and fertilizer.** Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Peat, Rotted Fibrous. Fine, light and sweet. For some varieties of plants this is invaluable. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Leaf Mould. Vegetable humus, a desirable addition to all soil used for potting. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Silver Sand. For rooting cuttings and mixing with potting soil. Pk., \$0.50; bush., \$1.50, **net.**

Fern Root or Orchid Peat. Bush., \$1.50; bbl., \$3.00, **net.**

Sphagnum Moss. Per bag of 2 bush., \$1.00

Tape, Electric. Exceedingly useful for mending rubber hose. It is a strong, adhesive ribbon, three-quarters of an inch wide, can be wound tightly around a leaking part and thus stop it. Per coil, 25 and 50 cts.

Tinfoil. For bouquets. Per lb., 15 cts.

Twine. Soft, for tying cut flowers, vines, etc. Per ball, 25 cts.

Twine, Parcelling. All sizes. Per ball, 10 to 25 cts.

Wax Grafting. (Trowbridge's.) The best in the market. This brand should not be confounded with the many cheap makes now offered, that are not possessed of an even consistency, and give unsatisfactory results. Put up in 1 lb., $\frac{1}{2}$ lb., and $\frac{1}{4}$ lb. packages, price 40 cts., 25 cts., and 15 cts., respectively.

Wire, Bouquet. Bright, cut in lengths of nine and 12 inches, in boxes of 12 lbs. (one stone) each.

Per box, either length, Nos. 20, 21 and 22	\$1.25	Per box, either length, No. 26	\$1.75

Breck's Victor Fly Driver.

The *Rural New Yorker* says: "Fly time is with us again and no small expenditure will bring back so large a profit as a few dollars invested in some of the good fly preparations to make the cows comfortable and happy. The result will show in the milk pail." **This of course applies directly to Victor Fly Driver.**

Safe to use, thoroughly effective and cheaper than any other first class preparation for the purpose on the market. Put up in 1 gal. cans only.

PRICE

1 Gal. Can	\$0.75
Per case of 1 Dozen Cans	7.50

Gentlemen:—Please send me by American Express two cans of Victor Fly Driver. I have tried three kinds, but there is none as good as yours.

Yours truly,

J. S. MUNROE, Lexington, Mass.

Insecticides and Fungicides.

In general terms: **ARSENATE OF LEAD and PARIS GREEN** are specifics for leaf eating insects.

KEROSENE EMULSION, TOBACCO, WHALE OIL SOAP for sucking insects.

BORDEAUX MIXTURE and LIME SULPHUR for fungus.

Arsenate of Lead, Swift's. The safest and best insecticide for leaf-eating insects

If applied according to directions it will not injure the foliage; *one pound to 10 gallons of water has been used on young, tender leaves without scorching or burning them. It adheres to the foliage for weeks.* It is white in color; sprayed foliage may thus be distinguished from unsprayed at a glance. *It can be used with Bordeaux Mixture.* See directions on each package. 1-lb. bottles, per lb. 20 cts.; 2-lb. bottles, per lb. 19 cts.; 5-lb. pails, per lb. 18 cts.; 10-lb. pails, per lb. 16 cts.; 25-lb. pails, per lb. 15 cts.; 50-lb. kegs, per lb. 12 cts.; 100-lb. kegs, per lb. 10 cts.; 600-lb. bbls., per lb. 9 cts.

Apis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine) 60 cts.

Breck's Dalmation Insect Powder. ("Bubach.") Manufactured especially for us from clean, dried flowers. It is put up in air-tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas, roaches and other noxious insects. Four sizes, 10, 15, 25 and 40 cts. In bulk, lb. 30 cts.

Bordeaux Mixture, Dry, Acme Brand. Ready for use by simply adding water.

Bordeaux Mixture, is, we believe, the best fungicide known, and is really a specific for the blight and other diseases attacking potatoes, tomatoes, grapes, apples, pears, etc. 1-lb. box makes 5 gallons spray, 25 cts.; 5-lb. box makes 25 gallons spray, \$1.00; 25-lb. box for \$4.25; 50-lb. box for 8.00; 100-lb. box for \$15.00.

Bordeaux Mixture, Liquid, Acme Brand. We consider this the best concentrated Bordeaux Mixture on the market. One gallon makes 50 gallons of Bordeaux by simply adding 49 gallons of water. It does not clog the nozzle and adheres to the leaves. Full directions on cans for use. 1-qt. cans, 35 cts.; 1-gal. cans, \$1.00; 5-gal. jacket for \$4.50; 10-gal. for \$8.00; 25-gal. for \$18.00; 50-gal. bbl. for \$34.00.

Bug Death. (The prices quoted on this article are *net*, and not subject to either of our special offers.) A patented, *non-poisonous powder*, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash and cucumber bugs, currant and tomato worms, also other plant and vine-eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes 15 to 25 pounds is sufficient for an acre. Bug Death may be applied with a shaker or mixed with water and sprayed. 1-lb box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. box, \$1.00; 100-lb. keg, \$7.50.

Where orders are accompanied by cash **WE DELIVER FREE** to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—

Vegetable and Flower Seeds at the package, ounce, ¼ pound, ½ pound and 1 pound prices.

Bulbs at the single and dozen rates.

Books and other publications.

If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

See Special Offers on third page of cover

Creosote Mixture. This mixture is sure death to the eggs of the Gypsy Moth, Tussock Moth and similar insects. Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee. 1 qt. 20 cts.; 1 gal. 50 cts.

Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per lb. 50 cts.; $\frac{1}{2}$ gal. \$1.50; 1 gal. \$2.50.

Dip, Cooper's Sheep. A world-famous preparation, in powder form. It is easily carried, quickly prepared and most effective. Large pkg. sufficient to make 100 gals., \$2.00; small pkg. to make 25 gals., 50 cts.

In-A-Minute. Best known killer of roaches, hen lice, ants in the house, and also bed bugs, etc. Non-explosive, non-staining, and non-poisonous. Per bottle, 25 cts.

Eciffo. A sure cure and prevention of water-bugs, cockroaches, etc. Per tin, 50 cts.

Fir Tree Oil, Soluble. An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals, whether on the foliage or at the roots of the plants. Per gal. \$4.00; per qt. \$1.25; pt. 75 cts.; $\frac{1}{2}$ pt. 50 cts.

Fungiroid and Paris Green Compound. An insecticide and fungicide combined. Kills potato bugs and prevents blight; easily applied and desirable for fruit trees, etc. 1-lb. box 30 cts.; 3 lbs. 75 cts.

Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites. 5-lb. pkg. 35 cts.

Hellebore, Breck's Pure Powdered. We furnish a guaranteed pure article, ground from fresh roots. It is easily applied either in liquid or powder form, and destroys currant worms, rose slugs, etc. Each package has special directions for its effective use. Packed in three sizes, air-tight packages, 10, 15, 25 cts. each.

Kerosene Emulsion, Acme Brand. This is a concentrated article for successful use against scale and all soft bodied sucking insects such as *San Jose Scale*, *Plum Lecanium*, etc. Dilute 10 to 12 times for plant lice and soft-bodied bugs. Use strong solution for scale insects. Pt. can 20 cts.; qt. can 35 cts.; gal. can 75 cts.; 5-gal. can \$3.25.

Vaporite. A fine, dry powder, most effective for killing ants, beetles, wire worm, cut worm and similar insects in the garden soil. To destroy ants one should dust the Vaporite over the ground near the largest ant hills and runs, then wet the insecticide down thoroughly with hose or watering pot that it may be driven as far into the soil as possible. To use it most effectively against the cut worm, Vaporite should be thoroughly worked into the surface soil 5 or 6 days before planting time. Price: 15 cts. lb.; 5-lb. can 60 cts.; 100 lbs. \$10.00.

Lime and Sulphur Spray, Breck's. The most widely used and recommended remedy for San Jose Scale. *San Jose Scale* is the worst pest of the 20th century. Our Agricultural Experiment Stations have recommended the use of Lime and Sulphur mixture as being generally satisfactory in preference to all other mixtures. BRECK'S LIME AND SULPHUR SPRAY is offered as a convenient and most effective remedy for this pest. It is ready for use by simply adding water. No heating is necessary. Lime and Sulphur is also recommended for Peach Leaf Curl, Ground and Bitter Rot, Smuts, Scabs, Leaf Spot, etc. It is also an insecticide of value when used against the Caterpillar and Canker Worm, the larvae of the Codlin Moth and Bud Moth, and other pests. One gallon of Breck's Lime and Sulphur Spray makes 20 gallons. Full directions with each package.

Prices. 1-qt. cans, 30 cts.; 1-gal. cans, 75 cts.; 5-gal. jacket cans, \$2.25; 10-gal. jacket cans, \$4.00; 25-gal. kegs, \$6.50; 50-gal. barrels, \$12.00. Special price on large lots.

London Purple. For spraying fruit trees, potatoes, etc. 1 lb. 20 cts.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 50 cts.; qt. 80 cts.; gal. \$2.25.

Nicotide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. The vapor does not alter the natural color or scent of the flowers. Gal. can, \$15.00; 1 pt. for 32,000 cubic feet, \$2.50; $\frac{1}{2}$ pt. for 16,000 cubic feet, \$1.25; $\frac{1}{4}$ pt. for 8,000 cubic feet, 70 cts. **HOW TO MEASURE THE HOUSE.**—To ascertain how many cubic feet there are within any greenhouse, etc., multiply the length in feet by the breadth in feet, then by the average height; the result being the number of cubic feet.

Fumigators for Vaporizing "Nicotide." These consist of stand, pan and lamp. The set 50 cents. In a large house one fumigator should be used for every 5,000 cubic feet, distributing them evenly over the house and using all simultaneously.

"Nico-Fume" is especially effective against Aphides ("Green Fly" and "Black Fly") and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

"Nico-Fume" Liquid. $\frac{1}{4}$ pt. can 50 cts.; pt. can \$1.50; $\frac{1}{2}$ gal. can \$5.50; gal. \$10.50.

Nikoteen. Packed in pint bottles; each bottle contains all the nicotine obtained from 200 pounds of tobacco stems. A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pt. bottle, \$1.50.

Paris Green, Guaranteed Pure. This is the highest grade of Paris Green it is possible to make. It is manufactured from pure material and is always of uniform quality. Be careful of cheap greens and so-called new methods. These products are liable to burn and scorch the leaves. $\frac{1}{4}$ lb. 15 cts.; $\frac{1}{2}$ lb. 20 cts.; 1 lb. 35 cts. Subject to market changes.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. \$1.00 per 30-lb sack, \$2.50 per bale, \$25.00 per ton. *Net.*

See Special Offers on third page of Cover.

"TARGET BRAND" SCALE DESTROYER. FOR SAN JOSE SCALE.

"Target Brand" Scale Destroyer dilutes instantly in any kind of water and will not separate. It kills scale by suffocation, forming a very thin waxy film on the limbs and branches of the trees. Being perfectly neutral and **containing no crude oil**, it cannot injure the most delicate growth. It has no caustic action and cannot injure hands, eyes, body, clothing or spraying apparatus; also possesses no disagreeable odor.

DIRECTIONS.—Dilute 1 to 20 for winter treatment; 1 to 25 for fall and late spring treatment; 1 to 40 for summer treatment.

Prices, qt. 35 cts., $\frac{1}{2}$ gal. 65 cts., gal. \$1.00, 5 gals. \$3.75, 10 gals. \$7.50, 25 gals. \$14.00, 50-gal. bbl. \$25.00.

Slug Shot. Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. Price, 1-lb. boxes 15 cts., 5-lb. pkg. 35 cts., 10-lb. pkg. 65 cts., in barrels of about 225 lbs. per lb. 5 cts.

Soap Spray, Imperial. This spray contains no mineral poisons, but *does* contain vegetable poisons, harmless to plants, but peculiarly effective against Red Spider on fruit, etc., Rose Bug, White, Black and Green Fly, Mealy Bug, Thrip, Aphis, and other insect pests, on fruits, flowers and foliage. It sticks but can easily be washed off fruit before marketing. It does not spot leaves. Harmless to animals eating orchard grass. Largely used for general tree and shrub spraying against elm-leaf beetle, etc. Qt. 50 cts., gal. \$1.50, 5-gal. can \$6.00.

Soap, Fish Oil Soap and Potash. Breck's Special. For the destruction of San Jose scale and all sucking insects. Lb. 15 cts., 14-lb. bucket \$1.50. Special prices on kegs and casks.

Soap, Sulpho-Tobacco. (Patented.) A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes, it is valuable as an exterminator of moths, cockroaches, carpet bugs, and is a superior wash for dogs and all animals. Every insect will succumb to this insecticide. 3-oz. cake 10 cts., 8-oz. cake 20 cts.

Sulphate of Copper. (Blue Stone.) Per lb. 12 cts. Subject to market changes.

Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb., \$6.00 per 100 lbs. *Net.*

Tobacco Dust. This article varies as much in quality as do cigars. To produce effective results the right kind, and in suitable mechanical condition, must be used.

Fine Ground Black. For dusting on plants, animals, in poultry houses, etc. Per lb. 10 cts., 100 lbs. \$4.00. *Net.*

Fumigating Brand. (*The kind that burns.*) This is used by gardeners and florists and poultrymen for fumigating greenhouses, poultry houses, etc. It can be readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Per lb. 10 cts., per 100 lbs. \$4.00. *When ordering please state kind wanted.*

Bowker's Pyrox. The one best spray for all leaf-eating insects. Does all that Arsenate of Lead will do, besides protecting trees, shrubs, vegetables and plants against fungus diseases, one application answering both purposes, saving labor and expense. "Sticks like paint" in spite of even heavy rains. Guaranteed under the National Insecticide Act. All ready to use by adding water. Lb. 25 cts., 5 lbs. \$1.00, 10 lbs. \$1.75, 25 lbs. \$4.00, 50 lbs. \$7.50, 100 lbs., \$13.50. Large quantities, price on application.

Bowker's Concentrated Lime Sulphur kills San Jose Scale, Oyster Shell bark lice, etc., and gives the tree a thorough "housecleaning." It should be applied any time after the leaves drop in autumn and before the buds start in spring. Needs only to be diluted with *cold* water and it is ready to apply. One gallon makes 10 gallons of spray. Guaranteed under the National Insecticide Act. 1 gal. 75 cts., 5 gals. \$2.25, 10 gals. \$4.00, 25 gals. \$6.50, 50 gals. and larger quantities, write for special price, stating quantity required.

Bowker's Arsenate of Lead (Disparene Brand) kills all leaf-eating insects, like potato bugs, rose bugs, fruit tree worms, gypsy and brown-tail moths, caterpillars, elm beetles, etc., and sticks like paint to the leaves. It is easy to apply and won't injure the most tender foliage. Lb. 25 cts., 5 lb. 90 cts., 10 lb. \$1.60, 25 lbs. \$3.75, 50 lbs. \$6.50, 100 lbs. \$12.00.

Tree Tanglefoot. A perfect safeguard for trees, vines, and shrubs against Gypsy, Brown-tail, and Tussock Moth, Canker Worm, Cut Worm, Ants, and other creeping insects. GYSPY AND BROWN-TAILED MOTHS—Apply as soon as the foliage begins to appear. Should be applied to the body of the tree to form a continuous sticky band around the tree trunk at least 1-16 to 1-8 inch thick, and from 3 to 5 inches wide. Apply it high enough from the ground so as to be out of the way of children and animals. Before applying remove all loose bark from the surface to be coated. Apply with a small wooden paddle. The bark should be dry when applied. Do not heat it but apply it directly from the can. 1-lb. can 30 cts., 3-lb. can 85 cts., 10-lb. can \$2.65, 20-lb. can \$4.80

Tree Burlap. 10 inches wide, for girdling trees. 5 cents per yard, 100 yards 3 cents yard.

See Special Offer on third page of cover.

Dusters, Tin. These have finely perforated bottoms for applying Paris Green, Slug Shot, etc. 20 cts. each. *Net.*

Dickey's Bug Death Shaker. The best thing in the way yet offered. Every person who has a garden will want one. Price, 25 cts. *Net.*

Powder Puff, Scollay's Insect. This is a large, strong rubber bulb, with long metal neck and distributor set at an angle that enables the operator to apply either powder or liquid over or under the leaves. \$1.25 each

FERTILIZERS.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is manufactured expressly for us and we vouch for its containing all the constituents required to produce a luxuriant growth. We believe beyond a question that ours is the only absolutely odorless Lawn Dressing. It is also so clean that the most fastidious person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a finer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower beds and all vegetable crops as for the lawn.

BRECK'S MARKET GARDEN MANURE.

Not subject to our special offers.

A high grade, properly balanced, chemical fertilizer that is especially recommended to market gardeners and farmers for potatoes and all vegetable crops. We sold large quantities of it last year, and already we have had many testimonials, also increased orders from those who had it for use this spring. *It is beyond a question the best value offered in Chemical Fertilizers.* 50 lbs., \$1.00; 100 lbs., \$1.80; ton, \$34.00.

R-R LAND LIME (HYDRATED).

R-R Land Lime is specially prepared for use on the soil, and is an unusually pure calcium lime, being made from a lime-stone which analyzes from 93 to 97 per cent. calcium carbonate (Ca C O_3), with less than 2 per cent. magnesian carbonate (Mg C O_3). It is a combination of calcium hydrate and calcium carbonate, made in accordance with the recommendations of the various Agricultural Experiments Stations. It is shipped in the form of a fine white powder in 100-pound cloth bags. This form is most convenient, as it is ready for immediate distribution on receipt or will keep indefinitely when stored in a dry place; size and shape of package admit easy handling; loss of time and labor necessary to slake and sift ordinary lump lime is obviated, and the fineness removes all danger of breaking machinery of a spreader. 100 lb. bags, \$1.00; per ton, \$12.00. Price on application for car lots.

UNLEACHED HARD WOOD ASHES.

Our trade in this valuable fertilizer has grown to such an extent that we have for a number of years had an experienced agent employed in Canada collecting the purest, driest and choicest grade of Hard Wood Ashes that is obtainable. We guarantee the percentage of potash and to insure against too much water we accept none that contain more than 12 per cent. moisture. *We quote special prices on carloads in bulk delivered anywhere.* Price, per ton, in sacks, f. o. b. Boston, \$18.00 net; per sack of 100 lbs., \$1.25.

See Special Offers on third page of cover.

Pulverized Sheep Manure—Ram's Head Brand.

We recommend Ram's Head Brand Sheep Manure for all purposes where a high-class fertilizer is required. It is pure and unadulterated, and gathered from sheep corrals where they have been under cover, hence retaining its fertilizing requisites. As a top dressing for lawns it is unequalled, it can also be used with splendid success on golf courses and tennis courts, as well as on plants indoors. For lawns and tennis courts it should be put on at the rate of 500 to 600 pounds to the acre.

Price per ton, \$35.00; 100 lb. bag, \$2.00; 50 lb. bag, \$1.25; 5 lb. pkg., 30c.

Scotch Soot.

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two-thirds soot, one-third sulphur) there is nothing better to prevent and cure mildew. Used as a fertilizer either in the dry state or in liquid, it quickly promotes growth. Per bag of about 2½ bu. \$2.50

For the past two or three years I have had your sheep dressing for my lawn, and it is the very best dressing that I know of.

GEORGE S. SMITH,
Newton Centre, Mass.

Breck's Improved Leaming Corn, growing on farm of Avery Bros., Beverly, Mass.

MAPES MANURES.

These Manures and Super-phosphates are fine, dry, in superior mechanical condition for use in machine drills, or for application by hand.

Packed in 100 lb. bags. Each bag is plainly branded, besides having a tag attached, upon which is printed the *Guaranteed Analysis and full directions*. The basis of the Mapes Manures is Bone; no rock used. We are the sole Boston agents. Full information mailed free. Prices are NET, F. O. B., BOSTON.

Use Mapes Corn Manure and get crop equal to this.

Potato Manure. Ammonia 4.50 to 5 per cent.; phosphoric acid, 8 to 10 per cent. (soluble and available, 8 per cent.); soluble potash, actual, 6 to 8 per cent., all as high grade sulphate and in forms free from muriates (or chlorides); magnesia, lime, etc., 77 to 81 per cent. For Irish and sweet potatoes, also for asparagus, early vegetables, tomatoes, sugar beets, fruits sorghum, sugar cane, sweet corn, etc. For bag of 100 lbs., \$2.35; five bags and over, \$44.00 per ton.

Economical Potato Manure. Ammonia, 4 to 5 per cent.; phosphoric acid, 6 to 8 per cent. (soluble and available, 4 to 5 per cent.); soluble potash, actual, 8 to 10 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). Per bag of 100 lbs., \$2.30; five bags and over, \$41.00 per ton.

Fruit and Vine Manure. Ammonia, 2 to 3 per cent.; phosphoric acid, 7 to 9 per cent. (soluble and available 5 to 7 per cent.); soluble potash, actual, 10 to 12 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries, and all small fruits. Is slow in effects. Per bag of 100 lbs., \$2.45; five bags and over, \$45.00 per ton.

Vegetable Manure, or Complete Manure (for light soils). Ammonia, 6 to 8 per cent.; phosphoric acid, 8 to 10 per cent. (soluble and available, 6 to 8 per cent.); soluble potash, actual, 6 to 8 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). This is our special manure on all kinds of soils, for truck, early vegetables, onions, celery, tomatoes, also on light soils for oats, hops and barley. All vegetables require liberal supplies of soluble potash. Per bag of 100 lbs., \$2.60; five bags and over, \$47.00 per ton.

Grass and Grain Spring Top Dressing. Ammonia, 5 to 6 per cent.; phosphoric acid, 7 to 9 per cent.; actual potash, 5 to 7 per cent. Per bag of 100 lbs., \$2.50; five bags and over, \$46.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent.; phosphoric acid, 6 to 8 per cent.; actual potash, 8 to 10 per cent. Per bag of 100 lbs., \$2.35; five bags and over, \$43.00 per ton.

Complete Manure (for general use). Ammonia, 4 to 5 per cent.; phosphoric acid, 10 to 12 per cent. (soluble and available, 8 to 10 per cent.); soluble potash, actual, 4 to 5 per cent. A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; if any in hills, use sparingly. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 100 lbs., \$2.30; five bags and over, \$42.00 per ton.

The Mapes Top-Dresser, Improved Full Strength. (Odorless.) Ammonia, 12 per cent.; phosphoric acid, 8 per cent.; soluble potash, actual, 4 per cent. (free from chlorides). Use at rate of 300 to 500 lbs. per acre. Composed of the very highest grades of soluble fertilizing materials, including Genuine Peruvian Guano, so treated as to render all the phosphoric acid practically soluble (without objectionable acidity). Per bag of 100 lbs., \$3.00; five bags and over, \$56.00 per ton.

Corn Manure. Ammonia, 3 to 3.50 per cent.; phosphoric acid, 10 to 12 per cent. (soluble and available, 8 to 10 per cent.); soluble potash, actual, 6 to 7 per cent. Also for sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 100 lbs., \$2.20; five bags and over, \$40.00 per ton.

BRADLEY'S FERTILIZERS

Are guaranteed to contain more plant food in a better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the New England Homestead affirms, "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers, which have grown large crops of superior grass, grain and vegetables, on thousands of farms all over New England for fifty years.

Among their leading brands are:

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise,—"*the Old Reliable.*"

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced special "potato manures" whose alleged scientific combination is their principle claim to the farmers' patronage.

BRADLEY'S COMPLETE MANURES

For Potatoes and Vegetables.—For Corn and Grain.—For Top-Dressing Grass and Grain with 10 per cent Potash.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely illustrated pamphlets, describing all of their brands, and let us quote you prices on all of these unequalled fertilizers before purchasing elsewhere.

Clay's Fertilizer.

A safe and reliable preparation. In great favor with successful gardeners in England. Prices: 2-lb. cans 35 cts.; $\frac{1}{4}$ cwt. (14 lbs.) \$1.25; $\frac{1}{2}$ cwt. (28 lbs.) \$2.25; $\frac{3}{4}$ cwt. (56 lbs.) \$4.00; 1 cwt. (112 lbs.) \$7.00.

Thomson's Vine, Plant and Vegetable Manure.

A safe and reliable food and stimulant for every fruit-bearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: $\frac{1}{4}$ cwt. (14 lbs.) \$1.25; $\frac{1}{2}$ cwt. (28 lbs.) \$2.25; $\frac{3}{4}$ cwt. (56 lbs.) \$4.00; 1 cwt. (112 lbs.) \$7.00.

Thomson's Special Chrysanthemum Manure.

Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaping dessert-spoon full will be sufficient for a 10-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, 14 lbs. \$2.25; 28 lbs. \$4.00; 56 lbs. \$7.00.

Bowker's Ammoniated Food for Flowers.

A dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless, and producing early and abundant blossoms of rich and brilliant color and healthy, luxuriant plants free from vermin. Price, small pkg. 15 cts.; large pkg. 25 cts.

**Cocoanut Fibre.**

A chemically prepared cocoanut fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Cocoanut Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs. 30 cts.; 15 lbs. 50 cts.; 25 lbs. 75 cts.; 50 lbs. \$1.00; 100 lbs. \$1.50, net.

Result of Inoculation with Farmogerm.

strongly advise the use of Farmogerm upon any and all legume seeds. Farmogerm inoculations are endorsed by farmers and Federal and State Agricultural Experiment Stations throughout the country.

Garden Peas, Beans, Sweet Peas yield earlier and longer when inoculated. Order Farmogerm for all these seeds. Prices: 5-acre size bottle \$9.00; 1-acre size bottle \$2.00; garden-size bottle 50 cts.

ALFALFA IN NEW ENGLAND

The greatest forage crop known is now grown with great success in all sections. This wonderful crop can be grown wherever the soil has good drainage—seed bed well prepared and seed inoculated. The Rhode Island Agricultural Experiment Station has demonstrated that the reason for failure to grow alfalfa is because of the absence of the proper bacteria in the soil, and by the use of Farmogerm inoculation upon the seeds, this condition has been overcome, and alfalfa is a decided success. Farmogerm will provide all inoculations for alfalfa or any other legumes. It comes in bottles ready for use. You can inoculate the seed for ten acres in ten minutes.

TRADE **FARMOGERM** MARK
HIGH-BRED NITROGEN GATHERING BACTERIA

Seed and Soil Inoculations

CLOVERS, SOY BEANS, COW PEAS, BEANS

are legumes, and are greatly benefited by the proper inoculation. This inoculation not only increases the crop in weight but also in richness, and deposits in the ground upon the legume roots great quantities of nitrates. These nitrates are available to other crops that may be growing at the same time with the legumes, or that may be grown afterward. One thousand pounds of nitrates per acre are added to the soil by using inoculations upon legumes, thus doing away with the most expensive part of your fertilizers. We

POULTRY SUPPLIES

We carry the most extensive line in New England.

(Prices subject to change.)

**To Raise Healthy Chicks
Use**

**Breck's Hygienic Brand
Chick Food.**

**To Make Hens Lay
Use**

**Breck's Complete Poultry
Feed.**

Breck's Hygienic Brand Chick Food.

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply, without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhoea, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.35. 100 lb. bag, \$2.50.

Breck's Complete Poultry Feed.

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in *Breck's Complete Poultry Feed* what we believe is the best food for poultry that is on the market to-day.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$1.35. 100 lb. bags, \$2.50.

Breck's Mash Egg Food.

Is a properly balanced meat and cereal preparation, and is one of the best egg-producing foods we know of for poultry that do not have large runs; it is just what is wanted to keep them in good vigorous condition. Can be fed wet or dry. Price, 100 lb. bags, \$2.50.

Breck's Cut Alfalfa.

The best known green food for poultry. DIRECTIONS FOR FEEDING:—Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 100 lb. bag, \$2.00; 500 lbs. \$9.50. *Net.* Special price on larger quantities quoted upon application.

Breck's Banner Brand Cut Clover.

DIRECTIONS FOR FEEDING:—Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50 lb. bag, \$1.00. *Net.* Special price on larger quantities quoted upon application.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. (See cut.) $\frac{1}{2}$ gal., 50 cents each; 1 gal., 75 cents each; 2 gals., \$1.00 each. Special prices per dozen or 100 upon application.

Blatchford's Calf Meal. Perfect substitute for milk in raising calves. 100 lb. bag makes 100 gallons of rich nutritious gruel, thoroughly cooked and prepared for digestion. Splendid growing food for all young stock, pigs, colts, etc. 25 lb. bag, \$1.00; 50 lb. bag, \$2.00; 100 lb. bag, \$3.50. *Net f.o.b. Boston.*

See Special Offers on Third Page of Cover.

Breck's Hygienic
Poultry Fountain

Breck's Hygienic Poultry Fountain. Made of heavy galvanized iron. Easily cleaned and filled. Water pan fastened with hinge and spring clip. The best sanitary fountain in every respect on the market. 1 gal., 75 cts. each.

Sanitary Poultry Fountains. Made of glazed stoneware, in two pieces; a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one quart size is *especially suitable for pigeons*. 1 qt. 25 cts.; 2 qts. 30 cts.; 1 gal. 35 cts.; 2 gals. 50 cts. *Net*. Packing charges extra.

Sanitary Poultry Fountain

Sterlingworth Poultry Charcoal.

Sterlingworth Charcoal is especially prepared for poultry. It is carefully and uniformly graded in just the right sizes, is free from ammonia or other dangerous poisons, contains no useless dust or dirt and is the best charcoal sold for poultry.

It is manufactured in four grades: X (Fine Powdered) for mash foods and ducks; XX (Fine Granulated) for brooder chicks and dry chick food mixtures; XXX (Medium Granulated) for half-grown fowls and pigeons; XXXX (Coarse Granulated) for full grown fowls, geese, and turkeys.

We number them to order. Per doz. 15 cts., per 100, 65 cts. Postpaid. Numbering, extra, 10 cts. per 100.

Climax Leg Bands. A thick brass wire goes around the leg which is locked securely by the attaching of the tag bearing number. All sizes. Doz. 15 cts.; 100, \$1.00. Postpaid.

Leader Adjustable Leg Bands. Latest and best adjustable leg band out. Has neat, compact and smooth fastening with no catching points; easily attached and are absolutely secure. Made in two sizes: No. 1 for Bantams or Mediterraneans, No. 2 for Americans. Per doz., 15 cts.; per 100, 65 cts. Postpaid. Numbering, extra, 10c. per 100.

Nests, Wire. Strong and clean. Each, 50 cts.

Guns, Insect Powder. 2 oz. size, 15 cts. each.

Pumps, Breck's Hand

Force is a double-acting portable force pump. It is made of brass, and therefore impervious to the action of acids and liquids, and will not rust or corrode. Pump is placed directly in water or other liquid, insuring a perfect suction. It is furnished complete with malleable foot-rest and suitable nozzles for a solid stream and large spray. Pump may be used for washing windows, wagons, in conservatories, gardens, etc., and for general spraying purposes. Price, \$4.50 each.

Acme Sprayer. Invaluable for spraying all kinds of insecticides in a liquid or dry powder form and for spraying cattle.

They are especially adapted to the use of poultrymen and florists, and can be used by all to advantage around the house and place. The brass sprayer is not affected

by acids, and is practically indestructible.

All Brass Sprayers . . . Our net price, each, \$1.00
 " Tin " . . . " " " " .50

Milkol. An antiseptic, a disinfectant, cleanser, a curative agent. Keeps your live-stock clean and healthy, cleanses and purifies their quarters. Absolutely safe to use, non-poisonous and non-corrosive. One gallon makes from 60 to 256 gallons. Directions on every can. $\frac{1}{2}$ gal. can, 85 cts.; 1 gal. can \$1.50; 5 gal. can \$1.25 per gal.

Clark Heaters. The use of Clark Heaters and coal is steadily on the increase. Write for special catalogue, giving all sizes. Popular sizes are:—

No. 5B. Light and handy.

12 inches long. Weight 4 lbs.

Covered with carpet . . . \$1.50

No. 7D. 14 inches long. Weight 9 lbs.

Flat slanting top.

Covered with carpet . . . 2.25

Clark Coal, 1 doz. bricks in box, weight $7\frac{1}{4}$ lbs.

Case of 100 bricks . . . 6.00

Bees and Bee-Keepers' Supplies. Prices subject to change. The particular feature of the hive, and hence its suggestive name, is the dovetailing. Unlike the old-fashioned lap, miter, or halving plan, it will not gap or pull loose, but will successfully resist all climates. This hive is fitted with Danzenbaker bottom board and cover. As we ship, it is fitted complete with starters in brood chamber and section boxes. We have in stock but one size, the eight frame. All hives set up ready for use. Net price, each, \$3.25.

Section Honey-boxes

Section boxes, each, 1 cent; per 100, 80 cents; per 250, \$1.60; per 500, \$2.75. Our No. 1 sections are made of the choicest white basswood lumber, and are all perfect in finish, and free from defects. They are not all snow white, but vary from that to a light cream color. Choice honey shows off to best advantage in a section not too white.

Bingham Smoker. This is strong, well made, does not clog up and burns any fuel. It has recently been improved by the addition of a curved snout to prevent fire dropping, and a safety attachment to prevent burning the fingers in removing the hot cone for replenishing. Have wide shields; wire handle to cone, and inverted bellows. Large $2\frac{1}{2}$ in., each, 65 cents; by mail, 90 cents.

We also have in stock Brood and Section Foundations, Bee Veils, Rubber Gloves and many other articles necessary to the successful bee-keeper. Prices quoted upon application. Bee Supplies not included in Special Offers.

GENUINE PRAIRIE STATE INCUBATORS AND BROODERS.

To those who desire to rear as well as to hatch chicks and ducks, the selection of an incubator is of vital importance. The high death-rate experienced with chicks the first ten days is more frequently due to imperfect incubation than to any other cause. Too many incubators of to-day are constructed with reference solely to hatching the desired numbers without considering the manner in which they are brought into existence.

Weak, anæmic chicks, lacking in strength and vitality, are of no value, if you hatch thousands; hence the importance of carefully considering the merits of an incubator in this direction before making a selection.

The Prairie State Sand Tray Incubators have proven themselves by thousands of tests, both in the hands of the novice, as well as in comparative results obtained by the large poultry plants using different makes of incubators.

The perfect construction and automatic heat regulation of these machines makes them easily operated and results doubly certain.

JOS. BRECK & SONS, Boston, Mass.

Milford, N. H., May 23, 1910

GENTLEMEN:—Yours of the 16th received, and we are glad to let you know what results we have had with the incubators that we purchased of you. Previous to the time that we purchased these machines, we had four 300 egg machines of a no-moisture style and run them for six seasons, and sold them for almost nothing as we could not raise one half of the chicks hatched from them, and those we did raise were practically worthless. From these results we decided to hatch by old hens, and did so for two seasons and got good results.

The spring of 1908 we purchased of you a 240 egg machine which we have run three seasons and have raised not less than 85 per cent. of all chicks from it and the 390 machine purchased this season; we have hatched 900 with two machines and 500 with hens this season and the chicks from the machines have lived as well and grow faster than those with hens because one thing they are free from lice; and then another reason, when they feel chilled they have the Universal Hover to run to which is ready at all times to hover them.

This combination of machines cannot be beat for hatching and raising chickens. Now that we have found a machine that will hatch chicks that live, we are going to raise broilers this winter and shall order three or four of the 390 egg machines this fall. If at any time we can speak a good word for the Prairie State Incubators or Universal Hovers, we shall be more than pleased to do it because they are the best machines on the market today in our opinion.

Yours truly,

(Signed) A. J. CARLETON & SON.

The PRAIRIE STATE UNIVERSAL HOVER has completely revolutionized the rearing of chicks. No device ever offered to the poultry-raiser has received such endorsement. In cold weather and hot weather it has been an overwhelming success. As its name implies, our Universal Hover has a universal sphere of usefulness. There is practically no limit to its adaptability. As an individual brooder, in brood houses alone or in combination with a hot-water pipe system, or may be used as an indoor brooder in almost any kind of building. It may be attached to any form of outdoor brooder two feet or more in height, to any size or form of colony house, shed, coop, piano, dry-goods or organ box. It also enables those who wish to build their own brooders to get the best brooding device possible in an economical manner. It fills that want, felt by everyone who raises poultry, for something they can use anywhere, any time, and do the work well.

The hover is twenty-two inches in diameter, the top of which is wood, lined with strawboard, a 4-inch rim extending downward, to which is attached six inches of felt curtains. The hover stands on three iron feet, but is not stationary, and may be raised and moved instantly, if desired.

A thermometer is provided, which may be read from the outside without disturbing any part of the brooder. The lamp used is made of metal, using a No. 2 Sun Hinge Burner and a metallic chimney seven inches in length, thus assuring a steady, bright, clear flame; the lamp being on the outside of the brooder in full view at all times. Surrounding the hot air flue or chimney is a fresh-air pipe, through which fresh air, slightly warmed, is injected into the upper part of the brooder. This diffuses downward and through the curtains, thus furnishing a perfect system of ventilation.

IMPLEMENTS AND SUNDRIES FOR 1913

If interested will gladly send you a copy of our New Catalogue of Agricultural Hardware, Implements, Machines and Woodenware, postpaid, on application.

PARCELS POST

On January 1st, 1913, the Parcels Post will be established in the United States. This is probably the largest business enterprise ever undertaken by the Federal Government and will be of great benefit to everybody. The following is a complete table of the Postage Rates covering local rates, also the eight zones into which the United States are divided.

COMPLETE TABLE ON POSTAGE RATES

Parcels weighing four ounces or less are mailable at the rate of 1 cent for each ounce or fraction of an ounce, regardless of distance. Parcels weighing more than four ounces and not exceeding eleven pounds are mailable at the pound rates shown in the following table, a fraction of a pound being considered a full pound. Parcels not to exceed 72 inches in length and girth combined.

Weight	1st zone Local rate	Zone rate 50 miles	2nd zone 50 to 150 miles Rate	3rd zone 150 to 300 miles Rate	4th zone 300 to 600 miles Rate	5th zone 600 to 1000 miles Rate	6th zone 1000 to 1400 miles Rate	7th zone 1400 to 1800 miles Rate	8th zone all over 1800 miles Rate
1 pound	\$.05	\$0.05	\$0.06	\$0.07	\$0.08	\$0.09	\$0.10	\$0.11	\$0.12
2 pounds	.06	.08	.10	.12	.14	.16	.19	.21	.24
3 pounds	.07	.11	.14	.17	.20	.23	.28	.31	.36
4 pounds	.08	.14	.18	.22	.26	.30	.37	.41	.48
5 pounds	.09	.17	.22	.27	.32	.37	.46	.51	.60
6 pounds	.10	.20	.24	.32	.38	.44	.55	.61	.72
7 pounds	.11	.23	.30	.37	.44	.51	.64	.71	.84
8 pounds	.12	.26	.34	.42	.50	.58	.73	.81	.96
9 pounds	.13	.29	.38	.47	.56	.65	.82	.91	1.08
10 pounds	.14	.32	.42	.52	.62	.72	.91	1.01	1.20
11 pounds	.15	.35	.46	.57	.68	.79	1.00	1.11	1.32

The local rate is applicable to parcels intended for delivery within the Boston postal district or on a rural route starting therefrom.

Many of the articles shown on the following pages may be sent to advantage by the Parcels Post and we will be pleased to give you prices on such, delivered at your door or Post Office. Your request for information will have prompt attention.

Breck's "Colonial" Lawn Mower.

Breck's Colonial Lawn Mower is made with 10-inch wheels, 4-bladed wiper, and parallel self-oiling bearings. Every valuable improvement used in the latest pattern mowers of other manufacturers, and many new features are embodied in the Colonial, making it the most desirable and up-to-date machine made. Our long experience in handling lawn mowers entitles our judgment to consideration; therefore, we positively guarantee satisfaction to every purchaser. **Latest and Best.**

Horse Lawn Boots.

For Lawn or Golf work, Horse Boots are indispensable for use in connection with mower or roller. They prevent the horse sinking in damp or soft places and do not cut or tear up the turf. The following patterns are the ones in general use; each having been adopted for some particular merit of its own.

OUR NET PRICES.

Breck's Golf Pattern, per set of four. \$8.00 Baker's, per set of four. \$6.00

Please send diagram showing size of horse's hoof when ordering.

"Nox-All" Grass Catcher.

Collapsible frame of galvanized wire. Heavy galvanized iron bottom with slots making catchers adjustable to fit different sizes of mowers. Fitted with improved stationary handle, so attached that entire handle is within the catcher. Furnished in fine quality white duck only.

No. 1000. 13 in. deep, 17 in. long, 19 in. wide. Fits 12 to 16 in. mowers Our net price, each, \$1.00
" 1010. 13 " 17 " 23 " " 16 to 20 " " 1.00

English Water Ballast Rollers.

For keeping golf greens, lawns, and tennis courts in perfect order these Rollers are invaluable, and have been adopted by the English clubs in preference to all others. When the ground is soft they may be used empty and in dry weather, when all others are useless, they can be filled with water and worked effectually.

The advantage of having in one Roller either a heavy or light implement at pleasure must be obvious to every one.

"Boss" Field, Garden, Golf and Lawn Rollers.

The benefits derived from the use of a Roller on the lawn, especially in the spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if the sod is not firmly pressed back with a Roller before the hot weather begins, the grass is apt to be killed or injured, leaving the lawn full of bare spots.

The "Boss" Roller is a strictly high grade Roller at a moderate cost. This Roller is turned perfectly smooth on the outer surface, has bevelled edges, turned steel axles, and is in fact far superior to any other we have seen.

The Austin Motor Mower and Lawn Roller.

The following statement is made by the manufacturers:

"From the outset we have followed a policy with the Austin Motor Lawn Mower which could only lead to success. Its mechanism was known to us to be quite right before we put it on the market. We believed in it thoroughly, and having confidence in it ourselves, we put it on the market in a way that could not fail to secure the confidence of the purchaser.

"It is the first Motor Mower put out on an absolute trial order. Where we found one month's guarantee to be the practice, we made it six months. We were not forced to this; we initiated it because we could afford to, and because the high quality of our machine warrants it. We put this guarantee in the first sales contract we ever made, and we continue to give it to every purchaser, whether he asks for it or not."

Descriptive circulars and prices on application.

Hudson's Garden Hose Mender.

So Simple a Child can Use it.

Made in three sizes, for 1/2-inch, 3/4-inch and 1-inch hose. Put up in boxes for consumers' use. Each box contains one pair pliers, twenty bands, six tubes. A box will be sent prepaid by mail to any address on receipt of 75 cents.

Give inside diameter of hose when ordering. Sent otherwise than by mail 50 cents per box.

All Iron Park Hose Reels.

To meet the demand for Hose Reels having a larger capacity than the ordinary reels which carry from 50 to 100 feet, we have selected the Park Reels as being the most suitable.

Hall Dandelion Puller.

To kill dandelions you must destroy the root. Cutting them off is a waste of time and energy. They are bound to grow again—chemicals disfigure the lawn. The easiest and most effective way is to keep the dandelions down and out. Use a Hall Dandelion Puller. Patented clog-proof claw gets the root without tearing up the lawn. Kills dandelions once and for all—the only weeder that does not leave the lawn looking worse than it did with the weeds. Long handle eliminates need of getting down on hands and

knees. Polished steel blade. Lasts a lifetime. Guaranteed to pull dandelions or money refunded.

Ferguson Combined Sprayer and Syringe.

The only practical Combination Sprayer and Syringe. The three different roses that go with each sprayer make it possible to either water, spray or syringe at will by simply adjusting whichever rose is desired. Our net price complete as shown \$3.50

The "Detachable" Hose Reel.

Revolves on the faucet. Attached and Detached instantly. Hose pulls off in any direction while the water runs.

A special faucet is furnished with each reel, which forms a hollow axle upon which the reel revolves. The joint is made water tight by means of a leather gasket and thumb screw. The reel with hose attached, can be instantly detached from the faucet, and hung up on a nail out of the way and sun when not in use.

The hose pulls off in any direction, is easily drained, and as it is impossible to kink or twist the hose, its life is greatly increased. The water can be turned on and as much or as little of the hose unreeled as desired, while the water is running.

Detachable—20 in. diam., $8\frac{1}{2}$ in. wide, holds 100 feet $\frac{3}{4}$ in. hose. Weight of reel 7 lbs., faucet $1\frac{1}{2}$ lbs. Shipped two in a crate, weight of two reels and crate 25 lbs. One faucet included with each reel each, \$5.00

"Cyclo" Platform Scales

This illustration shows the new Cyclo Ball Bearing Swivel Wheel Portable Scale, which is the latest improvement in platform scales. This scale is constructed with two swivel or castor wheels at the front or beam end of scale frame, combined with two stationary wheels at rear end of frame.

By use of this novel swivel wheel construction the operator is able to move the scale in any direction with the utmost ease.

Our Cyclo Scales are fitted with hardened flexible lever-bearing loops and platform bearing feet. The beam and crescent shaped sliding poise are of solid brass, highly polished. All pivots are of best tool steel, carefully tempered and ground to a knife edge.

Wood parts are of the choicest selection obtainable, well finished and handsomely striped in gilt.

Invincible Garden Cultivator.

The hand cultivator fills a long-felt want in gardening. It keeps the soil loose and at the same time kills the weeds.

The operator simply walks along the rows drawing the cultivator after him. It saves the double

effort of swinging a hoe backward and forward with every stroke.

It involves much less expenditure of strength than pushing a wheel hoe through hard soil.

Fig. 15.

Fig. 16. Brown's Auto Spray.

No other style of sprayer will do such a variety of work, and do it so well. We recommend it for trees, shrubs and vines, greenhouses, poultry houses, hospitals, and stables for disinfectants, for sheep and cattle dip and cattle fly oils.

It may be used where any bucket or knapsack sprayer can be used, and with much more satisfaction. Even those who have commercial orchards and large power sprayers, need the "Auto-Spray," No. 1 for small work.

No. 1 B Brass Tank, each, \$7.65 Brass Extension Pipes, each, \$0.45
" 1 D Galvanized Tank, " 5.40 " Strainer, " .90
Auto Pop Nozzles included in above prices.

Fig. 12. Universal Success Spray Pump.

This general purpose Sprayer, by merely changing the various attachments furnished with it, can be used as a Spray Pump, Plumbers' Force Pump, Fire Protector, Whitewasher, Floor Oiler, Buggy or Auto Washer. The pump is fitted regularly with a galvanized tank holding five gallons.

All working parts of the pump are brass, including brass ball valves. A sliding cover to prevent the liquid from splashing out, also a removable strainer is provided. When not in use the nozzles and attachment are screwed to keepers on side of tank. Four feet of hose and an extension pipe are furnished. Full directions with each pump.

Universal Success Sprayer, Galvanized Tank, Mfrs'. price, \$11.25; net price, \$7.50

The Brandt Sprayers.

The Brandt Perfection Sprayer (see cut) is the best compressed air Sprayer made. This Sprayer will handle whitewash, water paints, Bordeaux mixtures, etc., perfectly. It is made of galvanized steel or brass, as ordered. Weighs $9\frac{1}{2}$ pounds empty and is tested with 50 pounds pressure before leaving the factory.

The Hose is $\frac{3}{8}$ in. 4-ply cloth inserted and equipped with our well known Automatic Shut-off Nozzle.

The other Brandt Sprayers in price list are described in circulars which we will mail on request.

Iron Age Barrel Sprayer.

Just what the man with a small orchard or garden has been looking for—

A hand sprayer that is easy to operate, convenient to get at in all its parts, is stable on its foundation, is so mounted that it can be placed on any conveyance and moved at will, has a fine outside pump with high pressure and is durable.

Our net price, as shown above, \$18.00

Breck's Dry Powder Blowers.

In some sections potato growers, stock and poultry raisers prefer to use Paris Green and disinfectants in powder form mixed with dry plaster. To meet such a demand the Dry Powder Blowers are recommended. It is unnecessary to give the details of the construction of the Blower, as we give a positive guarantee with each that it is impossible to draw powder back into the cylinder pump, and if the powder is sifted through a screen and kept absolutely dry it will be impossible for the same to clog. The powder can hold one quart.

Our net price each, 75 cts.

Brass Cylinder House Force and Lift Pumps.

No. 239.

The Brass Cylinder Pumps are novel in design and different from all other makes. Very nicely finished and durable. Reversible handles and non-freezing. They are fitted with special pipe couplings which take lead or iron pipe. Lead pipe can be attached direct without solder. This device is used on no other pumps. Glass Valve Seats.

No. 245 **House Lift Pump** fitted with 3-in. Brass Cylinder. Our net price **\$3.75**

No. 251 **Double Acting Force Pump** fitted with upper Brass Cylinder and 3-in. Brass lower Cylinder, Glass Valve Seat and Drop Valve. Our net price **6.50**

No. 251.

Aeromotor Gasoline Pumps.

The Aeromotor Gasoline outfits are designed to take the place of the "Man at the Pump." After seeing one of these pump water for fifteen minutes no one will want to work the pump handle again. They are simple, durable and air-cooled. No water-jacket to freeze and burst. Can be furnished complete as shown in cut or with jack, using the pump you already have in well. Will deliver from 225 to 1600 gallons per hour. Prices range from \$40.00 to \$75.00 for complete outfits.

The No. 2 outfit as shown sells for \$50.00. Pipe and working cylinder additional. Descriptive circulars mailed on application.

Stover Grinding Mills.

The No. 32 Mill (see cut) embodies all the good features of other hand grinding mills to which have been added universal burrs or grinding plates that are adjustable for grinding coarse or fine. This machine grinds oats, barley, rye, corn, peas, dry bone, shells, etc., for feeding to poultry. It is a well designed machine, is strong and well made throughout and of excellent finish; has a 16-inch fly wheel and is light running.

Capacity, one or two bushels per hour.

Our net price . . . each, \$5.00

The No. 5 Feed Mill is made in three sizes to meet the requirements of farmers owning Gasoline Engines, who wish to grind shelled corn and small grain of all kinds including wheat screenings.

Power.

The No. 5 Mill may be operated with two horse power but it has capacity to consume power of a four horse engine

Speed.

The No. 5 mills should be run at 600 to 1800 R. P. M.

Capacity.

The No. 5 mills grind shelled corn and all kinds of small grain, including wheat screenings, into coarse, medium or fine chop or feed as desired, at rate of 3 to 7 bushels per hour per horse power. Descriptive circulars mailed on application

United States Poultry Fence.*The United States Poultry Fence is Galvanized After Weaving and will not Rust as Fencing Galvanized Before Weaving.*

The United States Poultry Fence has proven best by test. It has long since established its superiority over other makes, and is in a class by itself. It is built to withstand use and abuse and is guaranteed to give Satisfaction.

The United States Poultry Fence is strictly a "No-Sag" poultry fence, as the combination of line and mesh wires, closely woven, prevents any lengthening or narrowing between posts. These features place it a long stride beyond the Hex mesh netting, which never fails to narrow and lengthen if you attempt to stretch it to a tension required to prevent sagging.

There is no netting that compares with United States Poultry Fence for strength, beauty and durability, and we invite comparison with other makes, feeling confident that all our claims of superiority will be substantiated.

Poultry Fence No. 19 Wire 2 in. Mesh

Also a full line of Spike and Spring Tooth Harrows.

Circulars and prices mailed on application.

Closed.

Standard Automatic Earth Auger.

One man with this Auger will bore more holes in a day than two men with two augers or diggers of any other make, as it is self-feeding and self-discharging, and the blades are so formed that they easily enter the hardest ground without forcing. It draws itself into the ground as readily as a wood auger enters wood. One blade being permanent and the other held in position by a simple locking device, can be swung wide open at will of operator, permitting the auger to quickly unload.

WILL BORE IN ANY KIND OF SOIL

and in all conditions of soil—hard, soft or sticky, dry or wet, hard pan, sand or gravel, small stones, etc. The lower side cutting edges bore the hole larger in diameter than the body of the auger, which reduces the friction and prevents binding in the hole.

Standard Automatic Earth Auger . . . each \$3.50

Cleveland Lawn Weeder.

No more broken backs. This little device gets at the root of the evil and removes it bodily. Our net price, each, \$0.75

MEHLER'S HANDY GARDENER

Hoe, Rake, Weeder & Cultivator In One

Works with ease--Saves the knees

An entirely distinct tool 5½ in. wide with a special handle 4½ ft. long; entire weight 2 lbs.

Note the special arrangement of the 5 teeth, which allows cultivation closer to the plant than any other device, and at the same time on three sides at one stroke; you being in a comfortable standing position.

No hoe is needed where this tool is used; just the thing for working among flowers and young vegetable plants. Send for descriptive circular.

No. 2 Stanchion Basin with Valve, our net price, each, \$1.50. Not included in our special offers.

Breck's Improved Swing Stanchion.

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

There is no friction on the neck, as the Stanchion turns with the head. It keeps them as clean as the firm Stanchion and there is no possible way they can get hurt; neither can they get to the right or left to gore each other.

The cattle cannot waste their feed and do much better than when tied with any other Stanchion. No getting choked or getting unfastened.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

Superior Sanitary Churn.

The Superior Sanitary Churn is made with the idea of furnishing the butter maker with a churn that will not absorb any moisture whatever, making it absolutely sanitary. It is very easy to wash and dry, there being no reason for placing it out in the sun to dry, or in the basement to keep it from leaking. It costs more than the ordinary churn and is worth more. The difference in price is nothing when you consider the difference in quality. The labor saved each year, the satisfaction of knowing there is nothing about your churn that will taint the butter, and that your churn will be just as sweet after use as when new.

CLIPPING AND SHEARING MACHINES.

If properly stabled, well fed, carefully groomed, and clipped in season, a horse will continue in good health and appearance. His value will not impair, and he will do good work. Whether you own but 5 sheep or 5000, you cannot afford to overlook the merits of the sheep shearing machines. Machine shorn wool brings the highest price because the machine gets the wool that is next to the skin and that is the best wool of the whole fleece. Hand shears always leave this wool on.

Never Slip Wire Stretcher.

If you cut or injure the galvanizing on a wire it lets in rust. Consequently the wire is weakened and breaks at this point. The *Never Slip* stretcher has an iron jaw, but no teeth. When it gets a hold it never lets go, but hangs on with a deathlike grip to all kinds of wire. Our net price, \$1.00 each.

CLOTHES WASHERS.

Horton Water Motor Washer.

The most simple, most powerful, lightest, strongest and most durable WATER MOTOR WASHER on the market. It will work with less water pressure than any other motor and just as well with high pressure. It is self-lubricating and requires no oiling. Absolutely nothing to get out of order. Four feet of special water motor hose for inlet and four feet for outlet, with all the necessary attachments, furnished with each motor. The dasher makes a longer stroke than on other makes, requiring less time to do the same amount of work.

Our Horton No. 12 Rotary Washer and the Miracle Washers are guaranteed to be perfect in every respect. The No. 5 is the best of Lever Washers. Tubs have a large capacity and are made of the best grade Red Louisiana Cypress, handsomely finished in natural wood. If they do not prove all we claim for them they can be returned and the money paid refunded.

Ruddy Harvester Oil.

Ruddy Harvester Oil is made especially for mowing machines, reapers and other kinds of farm machinery and has never failed to give satisfaction. The oil is pure, free from grit, and is warranted not to gum or injure the finest machinery. Beware of the so-called mowing machine oils usually offered by agents. By using them you will damage your machinery.

Ruddy Harvester Oil is put up in convenient cans ready for use, as follows:

CAREFULLY STUDIED PLANTING-SCHEME

is a worthy, and it might be said necessary, component of the home environment. A growing appreciation of the possibilities arising from the use of hardy plants in landscape decoration is being manifested in the many calls made upon us for planting advice; and we are always glad to lend our experience to aid in the development of any landscape proposition. Send us a dimensioned sketch of the plot you wish to treat, or let us send a representative to look the ground over and make suggestions.
